Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

1. Incorporation and nature of operations:

Pender Growth Fund Inc. (the "Company") was incorporated under the laws of British Columbia on March 7, 1994.

On May 23, 2018, the shareholders voted in favour of a resolution to change the classification of the Company, such that it would no longer be considered an investment fund for purposes of securities law.

The Company has been managed by PenderFund Capital Management Ltd. (the "Manager") since 2003. The investment objective of the Company is to achieve long-term capital growth from investment in opportunities identified by the Manager. The Company invests primarily in public and private companies based in Canada and the U.S., principally in the technology sector, with an emphasis on established businesses requiring capital for growth, expansion or restructuring.

The Company's registered office is located at 1830 - 1066 West Hastings Street, Vancouver, British Columbia, V6E 3X2, effective September 1, 2019.

2. Basis of preparation:

(a) Statement of compliance:

The annual financial statements of the Company are prepared under International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards ("IAS") Board. These condensed interim financial statements ("financial statements") of the Company have been prepared in accordance with IAS 34 Interim Financial Reporting and do not include all of the information required for full annual financial statements. These financial statements should be read in conjunction with the audited annual financial statements.

The Company qualifies as an investment entity under IFRS 10, Consolidated Financial Statements.

These financial statements were authorized for issue by the Company's Board of Directors on November 21, 2019.

(b) Basis of measurement:

These financial statements have been prepared on a historical cost basis except for investments, which are measured at fair value.

(c) Functional and presentation currency:

These financial statements are presented in Canadian dollars, the Company's functional currency.

(d) Use of estimates and judgment:

The preparation of financial statements in conformity with IFRS requires the Manager to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized in the period in which the estimates are revised and in any future period affected.

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

2. Basis of preparation (continued):

(d) Use of estimates and judgment (continued):

The Company may hold financial instruments that are not quoted in an active market, including derivatives. The determination of the fair value of these investments is the area with the Manager's most significant accounting judgements and estimates in preparing these financial statements.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next reporting period is included in note 8 and relates to the determination of fair value of investments with significant unobservable inputs.

3. Significant accounting policies:

These financial statements follow the same accounting policies and methods of application as the annual audited financial statements as at and for the year ended December 31, 2018.

4. Related party transactions:

(a) Management and performance fees:

In accordance with the Third Amended and Restated Management Agreement dated May 1, 2017 ("Management Agreement"), the Manager provides management services in connection with all aspects of the identification, investment, development, active monitoring and ultimate divestment of all investments of the Company. This Management Agreement is in effect until April 30, 2023 and will renew automatically at that date for a further term of four years unless a vote of shareholders determines otherwise.

In exchange for these management services, the Company pays a management fee. Effective May 2019, the management fee is equal to 2.50% of the first \$15,000,000 of the value of Net Assets and 1.75% of the value of Net Assets above \$15,000,000. Prior to May 1, 2019 the management fee was equal to 2.50% of the Company's total shareholders' equity per annum on total shareholders' equity of up to \$50,000,000 and 2.00% of the Company's total shareholders' equity in excess of \$50,000,000 per annum. The management fee is calculated and paid monthly.

The Manager is entitled to a performance fee in certain circumstances, based on achieving certain performance criteria set out in the Management Agreement. The performance fee is calculated as 20% of any net increase in shareholders' equity above an annual hurdle rate of 6%. The performance fee is calculated on an annual basis and is subject to a high water mark, being the year-end total shareholders' equity per share for the most recent preceding year in which a performance fee was earned. The December 31, 2016 total shareholders' equity per share was the initial high water mark. Subject to the accumulation of the hurdle rate in years in which no performance fee is payable, the high water mark will not be reset other than to be adjusted in the event of a subdivision or consolidation of the shares.

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

4. Related party transactions (continued):

(a) Management and performance fees (continued):

For the three months ended September 30, 2019, the Company incurred management fees of \$175,866 (September 30, 2018 - \$117,424). For the nine months ended September 30, 2019, the Company incurred management fees of \$445,963 (September 30, 2018 - \$358,042). No performance fee was earned in the nine months ended September 30, 2019 and 2018. As at September 30, 2019, the Company had an amount payable to the Manager of \$103,540 (December 31, 2018 - \$451,302) in respect of management fees and reimbursement of operating expenses paid on behalf of the Company.

(b) Share holdings: As at September 30, 2019, directors and officers of the Company directly or indirectly held 7.6% (December 31, 2018 – 14.4%) of the Company's Class C Shares.

As at September 30, 2019, directors and officers of the Company directly or indirectly owned 790,904 shares or 3% (December 31, 2018 – 790,904 shares or 3%) of issued and outstanding shares of BasicGov Systems, Inc., a Company in which the Company is also invested. The aggregate investment by the Company's directors and officers in all other investee companies did not exceed 1.0% of the any investee company's issued and outstanding shares.

5. Share capital:

(a) Authorized share capital:

On July 24, 2019, the shareholders approved a resolution deleting the Class B and Class R shares, altering the rights and restrictions of Class C shares to remove references therein to Class R shares, and creating a new class of preferred shares.

As at September 30, 2019, the authorized capital of the Company consists of:

- (i) An unlimited number of Class C Participating Common Shares ("Class C Shares"); and
- (iii) An unlimited number of Preferred Shares ("Preferred Shares").

Class B Shares:

Class B Shares were non-redeemable but were convertible into one Class R Share and one Class C Share at any time at the option of the holder.

Class B shares were compound financial instruments which are bifurcated into liability and equity components based on the respective fair value of each component. The fair value of the liability component on initial recognition was \$4.16 per share, with the remaining equity component having shareholders' equity attributed in the same manner as Class C Shares.

All Class B Shares were converted during the year ended December 31, 2016, subsequent to which there were no Class B Shares outstanding, and on July 24, 2019 the shareholders approved a resolution deleting the Class B Shares.

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

5. Share capital (continued):

(a) Authorized share capital (continued):

Class C Shares:

Class C Shares are not redeemable or convertible. Class C Shares are listed on the TSX Venture Exchange ("TSXV") under the ticker symbol "PTF".

Each Class C Share is entitled to one vote in any vote on shareholder matters and is entitled to dividends at the discretion of the Board of Directors.

Class R Shares:

Class R Shares were redeemable on an annual basis, with a maximum redemption price of \$4.16. Class R Shares were also convertible to Class C Shares.

Class R Shares were compound financial instruments. Accordingly, outstanding Class R Shares, if any, were bifurcated into liability and equity components based on the respective fair value of each component. The full value of the Class R Share was attributed to the liability component with no value attributable to the equity component.

All Class R Shares were redeemed during the year ended December 31, 2016, subsequent to which there were no Class R Shares outstanding, and on July 24, 2019 the shareholders approved a resolution deleting the Class R Shares.

Preferred Shares:

The Preferred Shares were created on July 24, 2019. As at September 30, 2019, no Preferred Shares have been issued. The special rights and restrictions of the Preferred Shares empower the Board to fix the number of shares in each series of each class of Preferred Shares and to fix the preferences, special rights and restrictions, privileges, conditions and limitations attaching to the shares of that series, before the issuance of shares of any particular series. The Board has the power to fix, among other things, the number of shares constituting any series, the voting powers, designation, preferences and relative participation, optional or other special rights and dividend rate, terms of redemption (including sinking fund provisions), redemption price or prices, conversion rights and liquidation preferences of the shares constituting any series. The issuance of Preferred Shares could affect the rights of the holders of Class C shares.

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

5. Share capital (continued):

(b) Issued and fully paid shares:

During the nine months ended September 30, 2019 and 2018, the Company has issued and fully paid Class C shares outstanding as follows:

	Balance,	Issued	Balance,
For the period ended	beginning of period	for cash	end of period

Capital transactions	-	-	-
Balance, September 30, 2018	\$ 5,204,759	\$ 12,390,753	\$ 17,595,512

On May 10, 2019 the Company completed a secondary offering (the "Secondary Offering") of 3,850,000 Class C shares on the TSXV for gross proceeds of \$15,015,000. In addition on May 24, 2019, the underwriters elected to exercise the over-allotment option and an additional 80,784 Class C shares were issued for gross proceeds of \$315,058. The Secondary Offering resulted in underwriting fees of \$433,075 and other offering expenses of \$332,155, which resulted in net proceeds of \$14,564,828.

6. Capital management:

The Company's Class C Shares represent the capital of the Company. The Company is not subject to any external or internally imposed restrictions on its capital.

The investment objective of the Company is to achieve long-term capital growth from investments in public and private companies.

The Company's objective in managing capital is to ensure it has the ability to continue to make new investments and to make follow-on investments in companies that it has previously invested in, to have sufficient cash for operations and to continue to operate as a going concern.

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

7. Financial risk management:

The Company may be exposed to various financial risks in the normal course of business, associated with its investment objectives and strategies, financial instruments and the markets in which it invests. These risks include credit risk, liquidity risk, and market risk, which consists of currency risk, interest rate risk and other price risk.

The Company maintains positions in a variety of financial instruments in accordance with its investment objectives and strategies. The Company's investment objective is to achieve long-term capital growth by investing in public and private companies based in Canada and the U.S., principally in the information technology and telecommunications sectors, with an emphasis on established businesses requiring capital for growth, expansion or restructuring. The Company also invests in later-stage companies already well-positioned for growth where additional capital is used to expand operations to increase revenue.

The Company's exposure to financial risk is concentrated in its investment holdings. The Schedule of Investment Portfolio groups securities by asset type. The Manager manages the potential impact of these financial risks on the Company's performance by employing and overseeing professional and experienced portfolio advisors who regularly monitor the Company's positions and market events and diversify investment portfolios within the constraints of the investment guidelines.

(a) Credit risk:

Credit risk represents the risk associated with the inability of a counterparty to fulfill its financial obligations. The Company limits its exposure to credit risk for its excess cash, when applicable, by investing in high quality short-term investments, typically term deposits with a large Canadian bank.

The Company is also exposed to credit risk through its investment in loans, convertible and other notes and preferred shares of its investee companies. The Company manages this credit risk through careful selection and monitoring of its investee companies. Receivables relating to the Company's investments are also subject to credit risk and are managed through active review of the portfolio of private unlisted investments.

The Company's maximum exposure to credit risk as at September 30, 2019 is \$5,829,880 (December 31, 2018 - \$5,898,140).

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

7. Financial risk management (continued):

(b) Liquidity risk:

Liquidity risk is the risk that the Company may not be able to settle or meet its obligations on time or at a reasonable price. The Company invests in equity securities and other financial instruments. A large portion of the Company's equity holdings are in private unlisted investments for which no active markets exist. Accordingly, timely disposition may not be possible and the realized price may be significantly different from the carrying value.

The Company's policy is to maintain sufficient cash to meet normal operating requirements. It is also the Company's policy that the Manager monitors the Company's liquidity position and that the board of directors reviews it on a quarterly basis.

The following table summarizes the Company's financial liabilities as at September 30, 2019 and December 31, 2018 based on undiscounted contractual cash flows and are all due within one year:

	September 30, 2019		· · · · · · · · · · · · · · · · · · ·	
Accounts payable and accrued liabilities Due to related parties	\$	88,192 103,540	\$	76,718 451,302
	\$	191,732	\$	528,020

(c) Market risk:

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and equity prices, will affect the Company's income or the fair value of their holdings of financial instruments.

(i) Interest rate risk:

Interest rate risk is the risk that fair value of a financial instrument will fluctuate because of changes in market interest rates. The Company's investment portfolio contains private debt instruments. As the majority of these debt investments are convertible, the valuation of these private debt instruments is based on the enterprise value of the underlying Company and generally does not change with changes in market interest rates. The interest rates of these instruments are fixed, hence changes in market interest rates will not impact cash flows of the Company. Accordingly, the Manager does not consider there to be significant interest rate risk on the Company's private debt investments.

(ii) Currency risk:

Currency risk is the risk that the fair value of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company primarily invests in Canadian securities. Accordingly, the Company is not subject to significant currency risk.

7. Financial risk management (continued):

(c) Market risk (continued):

(iii) Other price risk:

Other price risk is the risk that the fair value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from the aforementioned risks), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in a market. The Manager moderates other price risk through careful selection of investments and through diversification of the investment portfolio.

As at September 30, 2019, if the fair value of the Company's publicly listed investments had increased or decreased by 10% with all other factors remaining constant, the Company's shareholders' equity would have increased or decreased by approximately \$249,000 (December 31, 2018 - \$168,000). In practice, actual results may differ from this sensitivity analysis and the difference could be material.

8. Fair value of financial instruments:

(a) Valuation models:

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices. For all other financial instruments, the Company determines fair values using other valuation techniques.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

The Company measures fair value using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- Level 1: inputs that are quoted market prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date.
- Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e. prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

8. Fair value of financial instruments (continued):

(a) Valuation models (continued):

The Company uses widely recognized valuation models for determining the fair value of common and relatively simple financial instruments, such as debt securities, mutual fund units and warrants that use only observable market data and require little management judgment and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple OTC derivatives such as forward foreign currency contacts. The availability of observable market prices and model inputs reduces the need for management judgment and estimation, and reduces the uncertainty associated with the determination of fair values. The availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

For more complex instruments, the Company uses recognized valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Valuation models that employ significant unobservable inputs require a higher degree of management judgment and estimation in the determination of fair value.

In determining fair value for these types of instruments the Manager considers: the history and nature of the business; operating results and financial conditions; the general economic, industry and market conditions; capital market and transaction market conditions; independent valuations of the business; contractual rights relating to the investment; comparable trading and transaction multiples, where applicable; and other pertinent considerations. Adjustments to the carrying value of the investments may also be determined by the Manager when there is pervasive and objective evidence of a decline in the value of the investment, as indicated by an assessment of the financial condition of the investment based on operational results, forecasts and other developments since acquisition.

The table below presents the fair value of financial instruments as at September 30, 2019 and December 31, 2018 by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognized in the Statements of Financial Position.

	September 2	130, 2019	Decembe	
Level 1: Publicly listed investments	\$ 2,488,	847	\$	1,678,624
Level 3: Private unlisted investments	16,216,	266		15,966,266
	\$ 18,705,	113	\$	17,644,890

Three months and nine months ended September 30, 2019

8. Fair value of financial instruments (continued):

(a) Valuation models (continued):

During the nine months ended September 30, 2019 and 2018, there were no transfers between any levels of the fair value hierarchy.

The following table shows a reconciliation of all movements in the fair value of financial instruments categorized within Level 3 for the nine months ended September 30, 2019 and 2018:

	September 30, 2019	9 September 30, 201		
Opening balance Amounts paid on purchase of investments Total gain recognized in comprehensive income	\$ 15,966,266 250,000	\$ 15,966,266 - -		
Ending balance	\$ 16,216,266	\$ 15,966,266		

(b) Fair value hierarchy - financial instruments measured at fair value:

There is no unrealized appreciation (depreciation) related to Level 3 investments included in the net change in unrealized appreciation in fair value of investments on the Company's Statements of Comprehensive Income for the nine months ended September 30, 2019 (September 30, 2018 - Nil).

(c) Significant unobservable inputs used in measuring fair value:

The table below sets out information about significant unobservable inputs used at September 30, 2019 and December 31, 2018 in measuring financial instruments categorized as Level 3 in the fair value hierarchy.

September 30, 2	2019				
Description	Fair value	Valuation technique	Unobservable input	Enterprise value/ weighted average multiple	Sensitivity to change in significant unobservable input
Unlisted private investments	\$ 6,448,845	Investment cost/ enterprise value	Enterprise value	\$ 6,448,845	The estimated fair value would increase if enterprise value increased
Unlisted private investments	\$ 9,767,421	Market approach using comparable traded revenue multiples	Revenue multiple	2.0	The estimated fair value would increase if the revenue multiples were higher

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

8. Fair value of financial instruments (continued):

(c) Significant unobservable inputs used in measuring fair value (continued):

December 31, 20	018				
Description	Fair value	Valuation technique	Unobservable input	Enterprise value/ weighted average multiple	Sensitivity to change in significant unobservable input
Unlisted private investments	\$ 6,198,845	Investment cost/ enterprise value	Enterprise value	\$ 6,198,845	The estimated fair value would increase if enterprise value increased
Unlisted private investments	\$ 9,767,421	Market approach using comparable traded revenue multiples	Revenue multiple	2.0	The estimated fair value would increase if the revenue multiples were higher

Significant unobservable inputs are developed as follows:

(i) Enterprise value:

Represents the amount that market participants would pay when purchasing the investee company. The Manager determines this value based on comparable arm's length transactions in shares of the respective company.

(ii) Revenue multiple:

Revenue multiples are selected from comparable public companies based on geographic location, industry, size, target markets, and other factors that the Manager considers to be reasonable. The traded multiples for the comparable companies are determined by dividing the enterprise value of the company by its revenue and further discounted for considerations such as the lack of marketability and other differences between the comparable peer group and the specific investee company.

Notes to the Condensed Interim Financial Statements (Unaudited)

Three months and nine months ended September 30, 2019

8. Fair value of financial instruments (continued):

(d) Effects of unobservable input on fair value measurement:

Although the Company believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3, changing one or more of the assumptions used to alternative reasonably possible assumptions would have the following effects on shareholders' equity at September 30, 2019 and December 31, 2018:

	September 30, 2019	December 31, 2018
Favourable	\$ 8,234,626	\$ 8,425,725
Unfavourable	(5,075,235)	(5,022,097)

The favourable and unfavourable effects of using alternative reasonably possible assumptions for the valuation of unlisted private investments have been calculated by recalibrating the model values using unobservable inputs based on ranges of possible estimates. The recalibrated model considers:

- The impact of a 10% increase or decrease in enterprise value.
- A change in the revenue multiple to alternative reasonably possible assumptions of 1.0 and 3.0, respectively.
- (e) Financial instruments not measured at fair value:

The carrying value of the Company's financial instruments, other than investments, approximates their fair value given their short-term nature. These financial instruments are classified as Level 2 in the fair value hierarchy because while prices are available, there is no active market for these instruments.

Three months and nine months ended September 30, 2019

9. Involvement with subsidiaries and associates:

The table below describes the Company's subsidiaries and associates, which it does not consolidate or account for by the equity method, but in which it holds an interest.

Entity	Nature and purpose	Interest held by the Company
BasicGov Systems, Inc.	Software and services	Investment in common shares and convertible and other notes
One45 Software Inc.	Software and services	Investment in common shares

The table below sets out interests held by the Company in unconsolidated subsidiaries and associates. The maximum exposure to loss is the carrying amount of the financial assets held.

Name of		Principal place	Country of	Ownership	Voting
Entity	Relationship	of business	incorporation	interest	rights
BasicGov Systems, Inc.	Subsidiary	Canada	Canada	79%	46%
One45 Software Inc.	Subsidiary	Canada	Canada	81%	81%

The ownership interest in BasicGov Systems, Inc. represents direct and indirect holdings. During the nine months ended September 30, 2019 and 2018, the Company did not provide financial support to subsidiaries and has no intention of provide financial or other support. Furthermore, the subsidiaries in the table above are not subject to any restrictions.
