MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Results of Operations

The net assets of the Pender Global Focused Fund (the "Fund") were \$14,959,696 as at June 30, 2022 versus \$26,240,200 as at December 31, 2021. Of this \$11,280,504 decrease, \$3,161,494 is attributable to net unitholder redemptions of Fund units and \$8,119,010 is attributable to negative investment performance.

For the six months ended June 30, 2022 (the "period"), Class A units of the Fund generated a total return of -33.2%. Returns for Class A (USD), Class F (USD) and Class N (USD) will differ primarily due to foreign currency as these classes are denominated in U.S. dollars whereas all remaining classes are denominated in Canadian dollars. Returns for all other classes of the Fund will be similar to Class A with any difference in performance being primarily due to the different management fees that are applicable to different classes. Please see the "Past Performance" section for the performance of the Fund's other classes.

The Fund's broad-based benchmark, the S&P 500 Index in Canadian dollars ("S&P 500"), returned -18.6% during the period. In accordance with National Instrument 81-106, we have included a comparison to this broad-based index to help you understand the Fund's performance relative to the general performance of the market, but we caution that the Fund's mandate may be significantly different from the index. The Fund's mandate is "all cap" which allows for inclusion of securities outside the large cap-oriented S&P 500. Most of the Fund's holdings at this time are not S&P 500 member companies. We believe better value and superior long-term opportunities can be found among the smaller than mega-cap companies in today's market environment. Further, the Fund's returns are reported net of all management fees and expenses for all classes, unlike the returns of the Fund's benchmark, which are based on the performance of an index that does not pay fees or incur expenses.

The following comments and the comments under "Recent Developments" reflect the views of the portfolio management team and are based on information as at the end of the period. Please read the caution regarding forward-looking statements located on the last page of this document.

The Fund's underperformance as compared to its benchmark was a result of stock selection in the Diversified financials and Information technology sectors. We do not actively manage sector weightings in the Fund, rather, our sector weightings are determined by individual stock selection through a bottom-up fundamental investment process. We seek to own stocks where our estimated range for the long-term intrinsic value of the business is higher than the current share price.

Key positive individual contributors to the Fund's performance for the period included Discovery Communications, Inc., Texas Pacific Land Corporation and Baidu, Inc. Conversely, Coinbase Global, Inc., Stitch Fix, Inc., and Warner Bros, Discovery, Inc. had the largest adverse impact.

Portfolio transactions during the period were made based on our stock selection process. In general, we increased weightings of individual stocks where we determined the price relative to our estimate of intrinsic value had increased and decreased the weightings of companies that offered a less attractive return profile. We are constantly looking for new investment ideas and a new investment during the period included Semler Scientific, Inc. We may liquidate our positions for various reasons, such as when share prices have reached our assessment of fair value, when an acquisition has occurred, or where we have changed our investment thesis. For example, during the period, we sold Colfax Corp. and Howard Hughes Corp.

As at the end of the period, the Fund was 98.1% invested in US-listed securities, 1.6% in foreign securities, and the Fund's cash position had increased to 0.3%, up from 0.2% as at December 31, 2021. The Fund's investment portfolio is concentrated and not diversified in the conventional sense. The Fund's top 10 holdings account for 76.0% of the Fund's net assets at the end of the period. This concentration may lead to varied results over any given period.

The overall sector exposure of the Fund is determined by stock selection decisions and may shift from time to time. As at June 30, 2022 we were weighted toward holdings in Diversified financials, Consumer discretionary, and Communication services sectors because, currently, those are the sectors where we believe we are finding the best investment opportunities and, equally important, because they contain businesses for which we are best equipped to assess value. These top three sectors accounted for 75.7% of the Fund at the end of the period.

Recent Developments

The first six months of 2022 were challenging for stock market performance. Easy monetary policies from 2021 were replaced with tighter financial conditions as central banks raised interest rates in response to high and rising inflation. Macro events sapped investor confidence as the conflict between Russia and Ukraine broke out and the ongoing COVID-19 pandemic continued. With these events as a backdrop, economic growth has slowed and fears of a recession on the horizon caused sentiment to deteriorate rapidly. This has been a challenging period for stock markets, with technology companies in particular hit hard as multiples have compressed. In the United States, the S&P 500 index (in Canadian dollars) finished the period with a total return of -18.6%.

Pender Global Focused Fund

Six months ended June 30, 2022

Stock markets pulled back in the first six months of 2022 and we believe this volatility may continue. We cannot control stock prices or volatility. However, we can and do control our investment process. We believe it is essential to have a long-term perspective and stick to our investment process and philosophy in times of uncertainty. The world is going through many changes – some changes are temporary and some changes are permanent. We continue to try to identify trends that are in sync with how the world is changing and to allocate more of our capital to growing companies that have tailwinds and that we believe are still mispriced by the market. We are constantly reassessing our existing holdings as new facts come in, adding to those that we believe are high quality business models and offer attractive long-term value at compelling prices. We believe these companies will do well in a challenging economic environment, while we are trimming some select positions that have held up well or where more attractive opportunities in high quality compounders have been uncovered.

The Fund's "all cap" mandate allows us to focus on holdings in any area of the market where we believe we can find the best value. We believe many of the Fund's holdings have strong underlying economics and medium-term growth prospects. We are positioning the Fund to be opportunistic and take advantage of a variety of new opportunities as they emerge. This includes a focus on finding growth companies with positive or secular tailwinds that we believe are mispriced relative to their long term prospects.

Investment results may be affected by future developments and new information that may emerge regarding geopolitical events; COVID-19, its variants and the pandemic; inflation and the impact of central bank measures, and other global events, factors that are beyond the Fund's control.

Related Party Transactions

The Fund pays management and administration fees to the Manager for management and portfolio advisory services (see "Management Fees").

As at the end of the period, parties related to the Manager collectively held 12% of the Fund's units. In addition, the Pender Partners Fund, a fund also managed by the Manager, collectively held 18% of the Fund's outstanding units.

Management Fees

The Fund pays management and administration fees calculated as a percentage of the net asset value of each respective class. The Management Expense Ratio ("MER") before applicable taxes such as GST or HST for each class does not exceed certain levels as set out in the Fund's offering documents. The fees are calculated at the close of business on each valuation day and are paid monthly. In exchange for the administration fee, the Manager pays the operating costs of the Fund.

Management fees are used by the Manager, in part, to pay sales commissions, trailer fees, marketing costs and other associated distribution costs relating to the sale of units of the Fund.

Such expenses represented approximately 24% of the management fees paid by the Fund to the Manager for the period.

(a) This information is derived from the Fund's unaudited semi-annual financial statements as at June 30 and audited annual financial statements as at December 31 for the period stated, prepared under International Financial Reporting Standards.

(b) Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the period and is expressed as an annualized percentage of average net asset value during the period. The MER may vary from one class of units to another because of differences in the applicable management fees and certain fees and expenses may have been absorbed by the Manager which would otherwise be reflected in the Fund.

(c) The Manager of the Fund has agreed to absorb sufficient expenses of the Fund, as necessary, such that the annual MER before applicable taxes such as GST or HST will not exceed certain limits as outlined in the Fund's Simplified Prospectus. The amount of expenses absorbed is at the discretion of the Manager as set out in the Fund's Simplified Prospectus, and the Manager may in its sole discretion cease to absorb expenses.

(d) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average net asset value during the period.

(e) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. In general, the higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Past Performance

The following charts show the past performance for the units of each class of the Fund and do not necessarily indicate how the Fund will perform in the future. The information shown assumes that any distributions made by the Fund were reinvested in additional units of the Fund. Returns would be different if an investor did not reinvest distributions. In addition, the information does not take into account sales, redemptions, income taxes payable or other charges that would have reduced returns or performance.

Period-by-Period Returns

To illustrate how the Fund's performance has varied over time, the following bar charts show the Fund's performance for the six-month period ended June 30, 2022 and for each of the previous 12-month periods ended December 31. The information is presented starting from the first full financial year of the respective Fund class. In percentage terms, the bar charts show how much an investment held on the first day of the period would have increased or decreased by the last day of the period.

Summary of Investment Portfolio

The largest holdings of the Fund as at the end of the period and the major asset classes in which the Fund was invested are indicated below. Where the Fund has less than 25 holdings, the table will show the Fund's entire investment portfolio. The investment portfolio may change due to ongoing portfolio transactions. An update of the Fund's summary of investment portfolio as at the end of each calendar quarter is available from the Manager. Please see the front page of this document for information about how this can be obtained.

Caution Regarding Forward-Looking Statements

This report contains forward-looking statements about the Fund, including its strategy, prospects and further actions. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates”, or negative versions thereof and similar expressions.

In addition, any statement made concerning future performance, strategies or prospects, and possible future Fund action is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to risks, uncertainties and assumptions about the Fund and economic factors, among other things.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements. Any number of important factors could contribute to these digressions, including, but not limited to: geopolitical events, general economic, political and market factors in North America and internationally; interest and foreign exchange rates and the measures taken by central banks to manage inflation; global equity and capital markets; business competition; technological change; changes in government regulations; unexpected judicial or regulatory proceedings; pandemics and catastrophic events.

We stress that the above-mentioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, except as may be required under applicable law, the Manager has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.
