# PART A – GENERAL DISCLOSURE

## INTRODUCTION

This document contains selected important information to help you make an informed investment decision and to help you understand your rights as an investor. Throughout this document:

- *We, us, the Manager, or Pender* refers to PenderFund Capital Management Ltd., the Manager of the Funds.
- *Funds* or *Pender Funds* refers to all of the mutual funds listed on the front cover of this document, which mutual funds are alternative mutual funds as described in this document, and *Fund* refers to any one of those Funds or a specific Fund, as the context requires.
- *You* refers to you, as an investor in one or more of the Funds.
- *Dealer* refers to both the dealer and the representative registered in your jurisdiction who advises you on your investment.
- *Unitholders* refers to the holders of a class of units of a Fund.

**Information contained in this document as it relates to and in respect of Pender Alternative Multi-Strategy Income Fund and Pender Alternative Special Situations Fund applies effective as of [REDACTED], 2022 (the “Conversion Date”), being the date on which such Funds converted from conventional mutual funds to alternative mutual funds. For further details on the conversion of these Funds, see the management information circulars dated June 23, 2022, which are available on the SEDAR profiles of such Funds at [www.sedar.com](http://www.sedar.com).**

Unless otherwise noted, all currency amounts in this Simplified Prospectus are stated in Canadian dollars.

This document contains information about the Funds and the risks of investing in mutual funds generally, as well as the name of the firm responsible for management of the Funds.

This document is divided into two parts. *Part A – General Disclosure* contains general information applicable to all of the Funds. *Part B – Specific Information About the Mutual Funds Described in this Document* contains specific information about each of the Funds described in this document.

Additional information about the Funds is available in the following documents (as and when filed):

- the opening statement of financial position for the Pender Alternative Arbitrage Plus Fund
- the most recently filed fund facts document for each class of the Funds;
- the most recently filed annual financial statements of the Funds;
- any interim financial statements filed after the annual financial statements of the Funds referred to above;
- the most recently filed annual management report of fund performance of the Funds; and
- any interim management report of fund performance of the Funds filed after the annual management report of fund performance referred to above.

These documents as and when filed are incorporated by reference into this document, which means that legally they form part of this document just as if printed as part of this document.

You may obtain a copy of these documents as and when filed, at your request, and at no cost, by calling toll-free at **1-866-377-4743** or by sending us an e-mail at **info@penderfund.com**, or from your Dealer.

These documents, as and when filed, and other information about the Funds are available on our website at **www.penderfund.com** or on the SEDAR website at [www.sedar.com](http://www.sedar.com).

## RESPONSIBILITY FOR MUTUAL FUND ADMINISTRATION

### Manager

PenderFund Capital Management Ltd. is the manager of the Funds. The Manager's address is 1830 – 1066 West Hastings St., Vancouver, BC V6E 3X2. Additional information about the Manager and the Funds can be obtained from the Manager's website at **www.penderfund.com** or by contacting the Manager at **1-866-377-4743** or **info@penderfund.com**.

The Manager is responsible for the overall business and operations of the Funds. The Manager engages arm's length third parties to perform certain services on behalf of the Funds as outlined in the table below. Under the Trust Agreement of the Funds, the Manager is responsible for the management and administration of the Funds. The Manager furnishes or arranges for the furnishing of the office space and facilities, computer equipment and software, clerical help, bookkeeping and internal accounting services required by the Funds. Registry and transfer agency services and all Unitholder servicing requirements are also arranged by the Manager.

The Manager was incorporated under the Company Act (British Columbia) (replaced by the Business Corporations Act (British Columbia)) on November 18, 2002 under the name 658761 B.C. Ltd. The Manager changed its name to PenderFund Capital Management Ltd. in April 2003.

### Officers and Directors of the Manager

The name, municipality of residence, and the respective current positions and offices held with the Manager of all partners, directors and executive officers of the manager of the Funds, as at the date of this Simplified Prospectus are set out below:

<b>Name and Municipality of Residence</b>	<b>Position and Office with Manager</b>
KELLY EDMISON, LLB Vancouver, BC	Director, Chairman of the Board of Directors
DAVID BARR, CFA North Vancouver, BC	Chief Executive Officer, Director, Ultimate Designated Person
FELIX NARHI, CFA North Vancouver, BC	Chief Investment Officer, Director
GINA JONES, CPA, CA, CF, ICD.D Vancouver, BC	Chief Financial Officer, Chief Compliance Officer, Corporate Secretary

<b>Name and Municipality of Residence</b>	<b>Position and Office with Manager</b>
CARLO DESIERTO Vancouver, BC	President
DONALD CAMPBELL, LLB Winnipeg, MB	Director

## Terms of Management Agreement

Under the management agreement dated April 14, 2009, as amended from time to time and most recently amended [xx], 2022 between the Manager and the Funds (the "Management Agreement"), Pender is appointed as the Manager of the Funds. As Manager, Pender is responsible for directing the affairs and managing the business of the Funds, administering or arranging for the administration of the day-to-day operations of the Funds, including investment decisions, execution of investment orders, sales of units, maintaining records, fund reporting, voting of portfolio securities and custodial arrangements. The Management Agreement also sets forth the fees payable to the Manager as described in this Simplified Prospectus.

The Manager's appointment continues indefinitely but may be terminated by us or the Funds upon giving 60 days' prior notice or such shorter notice as the Manager and the Funds may agree. The Management Agreement may also be terminated by either the Funds or the Manager upon giving notice in writing to the other party if the other party ceases to carry on business, becomes bankrupt or insolvent, or resolves to wind-up or liquidate or if a receiver of any of its assets is appointed or if the other party commits a material breach of the Management Agreement and such breach is not remedied within 30 days of receipt of notice of such breach.

## Fund of Funds

Certain Funds may invest in units of other mutual funds which may or may not be managed by us or our affiliates, (referred to individually as an "Underlying Fund", and collectively as "Underlying Funds"). Unitholders of the Funds have no voting rights or ownership in the units of any Underlying Fund. If there is a unitholder meeting with respect to an Underlying Fund, we will not vote the proxies in connection with the Fund's holdings of the Underlying Fund. Under certain circumstances, we may arrange to send proxies to unitholders of the Fund so that they can direct the vote on the matters being presented.

## Portfolio Advisor

The Manager is also the portfolio advisor of the Funds. The following table sets forth information in respect of the persons employed by the Manager who are principally responsible for day-to-day management of the Funds.

<b>Name</b>	<b>Position</b>
DAVID BARR, CFA North Vancouver, BC	Chief Executive Officer, Director, Ultimate Designated Person, Portfolio Manager
JUSTIN JACOBSEN, CFA West Vancouver, BC	Portfolio Manager
AMAR PANDYA, CFA Vancouver, BC	Portfolio Manager

These individuals are tasked with responsibilities including making investment decisions, executing investment orders, assisting with sales efforts, record keeping in respect of portfolio transactions and voting of portfolio securities, in accordance with the investment objectives and strategies of each Fund.

The individuals listed in the table above provide investment analysis, make decisions relating to the investment of each Fund's assets and supervise each Fund's investment portfolios on a continuous basis. They have complete discretion to purchase and sell securities for a Fund's portfolio within the Fund's investment objectives, policies and restrictions without oversight, approval or ratification of a committee except that, in the case of matters giving rise to a conflict of interest involving the Fund and the Manager, the Independent Review Committee of the Fund will have oversight. See "*Independent Review Committee*". The portfolio advisor has in place its own investment procedures and controls governing its investment activities, including the use of derivatives. Pender is currently the portfolio advisor of each Fund.

## **Brokerage Arrangements**

The portfolio advisor of each Fund also makes decisions regarding the execution of portfolio transactions with respect to the cash and cash equivalent portions of the Funds, including, when applicable, the selection of markets and brokers and the negotiation of commissions. If and when effecting such portfolio transactions, the portfolio advisors place brokerage business with investment dealers and brokers on the basis of the best price and service. To the extent that the execution offered by more than one dealer or broker is comparable, the portfolio advisor may, in its discretion, determine to effect transactions with the dealers and brokers who provide research, statistical and other similar services to the Fund or to the portfolio advisor at transaction prices that reflect those services.

None of the Funds have agreements or arrangements in place with any dealer for the portfolio transactions regarding the Funds; however, the portfolio advisor for the Funds may, from time to time, receive research that may or may not be used in connection with the management of the Funds. This research is not a factor used in determining the dealers through whom the portfolio advisor will place portfolio transactions for the Funds. The portfolio advisor for the Funds reviews trades for the Funds to determine, among other things, whether the Funds received reasonable benefit considering the applicable research, if any is received, and the amount of brokerage commissions paid.

## **Directors, Executive Officers and Trustees**

The Funds do not have directors or officers. Pender, the manager and portfolio advisor of the Funds, is also the Trustee of the Funds. The Funds are governed by the Trust Agreement, which sets forth the terms governing the creation, operation, management and administration of the Funds, including the powers and duties of the Trustee, the attributes of the units of the Funds, procedures for purchase, exchange and redemption of units, recordkeeping, calculation of the Funds' income and other administrative procedures. The Trustee may be removed by the Manager at any time by giving notice to the Trustee not less than 45 days prior to the date that such removal is to take effect. The Trustee may resign by giving notice to the Manager not less than 45 days prior to the date that such resignation is to take effect. The Manager must appoint a new trustee to take office when the removal or resignation becomes effective, failing which a Fund will terminate.

## **Promoter**

Pender is the promoter of the Funds.

## **Custodian**

The custodian of the assets of Pender Alternative Multi-Strategy Income Fund is CIBC Mellon Trust Company of 1 York Street, Suite 900, Toronto, ON M5H 0B6 and the custodian of the assets of the other Funds is The Bank of Nova Scotia of 44 King Street West, Toronto, ON M5H 1H1. The applicable custodian holds the cash and securities of the respective Funds. The custodian shall not be responsible for holding or control of any assets of the Funds that are not directly held by the custodian or its appointed sub-custodians, including any assets loaned or pledged to a counterparty. The custodians are independent of the Manager.

## **Auditor**

The auditor of the Funds is KPMG LLP of 777 Dunsmuir St., P.O. Box 10426, Vancouver, BC V7Y 1K3. KPMG LLP is independent within the meaning of the Rules of Professional Conduct of the Institute of Chartered Professional Accountants of British Columbia.

Under applicable securities laws, the auditor of the Funds may be changed without the approval of Unitholders provided that the Independent Review Committee of the Funds has approved the proposed change and we provide you with at least 60 days' notice of the proposed change.

## **Registrar**

The registrar of the Funds is CIBC Mellon Trust Company of 1 York Street, Suite 900, Toronto, ON M5H 0B6, an entity that is independent of the Manager. The registrar keeps a record of the owners of units of each Fund, processes orders and issues account statements to investors.

## **Prime Broker**

The Bank of Nova Scotia of 44 King Street West, Toronto, ON M5H 1H1, is the prime broker of the Funds. Pursuant to the terms of the prime brokerage services agreement dated July [XX], 2022 (the "Prime Brokerage Agreement"), The Bank of Nova Scotia provides prime brokerage services to the Funds, including trade execution, margin financing, clearing, settlement, stock borrowing, options, cash sweeps into accounts and foreign exchange facilities, under the terms of a Prime Broker Agreement. The Funds may also utilize other brokers and dealers for the purpose of executing transactions for the Funds.

## **Securities Lending Agent**

The Funds do not have a securities lending agent or engage directly in securities lending.

## **Independent Review Committee and Fund Governance**

### **Independent Review Committee**

In accordance with *National Instrument 81-107 Independent Review Committee for Investment Funds* ("NI 81-107"), the Manager, on behalf of the Funds, has established an Independent Review Committee to provide impartial judgment on conflicts of interest between the Manager and the mutual funds managed by the Manager, including but not limited to the Funds. The Independent Review Committee is responsible for overseeing the Manager's decisions in any situation where it is faced with any actual or perceived conflict of interest, including "business" or "operational" conflicts.

The Independent Review Committee will prepare, at least annually, a report of its activities for Unitholders which will be available on our website at [www.penderfund.com](http://www.penderfund.com) or, at the Unitholder's request, and at no cost to the Unitholder, by calling toll-free at 1-866-377-4743 or by email at [info@penderfund.com](mailto:info@penderfund.com). Currently, the Independent Review Committee is comprised of Kerry Ho (Chair), John Webster, Robin Mahood and Leslie Wood. Each member of the Independent Review Committee receives an annual retainer plus a fixed fee and expenses for each meeting of the Independent Review Committee that the member attends. For the year ended December 31, 2021, the Chair of the Independent Review Committee was paid a total of \$19,500. In addition, Mr. Webster and Mr. Mahood were each paid \$13,000, and none of the members received any expense reimbursements. These compensation amounts are in respect of all mutual funds managed by the Manager and not just the Funds. Ms. Leslie Wood was appointed on March 9, 2022, and therefore did not receive any compensation. Ms. Wood was appointed as part of normal IRC succession planning.

NI 81-107 requires the Manager to have policies and procedures relating to conflicts of interest. The Manager has established written policies and procedures for the Manager to follow in making decisions involving an actual or

perceived conflict of interest and will refer such matters to the Independent Review Committee for review in accordance with NI 81-107.

## **Fund Governance**

### Code of Ethics

The Manager has responsibility for governance of the Fund. The Manager has also adopted a Code of Ethics which is substantially the same as the CFA Institute Code of Ethics and Standards of Professional Conduct. To support the Conflicts of Interest provision in the Code of Ethics, the Manager has implemented a personal trading code to ensure proper disclosure and handling of conflicts arising from employee personal trading.

### Risk Management

Various measures to assess risk are used, including mark-to-market security valuation, fair value accounting, reconciliations of security and reconciliations of cash positions. Compliance monitoring of the Funds' portfolios is ongoing. Each Fund is priced on a daily which ensures that performance accurately reflects market movements.

## **Affiliated Entities**

Arbutus Family Holdings Ltd., which is 100% owned by Kelly Edmison, is a company that provides consulting services to the Manager. Arbutus Holdings Ltd. also owns beneficially, directly or indirectly, more than 10% of the voting rights attached to the common shares of the Manager.

## **Policies and Practices**

### Policies and Procedures Related to Derivatives Trading

Each Fund may use derivatives, directly or indirectly, depending on its investment strategies. Even if a Fund does not directly engage in derivatives, it may, as part of its investment strategy, invest in units of mutual funds that may engage in derivatives as part of their strategies. Derivatives will be used in compliance with all applicable securities legislation and regulation and as disclosed in this Simplified Prospectus.

Oversight of derivatives trading is undertaken by the Manager. The written policies and procedures relating to the use of these derivatives are developed with the custodian of the Funds and are reviewed annually by the Manager.

Derivatives transactions on behalf of the Funds may be initiated only by the portfolio advisor responsible for the Funds' investments. The portfolio advisor ensures that the individuals who make decisions with respect to derivatives transactions have the necessary proficiency and experience to use derivatives. As in the case of other portfolio transactions, all derivatives transactions made on behalf of the Funds must be recorded on a timely basis and promptly reflected in the Funds' portfolio management records. Derivative positions are monitored to ensure compliance with all regulatory requirements, including cash cover requirements.

### Policies and Procedures Related to Short Selling Risk Management

The Funds may engage in short selling as part of their investment strategies. Even if they do not directly engage in short selling, they may as part of their investment strategy, invest in units of mutual funds that may engage in short selling as part of their strategies. The Funds will engage in short selling in compliance with all applicable securities legislation and regulations and as disclosed in this Simplified Prospectus.

Short selling involves borrowing securities from a lender that are then sold in the open market (or "sold short"). At a later date, the same number of securities are repurchased by the Funds and returned to the lender. In the interim, the proceeds from the first sale are deposited with the lender and the Funds pay interest to the lender. If

the value of the securities declines between the time that the Funds borrow the securities and the time the Funds repurchase and return the securities, the Funds make a profit for the difference (less any interest the Funds are required to pay to the lender). In this way, the Funds have more opportunities for gains when markets are generally volatile or declining.

The Funds will engage in short selling only within certain controls and limitations. Securities will be sold short only for cash and the Funds will receive the cash proceeds within normal trading settlement periods for the market in which the short sale is made. All short sales will be effected only through market facilities through which those securities are normally bought and sold.

The Funds may short sell equity securities, index participation units, corporate debentures, corporate bonds, government bonds and other fixed and floating-rate income securities that are traded in a liquid market. If the security sold short is an equity security, the security must be listed for trading on a stock exchange and the issuer of the security must have a market capitalization of not less than \$100 million at the time the short sale is made.

At the time securities of a particular issuer are sold short by a Fund, the aggregate market value of all securities of that issuer sold short will not exceed 10% of the net assets of the Fund. The aggregate market value of all securities sold short by a Fund may not exceed 50% of the Fund's net assets, unless an exemptive order has been provided. See "*Fund Details*" of each Fund below for more information.

The Funds may deposit assets with lenders in accordance with industry practice in relation to their obligations arising under short sale transactions.

Where a short sale is effected in Canada, every dealer that holds the Funds' assets as security in connection with a short sale must be a registered dealer and a member of a self-regulatory organization that is a participating member of the Canadian Investor Protection Fund. Where a short sale is effected outside of Canada, every dealer that holds the Funds' assets as security in connection with a short sale must be a member of a stock exchange (and, as a result, be subject to regulatory audits) and have a net worth in excess of the equivalent of \$50 million determined from its most recent audited financial statements. The aggregate assets deposited by the Funds with any single dealer as security in connection with short sales will not exceed 25% of each Fund's total net assets, taken at market value as at the time of the deposit.

The portfolio advisor of each Fund must maintain appropriate internal controls regarding its short sales, including written policies and procedures, risk management controls and proper books and records. Any short sale by the Funds is subject to compliance with the investment objectives of each Fund. The portfolio advisor will review open short positions not less than once every week. The Manager is responsible for setting and reviewing such policies and procedures annually. The Trustee has delegated responsibility for setting and reviewing such procedures to the Manager and is not involved in the risk management process.

#### Policies Related to Proxy Voting

The Manager has established a proxy voting policy and guidelines (the "Guidelines") that have been designed to provide general guidance, in compliance with the applicable legislation, for the voting of proxies and for the creation of the portfolio advisor's own proxy voting policies for each Fund. The Guidelines set out the voting procedures to be followed in voting routine and non-routine matters, together with general guidelines suggesting a process to be followed in determining how and whether to vote proxies. Although the Guidelines allow for the creation of a standing policy for voting on certain routine matters, each routine and non-routine matter must be assessed on a case-by-case basis to determine whether the applicable standing policy or general Guidelines should be followed. The Guidelines also address situations in which the portfolio advisor may not be able to vote, or where the costs of voting outweigh the benefits.

When a vote of a portfolio company's securities presents a conflict between the interests of the securityholders of the portfolio company and those of: (i) the Manager, (ii) the Fund's portfolio advisor, or (iii) any affiliate or associate of the foregoing or the Fund, then the Manager will refer the matter to the Independent Review Committee of the Fund.

From time to time, apparent conflicts of interest may arise with respect to the exercise of the Fund's voting rights in a portfolio company. These conflicts may include where the Manager or a representative of the Manager has another relationship with the portfolio company in addition to the Fund's interest in the portfolio company. In such circumstances, if the Manager is in a conflict position, the Manager will refer the matter to the Independent Review Committee of the Fund. If a representative of the Manager (but not the Manager itself) is in a conflict position, such individual will be excluded from the Manager's consideration of the exercise of the Fund's voting rights in the portfolio company. Representatives of the Manager (including its portfolio advisors) must only exercise the Fund's voting rights in a portfolio company uninfluenced by considerations other than the best interests of the Fund.

Pender has developed its own respective voting guidelines and keeps adequate records of all matters voted or not voted, in accordance with applicable regulations. A copy of the Guidelines is available upon request, at no cost, by calling the Manager toll-free at 1-866-377-4743 or by writing to Pender at 1830 – 1066 West Hastings Street, Vancouver, BC V6E 3X2.

### Proxy Voting Record

Each Fund will prepare a proxy voting record on an annual basis for the period ending on June 30<sup>th</sup> of each year that will be available free of charge to any Unitholder upon request at any time after August 31<sup>st</sup> of that year. The proxy voting record will be available on [www.penderfund.com](http://www.penderfund.com) no later than August 31<sup>st</sup> of each year.

### Policies and Procedures Related to Net Asset Value Errors

We have policies and procedures in place with respect to correcting any material errors in the calculation of each Fund's net asset value ("NAV"), or any errors in the processing of related transactions. Such policies and procedures were developed with consideration given to industry standards. Generally, material errors are considered errors of 0.50% or greater of a Fund's NAV. A unitholder will typically receive compensation only for material errors where the unitholder's loss is \$25 or more. If a single error is protracted over a number of successive days, these thresholders will be considered for each day and not accumulated.

## **Remuneration of Directors, Officers and Trustees**

The Funds do not have directors or officers. The Funds pay fees to members of the IRC. Refer to *Independent Review Committee* for remuneration information. The Funds' Trustee is not entitled to any remuneration in its capacity as trustee of the Funds.

## **Material Contracts**

Set out below are particulars of the material contracts entered into by the Funds as of the date of this Simplified Prospectus.

1. The Nineteenth (19<sup>th</sup>) Amended and Restated Trust Agreement dated **August [XX], 2022** between the Manager and the Trustee with respect to the governance of the Funds. See "*Formation and History of the Funds*" and "*Responsibility for Mutual Fund Administration*" for a description of the Trust Agreement.
2. The Management Agreement dated April 14, 2009, as amended from time to time and most recently amended on **August [XX], 2022** between the Manager and the Funds, pursuant to which Pender agreed to act as the Manager of the Funds. See "*Responsibility for Mutual Fund Administration*" for a description of the Manager's responsibility.
3. The Custodial Services Agreement dated **July 28, 2021, as amended from time to time and most recently amended on July 26, 2022**, between the Manager and The Bank of Nova Scotia, pursuant to which The Bank of Nova Scotia was appointed custodian of the assets of the Funds, except Pender Alternative Multi-Strategy Income Fund. See "*Responsibility for Mutual Fund Administration*" for a description of the custodian's duties and responsibilities.

4. The Prime Brokerage Agreement dated [XX], 2022 between the Manager and the Bank of Nova Scotia pursuant to which The Bank of Nova Scotia has agreed to provide prime brokerage services to the Funds, including trade execution, margin financing, clearing, settlement, stock borrowing, options, cash sweeps into accounts and foreign exchange facilities. See “*Responsibility for Mutual Fund Administration*” for a description of The Bank of Nova Scotia’s responsibility as the Funds’ prime broker and the Prime Brokerage Agreement.
5. The Custodial Services Agreement dated April 14, 2009, as amended from time to time and most recently amended on [XX], 2022 among the Manager, CIBC Mellon Global Securities Services Company, CIBC Mellon Trust Company and Canadian Imperial Bank of Commerce, pursuant to which CIBC Mellon Trust Company was appointed custodian of the assets of Pender Alternative Multi-Strategy Income Fund, and other mutual funds managed by the Manger. See “*Responsibility for Mutual Fund Administration*” for a description of the custodian’s duties and responsibilities.

Copies of material contracts may be inspected at the head office of the Manager during ordinary business hours.

## **Legal Proceedings**

The Manager is not aware of any material legal proceedings outstanding or known to be contemplated to which any of the Funds or the Manager is a party.

Neither Pender nor any of its directors or officers, in the 10 years before the date of this Simplified Prospectus, has been subject to any penalties or sanctions imposed by a court or securities regulator relating to trading in securities, promotion or management of a publicly-traded mutual fund, theft or fraud, or has been subject to any other penalties or sanctions imposed by a court or regulatory body that would be likely to be considered important to a reasonable investor in determining whether to purchase securities of any Fund, or entered into a settlement agreement with a court, securities regulatory or other regulatory body, in relation to any of the foregoing matters.

## **Designated Website**

A mutual fund is required to post certain regulatory disclosure documents on a designated website. The designated website of the Funds can be found at [www.penderfund.com](http://www.penderfund.com).

## **CALCULATION OF NET ASSET VALUE**

As described in this Simplified Prospectus under the heading “*Purchases, Switches and Redemptions*”, units of a Fund may be purchased or redeemed at the price per unit of that unit class as next determined after the receipt of a purchase order or a redemption order as the case may be.

The price per unit of the Funds will be the net asset value per unit of that class of units. The net asset value per unit of each class of unit of each Fund is determined on a daily basis.

The Funds are valued only on a day that the Toronto Stock Exchange (the “TSX”) is open for trading or such other time as the Manager determines appropriate (a “Valuation Date”).

## **VALUATION OF PORTFOLIO SECURITIES**

The Manager shall determine and calculate or cause to be determined and calculated the net asset value of a Fund after 4:00 p.m. (Eastern Time) on a particular Valuation Date on behalf of the Fund in accordance with the following principles:

- (a) the value of any cash on hand, on deposit or on call, prepaid expenses, cash dividends declared and interest accrued and not yet received, shall be deemed to be the face amount thereof, unless the Manager determines that any such deposit or call loan is not worth the face amount thereof, in which event the value thereof shall be deemed to be such value as the Manager determines to be

- the reasonable value thereof;
- (b) the value of any bonds, debentures, and other debt obligations shall be valued by taking the average of the bid and ask prices on a Valuation Date at such times as the Manager, in its discretion, deems appropriate. Short-term investments including notes and money market instruments shall be held at amortized cost, which approximates fair value;
  - (c) the value of any security, index futures or index options thereon which is listed on any recognized exchange shall be determined by the last traded price on the Valuation Date or, if the last traded price is not available, the average between the closing bid and asked quotations on the Valuation Date, all as reported by any report in common use or authorized as official by a recognized stock exchange; provided that if such stock exchange is not open for trading on that date, then the value shall be determined by reference to the last previous date on which such stock exchange was open for trading;
  - (d) the value of any Underlying Funds will be valued at their respective net asset values on each Valuation Date. The Underlying Funds calculate their respective net asset values on the same basis as the Funds;
  - (e) the value of any security or other asset for which a market quotation is not readily available shall be its fair market value as determined by the Manager using a valuation technique that requires the use of inputs and assumptions based on observable market data;
  - (f) the value of any security, as permitted under International Financial Reporting Standards (“IFRS”), for which the resale of which is restricted or limited, shall be the lesser of the value thereof based on reported quotations in common use and that percentage of the market value of securities of the same class, the trading of which is not restricted or limited by reason of any representation, undertaking or agreement or by law, equal to the percentage that a Fund’s acquisition cost was of the market value of such securities at the time of acquisition; provided that a gradual taking into account of the actual value of the securities may be made where the date on which the restriction will be lifted is known;
  - (g) purchased or written clearing corporation options, options on futures, over-the-counter options, debt-like securities and listed warrants shall be valued at the current market value thereof;
  - (h) where a covered clearing corporation option, option on futures or over-the-counter option is written, the premium received by a Fund shall be reflected as a deferred credit which shall be valued at an amount equal to the current market value of the clearing corporation option, option on futures or over-the-counter option that would have the effect of closing the position. Any difference resulting from revaluation of such options shall be treated as an unrealized gain or loss on investment. The deferred credit shall be deducted in arriving at the net asset value of a Fund. The securities, if any, that are the subject of a written clearing corporation option, option on futures or over-the-counter option shall be valued at their then current market value;
  - (i) the value of a futures contract or a forward contract, shall be the gain or loss with respect thereto that would be realized if, on the Valuation Date, the position in the futures contract or the forward contract, as the case may be, were to be closed out, unless daily limits are in effect, in which case fair value shall be based on the current market value of the underlying interest;
  - (j) margin paid or deposited in respect of futures contracts and forward contracts shall be reflected as an account receivable and margin consisting of assets other than cash shall be noted as held as margin;
  - (k) all property of a Fund valued in a foreign currency and all liabilities and obligations of a Fund payable in a foreign currency shall be converted into Canadian funds by applying the rate of

exchange obtained from the best available sources to the Manager, including, but not limited to, the Manager or any of its affiliates; and

- (l) all expenses or liabilities (including fees payable to the Manager) of a Fund shall be calculated on an accrual basis.

The value of any security or property to which, in the opinion of the Manager, the above principles cannot be applied (whether because no price or yield equivalent quotations are available as above provided, or for any other reason) shall be the fair value thereof determined in good faith in such manner as the Manager from time to time adopts. The value of assets and liabilities of the Funds established by the Manager in accordance with these rules shall be conclusive and binding on all Unitholders. Where the Manager is provided with a value, quotation, estimate or other information related to the value of any property of a Fund by a third party (collectively, "Third Party Data"), the Manager may rely on such Third Party Data and shall have no responsibility or liability, whatsoever, for any loss or damage arising out of or in connection with the Manager's reliance on such Third Party Data.

Pursuant to the Notice of Amendment to *National Instrument 81-106 Investment Fund Continuous Disclosure* ("NI 81-106"), investment funds calculate their net asset value using fair value (as defined therein) for the purposes of unitholder transactions. The Manager has established policies to determine the fair value of the securities held by the Funds in accordance with NI 81-106 and such policies have been approved by the board of directors of the Manager of the Funds.

The net asset value and net asset value per unit of each Fund is published by various media outlets on each Valuation Date. You can also obtain this information, at no cost to you, by contacting the Manager at **1-866-377-4743** or by email at **info@penderfund.com**. This information is also available on our website at **www.penderfund.com**.

## **PURCHASES, SWITCHES AND REDEMPTIONS**

### **Purchases**

You may only buy Class A, Class A (US\$), Class H, and Class H (US\$) units via the front-end load sales charge method. Class A (US\$) and Class H (US\$) units are denominated in US dollars.

Effective June 1, 2022, Class A, Class A (US\$), Class H and Class H (US\$) units are no longer available to investors who held these units in an account with an order entry only ("OEO") Dealer or any other Dealer that does not make a suitability determination. Investors having accounts with OEO Dealers or any other Dealer that does not make a suitability determination may purchase Class F, Class F (US\$), Class I or Class I (US\$) units. See "Dealer Compensation – Trailing Commissions" in this Simplified Prospectus.

There are no sales charges on the purchase or redemption of any other class of units.

Class F, Class F (US\$), Class I, and Class I (US\$) units may be purchased under this Simplified Prospectus only through an investment advisor who has obtained the consent of Pender to offer these classes. Class F (US\$) and Class I (US\$) units are denominated in US dollars.

Class E, Class N, and Class O units may be purchased under this Simplified Prospectus by qualified investors by contacting us.

Effective as of February 11, 2022 for Pender Alternative Arbitrage Fund and March 31, 2022 for Pender Alternative Absolute Return Fund, we discontinued the sale of Class AF and Class FF units, but continue to reserve the right to resume selling of these classes at any time.

Units of the Funds are distributed by authorized registered Dealers. You may purchase units by sending the purchase amount to your Dealer. The price of a unit of a Fund is the applicable net asset value per unit next determined after receipt by the Fund of an order to purchase. On the same day your order is received, your Dealer

will forward the order to the Fund's head office by telecommunications facility, courier, facsimile or priority post without cost to you. Certificates will not be issued for units purchased.

Where a Fund offers Class A (US\$), Class F (US\$), Class H (US\$), and Class I (US\$) units, they are substantially hedged against changes in the Canadian currency relative to the US currency. The remaining classes of the Funds are substantially hedged against changes in the US currency relative to the Canadian currency. In hedging, the Funds attempt to reduce the impact on the Fund's performance of fluctuations in the exchange rates between Canadian and US currencies. These classes will be substantially hedged using derivative instruments such as foreign currency forward contracts although there may be circumstances, from time to time, in which the Funds may not or may not be able to fully hedge its Canadian or US dollar exposure, as the case may be, in respect of these classes.

Your initial investment in any class of units other than Class E, Class H, Class H (US\$), Class I, Class I (US\$), Class N and Class O units of the Funds, must be at least \$5,000. After your initial investment, you can make further investments of at least \$100 per investment. With respect to Class H, Class H (US\$), Class I and Class I (US\$) units of the Funds, your initial investment must be at least \$100,000 and your subsequent purchases must be a minimum of \$100. With respect to Class N units for institutional investors and other qualified investors, your initial investment must be at least \$5,000,000 and your subsequent purchase must be a minimum of \$100. With respect to Class E and Class O units, minimum initial investment amounts are to be negotiated between the Unitholder and the Manager. We will determine, and from time to time may change, the minimum amounts for initial and subsequent investments in any class.

If we do not receive payment within two business days of processing your purchase order for units of a Fund, we must redeem your units on the next business day. If the proceeds are greater than the payment you owe, the Fund will keep the difference. If the proceeds are less than the payment you owe, we will pay the difference to the Fund on your behalf and collect this amount from your Dealer, who may collect the amount from you.

We may reject your purchase order within one business day of receiving it. Any monies sent with your order will be returned immediately without interest.

## **Changing Classes**

You may change between classes of units of the same Fund if you are eligible. A class change is called a "conversion". You may convert units of one class into units of another class of the same Fund. When you convert units between classes, the value of your investment will not change (except in respect of any fees you may pay to convert), but the number of units you hold may change. This is because each class of units may have a different unit price. When changing classes, a short-term trading fee may apply if the units are changed within 30 days from the date of purchase. See "*Fees and Expenses*" in this Simplified Prospectus, regarding short-term trading charges. Your Dealer may charge you a fee for doing a change. See "*Fees and Expenses*" in this Simplified Prospectus, regarding switch fees. In general, a conversion between classes in the same Fund is not considered a sale for tax purposes, so no capital gain or loss will result for tax purposes. However, any redemption of units to pay for a change fee charged by your Dealer will be considered a sale for tax purposes. For a further discussion of the tax consequences, see "*Income Tax Considerations*".

You may change units of a particular class into units of another class of the same Fund if you are an eligible investor for the class of units into which you are changing. See "*Description of Units Offered By The Funds*" in this Simplified Prospectus.

If you cease to be eligible to hold units of a particular class, we may change your units into a different class after giving you 30 days' prior notice, unless you notify us during the notice period and we agree that you are once again eligible to hold that class of units. Your Dealer may charge you a fee for changing classes.

## Switches

You can redeem all or a portion of your units of one Fund to buy units of another Pender Fund, as long as you meet the minimum initial investment requirement. This is called a switch. Depending on the class of units and the purchase option you are switching from and to, and the length of time you have owned the units, your switch may affect the fees you pay and the compensation your Dealer receives, including the following:

- A short-term trading fee may apply if the units are switched within 30 days from the date of purchase. See “*Fees and Expenses*” in this Simplified Prospectus regarding short-term trading charges.
- Your Dealer may charge you a fee for doing a switch. See “*Fees and Expenses*” in this Simplified Prospectus regarding switch fees.
- Depending on the Fund, class of unit and purchase option you switch between, your Dealer may be paid a higher or lower trailing commission. See “*Dealer Compensation*” in this Simplified Prospectus.

When we receive your order to switch, we will redeem your units in the original Fund and use the proceeds to buy units of the same class of another Pender Fund. There may be tax consequences for the sale or redemption of units for a switch. For a further discussion of the tax consequences, see “*Income Tax Considerations*”.

## Redemptions

You can redeem your units for cash at any time by providing us with a redemption order, subject to certain specific Fund redemption restrictions and suspensions of redemption rights described below. Your Dealer will forward your redemption order to us on the same day the Dealer receives it from you.

A Fund will redeem units for the redemption price, which is equal to the total of the net asset value per class as at the end of the Valuation Date that falls on or occurs immediately after the date on which a fully completed redemption request is received by the Fund (with any redemption request received after 4:00 p.m. ET on a Valuation Date being deemed, for such purpose, to be received on the following Valuation Date).

Redemptions of Class A (US\$), Class F (US\$), Class H (US\$), or Class I (US\$) units of the Funds, will be paid in US dollars. Redemptions of all remaining Fund classes will be paid in Canadian dollars.

For wire order redemptions requested via wire order, if we do not receive all the documentation we need from you to complete the redemption order within 10 business days, we must repurchase your units. If the purchase price is less than the redemption price for the units, the Fund will keep the difference. If the purchase price is greater than the redemption price for the units, your Dealer will be responsible for paying this difference and the associated costs. Your Dealer may require you to reimburse the amount paid. If at any time you request a partial redemption of your units so that the aggregate net asset value of your units of a Fund would be less than \$5,000, we may require that all such units of the Fund be redeemed after we provide you with at least 30 days’ written notice.

Under certain circumstances, your right to redeem may be suspended in accordance with securities legislation. For example, your right to redeem units of a Fund may be suspended if trading is suspended on stock exchanges on which over 50% of the investments of the Fund trade. We may also suspend your right to redeem units of a Fund, with the consent of applicable securities regulatory authorities, if we cannot determine the value of the net assets of the Fund.

Under the terms of the trust agreement governing the Funds, the Trustee is permitted to allocate capital gains it has realized to fund a redemption to redeeming Unitholders. However, based on recent amendments to the Income Tax Act (Canada) (the “Tax Act”), a Fund will be limited in its ability to allocate capital gains to a redeeming Unitholder in a particular year.

## Short Term Trading

The interests of Unitholders and the ability of the Funds to manage their investments may be adversely affected by inappropriate or excessive short-term trading because, among other things, these types of trading activities can dilute the value of the Funds' securities, can interfere with the efficient management of the Funds' portfolios and can result in increased brokerage and administrative costs.

If you redeem units of a Fund within 30 days of buying them, the Manager may, at its discretion, reduce the amount otherwise payable to you on the redemption by imposing a short-term trading fee of up to 2% of the net asset value of the units redeemed. See "*Fees and Expenses*" in this Simplified Prospectus. The fee will be retained by the Fund. We may also restrict purchases if you engage in such short-term trading.

The Manager monitors for short-term trading each month and reviews associated results. For each short-term trade with a total value of >\$5,000, the Manager will, at its discretion, send a warning to the applicable investment dealer and, if similar trading activity persists, a second warning. If the short-term trading occurs for a third time for the same account, the short-term trading fee described above may, at the discretion of the Manager, be levied.

There are no arrangements, whether formal or informal, with any person or company to permit short-term trades in securities of a Fund. Other than as described in this Simplified Prospectus, the Funds do not have any formal policies or procedures relating to the monitoring, detection, and deterrence of short-term trades of any Fund's securities by investors.

## **OPTIONAL SERVICES PROVIDED BY THE MUTUAL FUND ORGANIZATION**

### **Pre-Authorized Chequing Plan ("PAC")**

You can purchase units of a Fund by making regular investments through a PAC.

Your initial investment in any class of units other than Class E, Class H, Class H (US\$), Class I, Class I (US\$), Class N, and Class O units of the Funds, must be at least \$5,000. With respect to Class H, Class H (US\$), Class I, and Class I (US\$) units of the Funds, your initial investment must be at least \$100,000. With respect to Class N units of the Funds, for institutional investors and other qualified investors, your initial investment must be at least \$5,000,000. With respect to Class E and Class O units of the Funds, minimum initial investment amounts are to be negotiated between the Unitholder and the Manager. We will determine, and from time to time may change, the minimum amounts for initial and subsequent investments in any class.

After your initial investment, you can make further investments via a PAC on a regular basis of at least \$100 per investment. We will determine, and from time to time may change, the minimum amounts for initial and subsequent investments in any class. You can invest semi-monthly, monthly, quarterly, semi-annually or annually. We may stop your PAC if a payment is not made when due. We may change or discontinue this service at any time.

When you enroll in a PAC, your Dealer will send you the current simplified prospectus and any amendments that have been made. Subject to regulatory approval, you will not be sent a copy of any subsequent simplified prospectus renewals (and any amendments to that simplified prospectus) unless you request that it be sent to you at the time you enroll in a PAC or subsequently request it from your Dealer. You can obtain copies of these documents from your Dealer or by calling us toll free at **1-866-377-4743** or sending us an e-mail at **info@penderfund.com**. The documents can also be found on our website at **www.penderfund.com** or on the SEDAR website at **www.sedar.com**.

You may exercise your statutory right to withdraw from the initial purchase under the PAC. This right does not apply in respect of any subsequent purchase under the plan, but you continue to have all other statutory rights under securities law, including rights arising from any misrepresentations that may have been made, irrespective of whether you request or receive a copy of subsequent simplified prospectus renewals. See "*What are your Legal Rights?*" in this Simplified Prospectus.

## Automatic Regular Withdrawals

Automatic regular withdrawals from the Fund available for investors through certain financial institutions is provided as an optional service through pre-authorized redemptions of units. The redemption value is deposited to a pre-determined financial institution or bank account and can be made monthly, quarterly, semi-annually or annually. The minimum amount for each pre-authorized redemption transaction is \$100 per transaction. Automatic regular withdrawals cannot be set up in respect of units held by way of a RRSP account. If the amount of your withdrawals exceeds the growth of your investment and any income it is earning, your investment will eventually be exhausted. No fees are payable for participating in an automatic regular withdrawals program. For more information on how to participate in automatic regular withdrawals from the Fund, please consult your professional advisor.

## Automatic Reinvestment of Distributions

As described under the subheading “*Distribution Policy*” contained in each Fund profile under “*Part B – Fund Specific Information*” in this Simplified Prospectus, unless you indicate that you would like to receive your distribution in cash, we will automatically reinvest your distributions from a particular class of units of a Fund into additional units of the same class of the same Fund at the next net asset value per unit of that class calculated on the date of distribution.

## Information You Will Receive

When you make your initial purchase, you will receive a confirmation indicating the purchase price per unit and the number and class of units you purchased. Similarly, at the time of any additional purchase, change of class, switch or redemption of units, you will receive a confirmation giving details of the transaction and a summary of the units you hold. If you make your initial purchase from a Dealer, you will receive the above information from your Dealer directly. Upon your request, as and when filed, you will also receive audited annual financial statements, unaudited interim financial statements, the annual management report of fund performance and the interim management report of fund performance, in respect of a Fund.

## FEES AND EXPENSES

The table below lists the fees and expenses that you may have to pay if you invest in a Fund. You may have to pay some of these fees and expenses directly. A Fund may have to pay some of these fees and expenses, which will therefore reduce the value of your investment in that Fund. The consent of Unitholders will be obtained if (i) any change is made in the basis of the calculation of a fee or expense charged to a Fund or a unit class of a Fund, or directly to you by us or a Fund in connection with the holding of units of a Fund, in a way that could result in an increase in charges to a Fund or the unit classes or you, or (ii) a fee or expense is introduced that is charged to a Fund or a unit class, or directly to you by us or a Fund in connection with the holding of units of a Fund, that would result in an increase in charges to a Fund, a unit class or you, unless the change is a result of a change made by a third party at arm’s length to the Fund or unless applicable securities laws do not require the consent of Unitholders to be obtained. In that case, Unitholders will be sent a written notice at least 60 days before the effective date of the change, if required under applicable securities laws.

If a Fund holds units of another mutual fund:

- there are fees and expenses payable by the other mutual fund in addition to the fees and expenses payable by the Fund;
- no management fees, administration fees or incentive/performance fees are payable by the Fund that, to a reasonable person, would be considered to duplicate a fee payable by the other mutual fund for the same service;
- no sales fees or redemption fees are payable by the Fund in relation to its purchases or redemptions of the securities of the other mutual fund if the other mutual fund is managed by Pender or its affiliate or associate; and

- no sales fees or redemption fees are payable by the Fund in relation to its purchases or redemptions of securities of the other mutual fund that, to a reasonable person, would be considered to duplicate a fee payable by an investor in the Fund.

## Fees and Expenses Payable by the Mutual Fund

### Management Fees

The management fees vary by unit class. See the management fee information for each Fund under “*Fund Details*”. For Class E and Class O, this fee is or will be, as applicable, separately negotiated and charged directly to the Unitholders. For Class E and Class O Unitholders the management fee (before applicable taxes such as GST or HST) will not exceed the following rates:

- Pender Alternative Absolute Return Fund – 1.80%
- Pender Alternative Arbitrage Fund – 1.80%
- Pender Alternative Arbitrage Plus Fund – 1.80%
- Pender Alternative Multi-Strategy Income Fund – 1.80%
- Pender Alternative Special Situations Fund – 1.95%

The management fees charged to the Funds by the Manager are intended to cover, among other things, investment management costs, including any portfolio advisory fees, as well as distribution, marketing and promotion of the Funds. The management fee is based on the net asset value of each unit class, calculated daily and payable monthly. Certain units have a lower management fee due to lower servicing costs incurred by the Manager. Management fees are subject to applicable taxes such as GST or HST. The Manager, at its discretion, may reduce or waive management fees.

### Performance Fees

A performance fee applies to all classes of units of the Funds. For Class O units, this fee is or will be charged directly to Unitholders, as applicable.

Pender Alternative Absolute Return Fund will pay to the Manager a performance fee in relation to each class of units that is equal to 15% of the amount by which the total return of the class of units exceeds a 3% hurdle rate, for the period since the performance fee was last paid, subject to accumulation in years where no performance fee is paid, provided that the total return of the relevant class of units for such period exceeds the previous high-water mark (as described below).

Pender Alternative Arbitrage Fund will pay to the Manager a performance fee in relation to each class of units that is equal to 15% of the amount by which the total return of the class of units exceeds the previous high-water mark (as described below) for each applicable class of units for the period since the performance fee was last paid.

Pender Alternative Arbitrage Plus Fund will pay to the Manager a performance fee in relation to each class of units, that is equal to 15% of the amount by which the total return of the class of units exceeds the previous high-water mark (as described below) for each applicable class of units for the period since the performance fee was last paid.

Pender Alternative Multi-Strategy Income Fund will pay to the Manager a performance fee in relation to each class of units that is equal to 15% of the amount by which the total return of the class of units exceeds a 3% hurdle rate, for the period since the performance fee was last paid, subject to accumulation in years where no performance fee is paid, provided that the total return of the

relevant class of units for such period exceeds the previous high-water mark (as described below).

Pender Alternative Special Situations Fund will pay to the Manager a performance fee in relation to each class of units that is equal to 15% of the amount by which the total return of the class of units exceeds a 6% hurdle rate, for the period since the performance fee was last paid, subject to accumulation in years where no performance fee is paid, provided that the total return of the relevant class of units for such period exceeds the previous high-water mark (as described below).

Performance fees will be calculated and accrued daily, and such accrued fees will be paid by the Fund at the end of each year. The Manager has reserved the right to change the period for which any performance fee may be paid by a Fund. Performance fees are subject to applicable taxes such as GST or HST. The Manager, at its discretion, may reduce or waive performance fees.

The high-water mark is the net asset value of the applicable class of units to which it applies as at the most recent determination date on which a performance fee was payable. The initial high-water mark for each applicable unit class of the Fund is set at \$10 per unit on inception of the class of units, or in the case of Pender Alternative Multi-Strategy Income Fund and Pender Alternative Special Situations Fund, the NAV of the applicable class of units of such Funds on the Conversion Date. The current high-water mark is disclosed in the latest annual or interim financial statements.

## **Operating Expenses**

Each unit class will be charged an administration fee equal to 0.50% of its net asset value. For Class O, this fee is separately negotiated and charged directly to the Unitholders, and will not exceed 0.50% of the class' value. In exchange for the fee, the Manager pays for the operating costs of each Fund (including administrative and operating expenses, registrar and transfer agency fees, custody fees, Unitholder servicing costs, costs of prospectuses and reports, regulatory fees and audit and legal fees) other than taxes, brokerage commissions, transaction costs and Independent Review Committee fees. The Manager may reimburse each Fund for the Independent Review Committee fees. The Chair of the Independent Review Committee receives an annual retainer of \$15,000 and a fee of \$1,500 for each meeting the Chair attends. With the exception of the Chair, each member of the Independent Review Committee receives an annual retainer of \$10,000 and a fee of \$1,000 for each meeting that the member attends. The members of the Independent Review Committee are also reimbursed for certain out-of-pocket costs associated with the performance of their duties. Administration fees are subject to applicable taxes such as GST or HST. The Manager, at its discretion, may reduce or waive administration fees.

## **Fees and Expenses Paid Directly by You**

### **Management and Administration Fees**

Management fees for Class E and Class O are separately negotiated and are charged directly to the Unitholders. For Class E and Class O Unitholders the management fee will not exceed rates as noted above in "Fees and Expenses Payable by the Mutual Fund". Administration fees for Class O are separately negotiated and charged directly to the Unitholders and will not exceed 0.50% of the class' value.

### **Front-End Sales Charge**

For Class A, Class A (US\$), Class AF Class H, and Class H (US\$) units, your Dealer may charge a maximum commission of 5% (\$50 on a \$1,000 investment).

There are no sales charges on the purchase of Class E, Class N or Class O units. There are no front-end sales charges on the purchases of Class F, Class F (US\$), Class FF, Class I, or Class I (US\$) units. Instead, you may pay a fee directly to your Dealer under its “fee for service” or “wrap account” program.

**Switch Fee** Your Dealer may charge you up to 2% of the net asset value of the units you switch to a different Fund or convert to a different class of the same Fund.

**Short-Term Trading Fee** The Fund may, at its sole discretion, charge you up to 2% of the net asset value of the units you redeem if you switch or redeem within 30 days of purchase. The short-term trading fee will be retained by the Fund.

**Bank Charges** You will be charged any amounts levied by a bank or other financial institution for any of your cheques that are dishonoured and returned to a Fund or for any charge related to electronic fund transfers.

### Impact of Sales Charges

#### Class A / Class A (US\$) / Class AF / Class H / Class H (US\$) Units

The following table shows the amount of fees that you would have to pay under the front-end load option available to you if you made an investment of \$1,000 in Class A, Class A (US\$), Class AF, Class H or Class H (US\$) units and you held that investment for one, three, five or 10 years and redeemed immediately before the end of that period.

	At Time of Purchase	1 Year	3 Year	5 Year	10 Year
Class A / Class A (US\$) / Class AF / Class H / Class H (US\$) (Maximum 5% commission)	\$50	Nil	Nil	Nil	Nil

#### Class E / Class F / Class F (US\$) / Class FF / Class I / Class I (US\$) / Class N / Class O Units

There are no sales charges on the purchase of Class E, Class N or Class O units. There are also no sales charges on the purchase of Class F, Class F (US\$), Class FF, Class I or Class I (US\$) units – instead you pay a fee directly to your Dealer under its “fee for service” or “wrap account” program.

### Management Fee Rebate or Distribution Programs

From time to time, the Manager may offer a reduced fee to select investors. The Manager negotiates a separate agreement with each investor that sets out the basis (such as size of holdings or competitive rates charged in the industry) on which the fee reduction is calculated. The fees for these select investors are the same as for other Unitholders in the same unit class, but these investors receive a distribution (a “Fee Distribution”) equal to the amount of the fee reduction. Fee Distributions are reinvested in additional units on behalf of those select investors unless otherwise negotiated.

## DEALER COMPENSATION

### Sales Commissions

You may purchase Class A, Class A (US\$), Class AF, Class H or Class H (US\$) units under the front-end sales charge method. Your Dealer is entitled to receive from you a negotiable sales commission of up to 5% (or up to \$50 per \$1,000) of the net asset value of the units purchased, as described in the previous section. The commission is deducted from your gross investment amount and the remainder is used to purchase units at the applicable net asset value per unit.

### Trailing Commissions

The Manager makes payments to your Dealer to assist in providing you with continuing advice and service. Annual trailing commissions payable on Class A, Class A (US\$), Class AF Class H and Class H (US\$) units of the Funds, payable on a monthly basis, are set out in the table below.

<b>Trailing Commissions Paid by Manager</b>	<b>Class A / Class AF / Class A (US\$)</b>	<b>Class H / Class H (US\$)</b>
Pender Alternative Absolute Return Fund	1.00%	0.85%
Pender Alternative Arbitrage Fund	1.00%	0.85%
Pender Alternative Arbitrage Plus Fund	1.00%	0.85%
Pender Alternative Multi-Strategy Income Fund	1.00%	0.85%
Pender Alternative Special Situations Fund	1.00%	0.85%

No trailing commissions are paid in respect of Class E, Class F, Class F (US\$), Class FF, Class I, Class I (US\$), Class N, and Class O units.

The Manager may pay a portion of its management fee to a Dealer as additional compensation at the Manager's discretion. The Manager expects that your Dealer will pay a portion of the trailing commission to your advisor for the services and advice they provide to you.

The Canadian Securities Administrators published rule amendments that, effective June 1, 2022, prohibit the payment of trailing commissions to OEO Dealers and other Dealers that do not make a suitability determination in connection with a client's purchase and ongoing ownership of securities of prospectus-qualified mutual funds. Accordingly, Class A, Class A (US\$), Class H and Class H (US\$) units are no longer available to investors who hold their units in an account with an OEO Dealer or any other Dealer that does not make a suitability determination.

### Other Dealer Compensation from Management Fees

We may assist Dealers with certain of their direct costs associated with marketing the Funds and providing educational investor conferences and seminars about the Funds. We may also pay Dealers a portion of the costs of educational conferences, seminars or courses that provide information about financial planning, investing in securities, mutual fund industry matters or mutual funds generally. We may provide Dealers with marketing materials about the Funds and other investment literature. We may provide Dealers with non-monetary benefits of a promotional nature and of minimal value and we may engage in business promotion activities that result in Dealers receiving non-monetary benefits. We review the assistance we will provide under these programs on an individual basis. For the year ended December 31, 2021, approximately 23% of the management fees paid by the Funds to the Manager were used, in part, to pay trailing commissions, marketing costs and other associated distribution costs relating to the sale of units of the Funds.

Subject to compliance with securities regulatory authorities' mutual fund sales practice rules, we may change the terms and conditions of these trailing commissions and programs, or may stop them, at any time.

## **Equity Interests of Members of the Organization of the Funds**

None of the Manager or its affiliates, or any other member of the organization of any the Funds holds any ownership interest in any Dealer that sells the Funds' units, within the meaning of National Instrument 81-105 Mutual Fund Sales Practice ("NI 81-105"). No Dealer that sells the Fund's units, representative of a Dealer or any associate of either of the foregoing holds any ownership interest in the Manager or its affiliates or any other member of the organization of any of the Funds, within the meaning of NI 81-105.

## **INCOME TAX CONSIDERATIONS**

This section provides a general summary of the federal income tax considerations applicable to the Funds and to an investor who is an individual (other than a trust), is resident in Canada, deals at arm's length with the Funds, and holds units as capital property. This summary is not exhaustive of all tax considerations and is not intended to be legal advice or tax advice. We have tried to make this discussion easy to understand. As a result, we cannot be technically precise, or cover all the tax consequences that may apply. You should consult your own tax advisor about your personal circumstances when you consider purchasing, switching or redeeming securities of a Fund.

The summary is based on the current provisions of the Tax Act, regulations under the Tax Act, the proposals for specific amendments to the Tax Act, the regulations that have been publicly announced by the Minister of Finance (Canada) before the date hereof and our understanding of the current published administrative practices and assessing policies of the Canada Revenue Agency (CRA). Except for the foregoing, this summary does not take into account or anticipate any change in law, whether by legislative, regulatory, administrative or judicial action. Furthermore, this summary does not take into account provincial, territorial, or foreign income tax legislation or considerations.

This summary assumes that each of the Funds is expected to qualify, and will continue to be, at all material times, a mutual fund trust for the purposes of the Tax Act. This summary also assumes that none of the Funds is or will become a specified investment flow-through trust ("SIFT trust"). Investors should seek independent advice regarding the tax consequences of investing in units, based on the investors' own particular circumstances.

### **Income Tax Considerations for the Mutual Fund**

Each of the Funds is expected to qualify, and will continue to be, at all material times, a "mutual fund trust" under the Tax Act and intends to maintain such status. None of the Funds is a SIFT trust for purposes of the Tax Act. This summary is based on the assumption that each of the Funds will qualify as a mutual fund trust under the Tax Act at all material times. If a Fund were not to so qualify, the income tax consequences would differ materially from those described below.

If a Fund ceases to be a mutual fund trust for purposes of the Tax Act, the Fund may be subject to different tax consequences than described below including being subject to Part XII.2 tax, alternative minimum tax, the mark to market rule, the requirement to file Form T1135, and penalty tax if it holds any investments that are not qualified investments for Registered Retirement Savings Plans (RRSP), Registered Retirement Income Funds (RRIF), Deferred Profit Sharing Plans (DPSP), Registered Disability Savings Plans (RDSP), Registered Education Saving Plans (RESP) and Tax Free Savings Accounts (TFSA) (collectively "Registered Plans"). The Fund may also lose favourable income tax treatments such as the eligibility for the Capital Gain Refund Mechanism, qualification as a Canadian security for purposes of the election in subsection 39(4) of the Tax Act, and eligibility for a December 15 year-end. Investors should seek independent advice regarding the tax consequences of investing in units, based on the investors' own particular circumstances.

All of a Fund's deductible expenses, including expenses common to all classes of the Fund and management fees and other expenses specific to a particular class of the Fund, will be taken into account in determining the income

or loss of the Fund as a whole. Each of the Funds intends to make sufficient distributions in each taxation year that the Fund will not generally be liable for Part I income tax under the Tax Act.

## **Income Tax Considerations for Investors**

### **For Units Not Held in a Registered Plan**

If you hold units of a Fund outside of a Registered Plan, you will be required to include in computing your income for tax purposes the amount (computed in Canadian dollars) of the Fund's net income and the taxable portion of the net capital gains paid or payable to you by the Fund in the year (including by way of Fee Distributions), whether you receive these distributions in cash or they are reinvested in additional units. Provided the appropriate designations are made by the Fund, distributions of net taxable capital gains and taxable dividends (including eligible dividends) on shares of taxable Canadian corporations held by the Fund will effectively retain their character and be treated as such in your hands. Taxable dividends received from Canadian corporations are subject to a gross-up and credit regime the effect of which is to make them subject to lower tax rates than ordinary income. Taxable dividends that are eligible dividends are subject to an enhanced regime and thus lower tax rates. Generally, gains from cash settled derivative transactions entered into for non-hedging purposes and "short sales" will be treated as ordinary income rather than capital gains.

To the extent that the distributions (including by way of Fee Distributions) paid to you by a Fund in any year exceed your share of the net income and net realized capital gains of the Fund allocated to you for that year, those distributions (except to the extent that they are proceeds of disposition) will be a return of capital and will not be taxable to you but will reduce the adjusted cost base of your units of the Fund. Where the adjusted cost base of a unit in the Fund would be reduced below zero, a capital gain is realized to the extent the adjusted cost base would otherwise become negative.

Subject to a return of capital, you will be taxed on distributions of income and capital gains from a Fund, even if the income and capital gains accrued to the Fund or were realized by the Fund before you acquired the units and were reflected in the purchase price of the units. In many cases, the most significant distributions of income and capital gains of a Fund occur in December. However, distributions (including Fee Distributions) can be made at any time in the year at the discretion of the Manager.

The Funds may invest in debt or shares of foreign corporations. Interest income and dividends paid to a Fund by a foreign corporation may be subject to a withholding tax payable to a foreign government. To the extent that the Fund so designates in accordance with the Tax Act, you will be deemed to have received income from the foreign country and, for the purpose of computing foreign tax credits, be deemed to have paid a portion of the taxes withheld as foreign taxes paid to that country. You will be required to include in your income the foreign source income gross of withholding taxes. Foreign source income is taxed as regular income for the purposes of the Tax Act. The Canadian tax payable by you on such foreign source income may be reduced by a foreign credit in respect of the foreign taxes deemed paid on that income. Capital gains on the sale of foreign securities will generally not be subject to withholding taxes.

As part of their investment strategy, the Funds may invest in US corporate bonds. Under the US – Canada tax treaty, interest paid on such bonds will not be subject to withholding taxes. Capital gains from the sale of US securities will also generally not be subject to withholding taxes while US earned dividends are subject to a 15% withholding tax.

The Funds may invest in units of mutual funds, income trusts and other trusts. Net income and taxable capital gains that are allocated to the Funds by these investments will be included in computing the net income and taxable capital gains of the Funds, which in turn will be allocated to Unitholders in the manner set out above.

If a Fund is subject to a "loss restriction event" as the result of a person becoming a "majority-interest beneficiary" or a group of persons becoming a "majority interest group of beneficiaries" of the Fund (as those terms are defined in the Tax Act) it will have a deemed year-end for tax purposes and may be liable to tax unless it distributes its net taxable income and net capital gains for the shortened year. If it has net accrued or realized losses at that time,

certain of its accrued and realized losses may be extinguished, which could adversely affect the tax treatment of a person holding or acquiring units; see "*Tax loss restriction event risk*".

If you dispose of a unit (including a switch of a unit of one Fund for a unit of another Fund), whether by redemption or otherwise, a capital gain (or a capital loss) will be realized to the extent that the proceeds of disposition, less any costs of disposition, are greater (or less) than the adjusted cost base to you of the unit. One-half of a capital gain (or a capital loss) is generally included in determining your taxable capital gain (or allowable capital loss). The allowable capital loss may be deducted against your taxable capital gains for the year. Generally, any excess of your allowable capital loss over your taxable capital gains for the year may be carried back up to three taxation years or forward indefinitely and deducted against taxable capital gains in other years. A change of units of a class of a Fund into units of a different class of the Fund is generally not considered to be a sale for tax purposes, so no capital gain or loss will result. To the extent a change in units results in a disposition of the original units then either a capital gain or a capital loss will be realized or suffered.

If you dispose of units of a Fund and you, or your spouse or another person affiliated with you (including a corporation controlled by you) has acquired units of the same Fund within 30 days before or after you dispose of the units (such newly acquired units being considered "substituted property"), your capital loss may be deemed to be a "superficial loss". If so, your loss will be deemed to be nil, and the amount of your loss will instead be added to the adjusted cost base of the units which are "substituted property".

If you redeem a unit of a Fund, the Fund may, to the maximum extent permitted by the Tax Act, allocate to you such amount of capital gains that result from the disposition of assets of the Fund undertaken to permit or facilitate such redemption of unit. In such cases, for the purposes of the Tax Act, the taxable portion (i.e., 50%) of such capital gains allocated to you by the Fund will be included in your income and the full amount of such capital gains will be excluded from your proceeds of disposition of the unit.

In general, the aggregate adjusted cost base of your units of a particular class of a Fund equals:

- your initial investment in the class (including any sales charges paid)
- plus the cost of any additional investments in the class (including any sales charges paid)
- plus the adjusted cost base of any units of other classes of the Fund that were changed into units of the particular class of the Fund
- plus reinvested distributions
- minus the capital returned in any distributions
- minus the adjusted cost base to you, at the time of any previous redemptions, of the units redeemed at that time
- minus the adjusted cost base to you, at the time any units of the particular class of the Fund were changed into units of other classes of the Fund, of the units so converted.

The adjusted cost base to you of a unit at a particular time will generally be the average adjusted cost base to you of all units of that class of that Fund at that time. If the adjusted cost base of your units is reduced to less than zero, you will be deemed to have realized a capital gain equal to, and the adjusted cost base to you of your units will be increased by, such negative amount.

Under the alternative minimum tax provisions of the Tax Act, an individual may be required to pay a minimum tax computed by reference to the individual's "adjusted taxable income" for that year. In computing adjusted taxable income, an individual must generally include all taxable dividends (without application of the gross-up and credit treatment normally applied to such dividends) and 80% of capital gains. Whether and to what extent the tax liability of a Unitholder may be increased by the alternative minimum tax will depend on the amount of the Unitholder's

income, the sources from which it is derived, and the nature and amount of any deductions claimed. Any additional tax payable by a Unitholder for a year which results from the application of the minimum tax provisions may generally be carried forward and applied by the Unitholder against his or her Part I tax otherwise payable in any of the seven immediately following taxation years.

We will generally issue a tax statement to you each year identifying the distributions made to you in the previous year. You should keep detailed records of the purchase costs, sales charges and distributions related to your units as this is the only way to accurately calculate the adjusted cost base of those units. Determination of adjusted cost base can involve complex issues and we recommend that you obtain legal and/or tax advice to assist you with those calculations.

## **For Units Held in a Registered Plan**

It is expected that each of the Funds will qualify as a “mutual fund trust” for purposes of the Tax Act and intends to remain so qualified. Accordingly, units of the Funds will be qualified investments under the Tax Act for Registered Plans. If units of a Fund are held in a Registered Plan, distributions from the Fund and capital gains from a disposition of the units will generally not be subject to tax under the Tax Act until withdrawals are made from the plan. Withdrawals from a TFSA are generally not subject to tax.

Notwithstanding that units of the Funds may, at a particular time, be qualified investments for a trust governed by a RRSP, RRIF, RDSP, TFSA or RESP, the annuitant of the RRSP or RRIF, holder of the RDSP or TFSA or subscriber of the RESP, as the case may be (such annuitant, holder or subscriber being a “Controlling Individual” of the RRSP, RRIF, RDSP, TFSA or RESP), will be subject to a penalty tax with respect to units held in the RRSP, RRIF, RDSP, TFSA or RESP if such units are “prohibited investments” for the RRSP, RRIF, RDSP, TFSA or RESP within the meaning of the Tax Act. Provided that the Controlling Individual of a RRSP, RRIF, RDSP, TFSA or RESP does not hold a “significant interest” (as defined in the Tax Act) in a Fund and provided that such holder deals at arm's length with the Fund for the purposes of the Tax Act, units of the Fund will not be “prohibited investments” for the RRSP, RRIF, RDSP, TFSA or RESP. In general terms, a Controlling Individual of a RRSP, RRIF, RDSP, TFSA or RESP will have a significant interest in a Fund if the Controlling Individual, together with any other persons and partnerships with which the Controlling Individual does not deal at arm's length, hold, directly or indirectly through one or more trusts (including Registered Plans), 10% or more of the value of the outstanding units of the Fund. You should consult with your own tax advisor as to whether units of the Fund would be a prohibited investment if held in your RRSP, RRIF, RDSP, TFSA or RESP, having regard to your own particular circumstances.

## **Information Exchange**

Pursuant to the Intergovernmental Agreement for the Enhanced Exchange of Tax Information under the Canada-US Tax Convention entered into between Canada and the United States (the “IGA”), and related Canadian legislation, the Funds and the Manager are required to report certain information with respect to Unitholders who are US tax residents and/or US citizens (including US citizens who are residents or citizens of Canada), and certain other “US Persons” as defined under the IGA (excluding registered plans such as RRSPs), to the CRA. The CRA will then exchange the information with the US Internal Revenue Service.

Pursuant to the implementation, under Part XIX of the Tax Act, of the Common Reporting Standard (“CRS”) developed by the Organisation for Economic Co-operation and Development, the Funds and the Manager may be required to report certain information with respect to Unitholders who are tax residents in a jurisdiction other than Canada or the US, and certain other reportable persons, to the CRA. The CRA will then exchange this information with each CRS participating jurisdiction.

## **WHAT ARE YOUR LEGAL RIGHTS?**

Securities legislation in some provinces and territories gives you the right to withdraw from an agreement to buy mutual funds within two business days of receiving this Simplified Prospectus or fund facts document, or to cancel your purchase within 48 hours of receiving confirmation of your order.

Securities legislation of some provinces and territories also allows you to cancel an agreement to buy mutual fund units and to get your money back, or to make a claim for damages, if this Simplified Prospectus, fund facts document, management report of fund performance or financial statements misrepresent any facts about the Funds. You must act within the time limits set by law in the applicable province or territory.

For more information, refer to securities legislation of your province or territory or consult your lawyer.

## **EXEMPTIONS AND APPROVALS**

The Funds are subject to certain restrictions and practices contained in securities legislation, including *National Instrument 81-102 Investment Funds* ("NI 81-102"), which are designed, in part, to ensure that the investments of mutual funds are diversified and relatively liquid and to ensure the proper administration of the Funds.

On June 30, 2022, the Funds were granted an exemption from the restrictions found in subsections 2.6(1)(c)(v), s.6(2)(c) and 2.6.2 of NI 81-102 in order to permit a Fund to use strategies generally prohibited from being used by other types of mutual funds, such as the ability to invest more than 10% of its NAV in securities of a single issuer, either directly or through the use of specified derivatives, the ability to borrow cash, up to 100% of its NAV, to use for investment purposes, the ability to sell securities short (the combined level of cash borrowing and short selling is limited to 100% of its NAV in aggregate), and the ability to use leverage through the use of cash borrowing, short selling and specified derivatives. The maximum aggregate exposure to these sources of leverage, as calculated in accordance with section 2.9.1 of NI 81-102, shall not exceed 300% of the Fund's NAV. Not all Funds may utilize the exemptive relief, any such reliance will depend on each Fund's specific strategy, as determined in the discretion of the Manager. See the applicable Fund's "*Fund Details*" below for more information.

## CERTIFICATE OF THE FUNDS, THE MANAGER AND THE PROMOTER

July 26, 2022

This Simplified Prospectus and the documents incorporated by reference into this Simplified Prospectus, constitute full, true and plain disclosure of all material facts relating to the securities offered by this Simplified Prospectus, as required by the securities legislation of Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland and Labrador, Nova Scotia, Ontario, Prince Edward Island, Québec, Saskatchewan, Northwest Territories, Nunavut, and Yukon and do not contain any misrepresentations.

## **PART B – FUND SPECIFIC INFORMATION**

### **SPECIFIC INFORMATION ABOUT EACH OF THE MUTUAL FUNDS DESCRIBED IN THIS DOCUMENT**

#### **What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?**

A mutual fund is a pool of money contributed by people with similar investment objectives. People who contribute money become unitholders of the mutual fund. Unitholders share the mutual fund's income, expenses, and any gains and losses the mutual fund makes on its investment portfolio, generally in proportion to the number of units they own. The value of an investment in a mutual fund is realized by redeeming the units held. Where a mutual fund issues more than one class of units, the unitholders share in the mutual fund's income, expenses and any gains and losses allocated to the particular class of units held by the unitholder in proportion to the units they own as of that date.

In Canada, a mutual fund can be established either as a mutual fund trust or as a mutual fund corporation.

#### **What are the General Risks of Investing in a Mutual Fund?**

Risk is the chance that your investment may not perform as expected. There are different degrees and types of risk but, in general, the more investment risk you are willing to accept, the higher your potential returns and the greater your potential losses. The general risks include:

##### ***Price fluctuation***

Mutual funds own different types of investments, depending on their investment objectives. The value of these investments will change from day to day, reflecting changes in interest rates, economic conditions, market and company news, and global or regional political, economic, health and banking crises. As a result, the value of a mutual fund's units may go up and down and the value of your investment in a mutual fund may be worth more or less when you redeem it than when you purchased it.

In addition to changes in the condition of markets generally, unexpected and unpredictable events such as wars, natural or environmental disasters, a widespread health crisis or pandemic, terrorism and related geopolitical risks may lead to increased market volatility in the short term and may have adverse long-term effects on local and world economies and markets, including U.S., Canadian and other economies and securities markets. These events could reduce consumer demand or economic output, result in market closures, travel restrictions or quarantines, and significantly adversely impact the economy. These types of unexpected and unpredictable events could have a significant impact on a mutual fund and its investments and could also result in fluctuations in the value of a mutual fund.

##### ***Your investment is not guaranteed***

The value of your investment in a mutual fund is not guaranteed. Unlike bank accounts or guaranteed investment certificates, mutual fund units are not covered by the Canada Deposit Insurance Corporation or any other government deposit insurer.

##### ***Redemptions may be suspended***

Under exceptional circumstances, your right to redeem your units may be suspended. See "Redemptions" above for details.

## What are the specific risks of investing in a mutual fund?

Each mutual fund has specific risks. If a mutual fund invests in an underlying fund, the risks of the mutual fund include the risks of the underlying fund. A mutual fund takes on the risks of an underlying fund in proportion to its investment in that underlying fund.

Each Fund is or will be considered an “alternative mutual fund” which means that, under NI 81-102, it is or will be permitted to invest in asset classes and use strategies that are generally prohibited for conventional mutual funds, such as, among other things, the ability to invest up to 20% of its net asset value (“NAV”) in securities of a single issuer (rather than 10% for conventional mutual funds), the ability to borrow cash, when aggregated with the value of all outstanding borrowing, of up to 50% of its NAV (or up to 100% of its NAV if an exemptive order has been approved, see the “*Fund Details*” of each Fund below, to use for investment purposes, the ability to sell securities short (provided that the aggregate market value of the securities of a single issuer sold short, other than government securities, does not exceed 10% of its NAV and the aggregate market value of the securities sold short does not exceed 50% of its NAV (or up to 100% of its NAV if an exemptive order has been approved, see the “*Fund Details*” of each Fund below), the ability to use cleared specified derivatives without limit and with zero cash required and the ability to invest up to 100% or more of its NAV in physical commodities, either directly or through the use of specified derivatives. Notwithstanding the foregoing, the combined level of cash borrowing and short selling shall be limited to 50% of its NAV (or up to 100% of its NAV if an exemptive order has been approved, see the “*Fund Details*” of each Fund below) and the gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives shall be limited to 300% of its NAV. For more information regarding the risks associated with these strategies, please see the detailed risk descriptions below.

Information contained in this document as it relates to and in respect of Pender Alternative Multi-Strategy Income Fund and Pender Alternative Special Situations Fund applies effective as the Conversion Date, being the date on which such Funds converted from conventional mutual funds to alternative mutual funds. For further details on the conversion of these Funds, see the management information circulars dated June 23, 2022, which are available on the SEDAR profiles of such Funds at [www.sedar.com](http://www.sedar.com).

The “*Fund Details*” of each Fund, sets out the risks that apply to that Fund and any underlying funds in which the Fund invests. Following, in alphabetical order, is a description of each of those risks:

### **Arbitrage risk**

Arbitrage investing involves the risk that an expected corporate transaction will not be consummated or will not be consummated as expected and the Fund will experience a loss.

### **Asset-backed and mortgage-backed securities risk**

Asset-backed and mortgage-backed securities are typically securities which give the holder an interest in a group of secured corporate loans or real estate mortgages. The value of these securities is sensitive to the value of the underlying group of loans or mortgages, which value changes with (i) the market’s perception of the creditworthiness of underlying borrowers, either generally across the entire economy or specifically in respect of the particular group of borrowers involved, (ii) the value of the underlying assets or property, or (iii) the interest rate applicable to the loans or mortgages. As these factors change the value of such securities, and the net asset value of a mutual fund if it is invested in such securities, may be affected. With respect to creditworthiness and changes in interest rates, see “*Credit risk*” and “*Interest rate risk*”.

### **Business risk**

There can be no guarantee against losses resulting from an investment in units of a mutual fund and there can be no assurance that a mutual fund’s investment approach will be successful or that its investment objectives will be attained. A mutual fund can realize substantial losses rather than gains, from some or all of the investments within its investment portfolio. Income trusts or companies that pay a significant amount of their income as dividends may

have difficulty in maintaining their distribution of income or dividends and consequently the income to the mutual fund and the price of their securities may decline and part or all of the amount of distributions by the mutual fund may be treated as a return of capital rather than income for tax purposes for its investors.

### ***Call risk***

A mutual fund may invest, directly or indirectly, in callable securities. During periods of falling interest rates, an issuer of a callable security may “call” or repay a security before its stated maturity, which may result in a mutual fund having to reinvest the proceeds at lower interest rates, resulting in a decline in their respective income.

### ***Changes in legislation risk***

There can be no assurance that applicable laws, or other legislation, legal and statutory rights will not be changed in a manner which adversely affects a mutual fund and its unitholders. There can be no assurance that income tax, securities, and other laws or the interpretation and application of such laws by courts or government authorities will not be changed in a manner which adversely affects the distributions received by a mutual fund or by its unitholders.

### ***Class risk***

A mutual fund may offer more than one class of units. Each class typically has its own fees and expenses, which an investment fund manager tracks separately. If the expenses of one class cannot be paid using that class' proportionate share of the mutual fund's assets, the mutual fund will be required to pay these expenses out of the other classes' proportionate share of the mutual fund's assets. This could reduce the investment return of the other classes.

### ***Closed end fund risk***

Unlike a mutual fund, closed end funds trade on a stock exchange in the secondary market and typically do not redeem or issue shares on a daily basis. Investments in closed end funds come with a number of risks, some of which are listed below.

**Market risk.** Just like open-ended funds, closed-end funds are subject to market movements and volatility. The value of a closed end fund can decrease due to movements in the overall financial markets.

**Interest rate risk.** Changes in interest rate levels can directly impact income generated by a closed end fund. Funds that have a portfolio with a significant allocation to fixed income assets, like bonds, may be more exposed to this type of risk as interest rates change.

**Other risks.** Closed end funds are exposed to much of the same risk as mutual funds, including liquidity risk on the secondary market, credit risk, concentration risk and discount risk. If the closed end fund includes foreign market investments, it will be exposed to the typical foreign market risks, including currency, political and economic risk.

### ***Commodity risk***

If a mutual fund invests in natural resource companies or in income or royalty trusts based on commodities such as oil and gas, it will be affected by changes in commodity prices. The Funds are permitted to invest up to 100% of their NAV in physical commodities, either directly or through the use of specified derivatives. Commodity prices tend to be cyclical and can move dramatically in short periods of time. In addition, new discoveries or changes in government regulations can affect the price of commodities.

## ***Concentration risk***

There are risks associated with any mutual fund that concentrates its investments in a particular company or a few companies. As alternative mutual funds, the Funds are permitted under NI 81-102 to invest up to 20% of their NAV in securities of a single issuer. Concentrating investments allows the fund to focus on a particular company's potential, but it also means that the value of the fund tends to be more volatile than the value of a more diversified fund because a concentrated fund's value is affected more by the performance of the companies in which it has concentrated its investments.

## ***Counterparty risk***

A fund may enter into customized financial instrument transactions that are subject to the risk of credit failure or the inability of, or refusal by, the counterparty to perform its obligations with respect to such customized financial instrument transactions, which could subject a fund to substantial losses.

## ***Credit risk***

Credit risk is the possibility that an issuer of a bond or other fixed income investment may not be able to pay interest or to repay the principal at maturity. The risk of this occurring is greater with some issuers than with others. For example, the risk of default is generally low for government and high-quality corporate securities. Where the risk is considered greater, the interest rate that must be paid by the company on its fixed income securities is generally higher than for a company where the risk is considered to be lower.

Credit risk is comprised of default risk, credit spread risk, downgrade risk and collateral risk. Each can have a negative impact on the value of a debt security.

**Default risk** is the risk that the issuer will not be able to pay the obligation, either on time or at all. Generally, lower quality debt securities involve a greater risk of default on interest and/or principal payments.

**Credit spread risk** is the risk that there will be an increase in the difference between the interest rate of an issuer's bond and the interest rate of a bond that is considered to have little associated risk (such as a government guaranteed bond or treasury bill). The difference between these interest rates is called a "credit spread". Credit spreads are based on macroeconomic events in the domestic or global financial markets. An increase in credit spread will decrease the value of debt securities.

**Downgrade risk** is the risk that a specialized credit rating agency, such as DBRS (Dominion Bond Rating Services), Standard & Poor's or Moody's Investors Services, will reduce the credit rating of an issuer's securities. Downgrades in credit rating will decrease the value of those debt securities.

**Collateral risk** is the risk that the value of any assets securing an issuer's obligation may be deficient or difficult to liquidate. As a result, the value of those debt securities may decline significantly in value.

## ***Currency, foreign exchange and hedging risk***

**Currency risk** - The value of investments denominated in a currency other than Canadian dollars is affected by changes in the value of the Canadian dollar in relation to the value of the currency in which the investment is denominated. When the value of the Canadian dollar falls in relation to foreign currencies, then the value of foreign investments rises. When the value of the Canadian dollar rises, the value of foreign investments falls. A mutual fund may convert its Canadian dollars to foreign currency to buy a foreign security and when it sells the foreign security, may convert the foreign currency to Canadian dollars. As a result, if the value of the Canadian dollar has risen and the market value of the security stayed the same, the mutual fund will lose money on that investment.

**Foreign currency exposure risk** - Securities included in a mutual fund may be valued in or have exposure to currencies other than the Canadian dollar and, accordingly, each class net asset value will, when measured in Canadian dollars, be affected by fluctuations in the value of such currencies relative to the Canadian dollar.

**Hedging risk** - Various hedging techniques may be used in an attempt to reduce certain risks. For example, hedging the risks of both short-selling and taking long positions in certain transactions. Recalculations and adjustments to specific position hedges will be performed as market conditions warrant. If market conditions are analyzed incorrectly or a risk reduction strategy is employed that does not correlate well with a mutual fund's investments, a mutual fund's risk reduction techniques could result in a loss, regardless of whether the intent was to reduce risk or increase return. Recalculations and adjustments to specific position hedges will be performed as market conditions warrant.

**Hedging currency risks** – For investments denominated in foreign currencies, an investment fund manager may hedge the Canadian dollar exposure to the foreign currency in whole or in part. There can be no assurance that gains or losses on currency hedging transactions will be matched in timing or characterization with losses and gains on the securities valued in foreign currencies in which a mutual fund invests. Recalculations and adjustments to specific position hedges will be performed as market conditions warrant. The use of currency hedging could result in a mutual fund incurring losses as a result of the imposition of exchange controls, suspension of settlements, or the inability to deliver or receive a specified currency. For example, unanticipated changes in currency exchange rates may result in an overall poorer performance than if currency risks had not been hedged. If market conditions are analyzed incorrectly or a risk reduction strategy is employed that does not correlate well with a mutual fund's investments, a mutual fund's risk reduction techniques could result in a loss, regardless of whether the intent was to reduce risk or increase return.

### ***Cybersecurity and business continuity risk***

The information and technology systems of an investment fund manager and a fund administrator may be vulnerable to damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches, usage errors by their respective professionals, power outages and catastrophic events such as fires, tornadoes, floods, hurricanes and earthquakes. Although an investment fund manager may have implemented, and/or fund administrator may maintain, various measures to manage risks relating to these types of events, if these systems are compromised, become inoperable for extended periods of time or cease to function properly, an investment fund manager and/or a fund administrator may have to make a significant investment to fix or replace them. The failure of these systems and/or of disaster recovery plans for any reason could cause significant interruptions in an investment fund manager, a mutual funds' and a fund administrator's operations and result in a failure to maintain the security, confidentiality or privacy of sensitive data, including personal information relating to investors (and the beneficial owners of investors). Such a failure could harm an investment fund manager's and/or a fund administrator's reputation, subject any such entity and their respective affiliates to legal claims and otherwise affect their business and financial performance.

### ***Depository securities and receipts risk***

In some cases, rather than directly holding securities of non-Canadian and non-U.S. companies, a mutual fund may hold these securities through a depository security and receipt (an "ADR" -- American Depository Receipt, a "GDR" -- Global Depository Receipt, or an "EDR" -- European Depository Receipt). A depository receipt is issued by a bank or trust company to evidence its ownership of securities of a non-local corporation. The currency of a depository receipt may be different than the currency of the non-local corporation to which it relates. The value of a depository receipt will not be equal to the value of the underlying non-local securities to which the depository receipt relates as a result of a number of factors. These factors include the fees and expenses associated with holding a depository receipt, the currency exchange relating to the conversion of foreign dividends and other foreign cash distributions into local currencies, and tax considerations such as withholding tax and different tax rates between the jurisdictions. In addition, the rights of a mutual fund, as a holder of a depository receipt, may be different than the rights of holders of the underlying securities to which the depository receipt relates, and the market for a depository receipt may be less liquid than that of the underlying securities. The foreign exchange risk will also affect the value of the depository

receipt and, as a consequence, the performance of a mutual fund holding the depository receipt. As the terms and timing with respect to the depository for a depository receipt are not within the control of a mutual fund or its portfolio manager and if the portfolio manager chooses only to hold depository receipts rather than the underlying security, a mutual fund may be forced to dispose of the depository receipt, thereby eliminating its exposure to the non-local corporation, at a time not selected by the portfolio manager, which may result in losses to the mutual fund or the recognition of gain at a time which is not opportune for the mutual fund.

### ***Derivative risk***

A derivative is a contract or security whose value and cash flow pattern is derived from another underlying security, such as a stock or bond, or from an economic indicator such as an interest rate or stock market index. For example, two of the most common derivatives are forward contracts and options, which are described below.

A forward contract is an agreement to buy and sell currency, commodities or securities at an agreed price for future delivery.

An option gives the buyer the right, but not the obligation, to buy or sell the currency, commodities or securities at an agreed price within a certain period of time.

Mutual funds may use derivatives to limit potential losses associated with currencies, stock markets and interest rates. This process is called hedging. Mutual funds may also use derivatives for non-hedging purposes – to reduce transaction costs, achieve greater liquidity, create effective exposure to international financial markets or increase speed and flexibility in making portfolio changes. Although derivatives are often used by funds to reduce risk, they have their own kinds of risk including the following:

- The use of derivatives for hedging may not be effective;
- Some derivatives, such as call options, may limit a mutual fund's potential for gain;
- Options and futures contracts may be more volatile and result in higher costs than an investment in the underlying security and may involve an initial investment that is small relative to the risk involved.
- The cost of entering into and maintaining derivative contracts may reduce a mutual fund's total return to investors;
- The price of a derivative may not accurately reflect the value of the underlying currency or security;
- There is no guarantee that a market will exist when a mutual fund wants to buy or sell the derivative contract. This could prevent the fund from realizing a profit or limiting its losses;
- If the other party (the counterparty) to a derivative contract is unable to meet its obligations, a fund may not realize the benefit intended to be secured by the investment and the fund may experience a loss; and
- Stock exchanges may set daily trading limits on derivatives. This could prevent a mutual fund from closing a contract.

As alternative mutual funds, the Funds are permitted under NI 81-102 to use cleared specified derivatives without limit and with zero cash required.

***Derivative agreement risk*** - Regulatory changes or market conditions may, in the future, limit a mutual fund's ability to increase its exposure through existing derivative agreements or to enter into new derivative agreements, and may require that a mutual fund reduce or eliminate its existing exposure, possibly to an extent that is prohibitively expensive, in which case the mutual fund may determine that it is in the best interest of the mutual fund to terminate the derivative agreement. There is no assurance that a mutual fund will be able to maintain or increase

its exposure under derivative agreements on acceptable terms with a counterparty or any other substitute counterparty.

**Derivative counterparty risk** - A mutual fund may pledge cash up to the value of the amount payable by the fund under a derivative agreement as security in order to secure its obligations under each of the derivative agreements that a mutual fund is a party to. The counterparty will pledge securities to the mutual fund (which may include units of a reference fund) or enter into another collateral arrangement to fully secure its obligations to the fund under derivative agreements.

The possibility exists that the counterparty will default on its obligations under a derivative agreement in which case a mutual fund will not receive delivery of units of the reference fund or the return of collateral pledged as security.

## **Equity risk**

Companies issue equities, or stocks, to help finance their operations and future growth. Mutual funds that purchase equities become part owners in these companies. The price of a stock is influenced by the company's performance outlook, market activity and the larger economic picture. When the economy is expanding, the outlook for many companies will generally be good and the value of their stocks should rise. The opposite may also be true. Usually, the greater the potential reward, the greater the risk.

For small companies, start-ups, resource companies and companies in emerging sectors, the risks and potential rewards are usually greater. The share price of such companies is often more volatile than the share price of larger, more established companies. Some of the products and services offered by technology companies, for example, can become obsolete as science and technology advance. Certain convertible securities may also be subject to interest rate risk. See "*Interest rate risk*".

## **ETF index risks**

A mutual fund may invest in exchange traded funds ("ETFs") which (i) invest in securities that are included in one or more indices in substantially the same proportion as those securities are reflected in a referenced index or indices, or (ii) invest in a manner that substantially replicates the performance of such a referenced index or indices, whether on a leveraged or unleveraged basis.

**Calculation and termination of the indices risk** - If the computers or other facilities of the index providers or a stock exchange malfunction for any reason, calculation of the value of the indices and the determination by the manager of the prescribed number of units or shares and baskets of securities may be delayed and trading in units or shares of the ETF may be suspended for a period of time. In the event that an index provider ceases to calculate the indices or the license agreement with the manager of an ETF is terminated, the manager of the ETF may terminate the relevant ETF, change the investment objective of the ETF or seek to replicate an alternative index (subject to investor approval in accordance with the ETF's constituting documents), or make such other arrangements as the manager determines.

**Cease trading of constituent securities risk** - If constituent securities of the indices are cease traded at any time by order of a stock exchange, a securities regulatory authority or other relevant regulator, the manager of the ETF may suspend the exchange or redemption of units or shares of the ETF until such time as the transfer of the securities is permitted by law.

**Index investment strategy risk** - The indices on which the ETFs are based were not created by the index providers for the purpose of the ETFs. The index providers have the right to make adjustments or to cease calculating the indices without regard to the particular interests of the manager of the ETF, the ETF or the investors in the ETF.

**Rebalancing and adjustment risk** - Adjustments to baskets of securities held by ETFs to reflect rebalancing of and adjustments to the underlying indices on which they are based will depend on the ability of the manager of the ETF and its brokers to perform their respective obligations. If a designated broker

fails to perform, an ETF would be required to sell or purchase, as the case may be, constituent securities of the index on which it is based in the market. If this happens, the ETF would incur additional transaction costs that would cause the performance of the ETF to deviate more significantly from the performance of such index than would otherwise be expected.

**Risk of not replicating the indices** - The ETFs will not replicate exactly the performance of the underlying indices on which they are based because the total return generated will be reduced by the management fee payable to the manager of the ETF and transaction costs incurred in adjusting the portfolio of securities held by the ETFs and other expenses of the ETFs, whereas such transaction costs and expenses are not included in the calculation of such indices. It is also possible that, for a short period of time, the ETFs may not fully replicate the performance of such indices due to the temporary unavailability of certain securities that are included in an index in the secondary market or due to other extraordinary circumstances.

**Tracking error risk** - Deviations in the tracking by an ETF of the index on which it is based could occur for a variety of reasons. For example, where an ETF tenders securities under a successful takeover bid for less than all securities of a constituent issuer and the constituent issuer is not taken out of the applicable index, the ETF would be required to buy replacement securities for more than the takeover bid proceeds. Adjustments to the basket of securities necessitated by the rebalancing of or adjustment to an index could affect the underlying market for constituent securities of the applicable index, which in turn would be reflected in the value of that index. Similarly, subscriptions for units or shares of an ETF by designated brokers and underwriters may impact the market for constituent securities of the index, as the designated broker or underwriter seeks to buy or borrow such securities to constitute baskets of securities to deliver to the ETF as payment for the units or shares to be issued.

### ***ETF industry sector risk***

A mutual fund may invest in ETFs that provide exposure to securities involving industry sector risks. Investing in one specific sector of the stock market entails greater risk (and potential reward) than investing in all sectors of the stock market. If a sector declines or falls out of favour, the share values of most or all of the companies in that sector will generally fall faster than the market as a whole. The opposite is also true. An industry can be significantly affected by, amongst other things, supply and demand, speculation, events relating to international political and economic developments, energy conservation, environmental issues, increased competition from other providers of services, commodity prices, regulation by various government authorities, government regulation of rates charged to customers, service interruption due to environmental, operational or other mishaps, the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards, and general changes in market sentiment. Moreover, it is possible that other developments, such as increasingly strict environmental and safety laws and regulations and enforcement policies thereunder and claims for damages to property or persons resulting from operations, could result in substantial costs and liabilities, delays or an inability to complete projects or the abandonment of projects. Exposure to equity securities that have exposure to commodity markets may entail greater volatility than traditional securities. The value of securities exposed to commodity markets may be affected by commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes and tariffs. The extent of these factors cannot be accurately predicted and will change from time to time, but a combination of these factors may result in issuers not receiving an adequate return on invested capital. Many industries are very competitive and involve many risks that even a combination of experience, knowledge and careful evaluation may not be able to overcome.

### ***Fixed income risk***

Fixed income securities are subject to risks resulting from changes in interest rates and from credit risk. See "*Interest rate risk*" and "*Credit risk*".

### ***Floating rate instruments risk***

A floating rate instrument is one whose terms provide for the adjustment of its interest rate whenever a specified benchmark changes. Floating rate instruments are frequently not rated by credit rating agencies. There may be no active secondary market with respect to a particular floating rate instrument purchased by a fund. The absence of such an active secondary market could make it difficult for a fund to dispose of the floating rate instrument involved in the event the issuer of the instrument defaulted on its payment obligations, and the fund could, for this or other reasons, suffer a loss in the event of a default by the issuer. Floating rate instruments may be secured by assets of the issuer, bank letters of credit or other assets. To the extent that a fund holds floating rate instruments, the fund's yield may decline, and it may forego the opportunity for capital appreciation during periods when interest rates decline; however, during periods when interest rates increase, a fund's yield may increase, and the fund may have reduced risk of capital depreciation. Please see "Interest rate risk" for additional risks related to investing in floating rate instruments.

### ***Foreign market risk***

The value of foreign investments may be affected by factors not typically associated with investments in Canada. For example, there may be less information about foreign companies, lower standards of government supervision and regulation, and different accounting and financial reporting standards in foreign financial markets. In addition, foreign investments sometimes cannot be sold as quickly or as easily as similar investments in Canada. Political, social and economic developments can also negatively affect the value of foreign investments. Investments in foreign markets may be subject to changes in currency exchange rates or exchange restrictions, the imposition of taxes or the expropriation of assets, all of which can affect the value of these investments. The value of mutual funds that invest in emerging markets may fluctuate more than those that invest in developed markets.

### ***Fund-on-fund risk***

Some funds (called individually a "Top Fund" and collectively, "Top Funds") invest in other mutual funds (called individually an "Underlying Fund" and collectively, "Underlying Funds"). Upon making such an investment, the Top Fund becomes subject to the risk of the Underlying Fund. A change in the investment objective strategy or holdings in an Underlying Fund may have an impact on the performance or management of the Top Fund. For example, if the Top Fund makes a significant investment or divestment in an Underlying Fund, the Underlying Fund may have to alter its portfolio significantly which may affect the net asset value, performance or diversification of the Underlying Fund. Although a fund-on-fund strategy may appear as a more passive investment strategy for a Top Fund, a change in the investment objective, strategy or holdings in an Underlying Fund may necessitate that an investment fund manager of the Top Fund engages in a rebalancing or reallocation of that Top Fund, which could have an effect on its performance, or diversification, or give rise to a taxable gain or loss. If the Underlying Funds do not perform as expected, a loss may be incurred by the Top Fund. If an Underlying Fund suspends redemptions, the Top Fund may be unable to value part of its portfolio and may be unable to redeem its units of the Underlying Fund which may have an adverse impact on the Top Fund. Where a Top Fund has invested in one or more Underlying Funds, the specific risks, assets, objectives and strategies of the Underlying Funds may not be mirrored in the Fund Details of the Top Fund provided that the Underlying Fund otherwise fits within the Top Fund's investment objective and strategy.

### ***Global pandemic risk***

Business, operations and the financial condition of the issuers of securities that a mutual fund invests in could be materially adversely affected by the outbreak of epidemics, pandemics or other health crises, such as the novel coronavirus COVID-19 that started in 2019. The international response to the spread of COVID-19 has resulted in the implementation of measures to contain the virus including quarantines, travel restrictions, and restrictions on the operation of stores and facilities in most of the world, including temporary closures in respect thereof. The negative economic impact of these measures together with the uncertainty of the situation led to significant volatility in equity markets, increasing the exposure of a fund, to risk, particularly liquidity risk, market risk and investment risk. While governmental initiatives to reduce the economic impact, ongoing research and development of vaccines, and the progress of vaccine rollouts may mitigate volatility, exposure to investment risk and financial results will

depend, to a large extent, on future developments and new information that may emerge regarding COVID-19, including in respect of any variants of COVID-19, which factors are beyond a mutual fund's control. Given the extent of and the evolving nature of the crisis, it is difficult to estimate the ultimate impact or duration of the situation on a mutual fund or the entities in which it invests.

### ***High yield securities risk***

A mutual fund may invest in high yield securities that are, at the time of purchase, rated below investment grade. High yield securities risk is the risk that securities rated below investment grade by a rating agency and/or determined by an investment fund manager may be more volatile than higher-quality securities of similar maturity. High yield securities may also be subject to greater levels of credit or default risk and may be traded on markets that are less liquid as compared to higher-quality securities. The value of high yield securities may be adversely affected by overall economic conditions such as an economic downturn or a period of rising interest rates, and high yield securities may be less liquid and more difficult to sell at an advantageous time or price, and more difficult to value than higher-rated securities. In particular, high yield securities are often issued by smaller, less creditworthy companies, or by highly leveraged (indebted) firms, which are generally less able than more financially stable firms to make scheduled payments of interest and principal. High yield securities may also be issued by sovereign governments of countries with economies, political systems, and/or financial markets that are not well developed.

### ***Income trust and REIT risk***

An income trust generally holds debt and/or equity securities of an underlying active business or is entitled to receive a royalty on revenues generated by such business. Distributions and returns on income trusts are neither fixed nor guaranteed. In addition, mutual funds that invest in income trusts such as oil, gas and other commodity-based royalty trusts, real estate investment trusts ("REITs") and pipeline and power trusts will have other varying degrees of risk depending on the sector and the underlying asset or business. These may include business developments such as a decision to expand into a new type of business, the entering into of an unfavourable supply contract, the cancellation by a major customer of its contract or significant litigation.

Many income trusts, including REITs are governed by laws of a province of Canada or of a state of the United States that limit the liability of unitholders of the income trust from a particular date. A mutual fund may also invest in income trusts, including REITs, in Canada, the US and other countries that are not governed by similar laws. There is a risk that unitholders of an income trust, which may include a mutual fund, could be held liable for any claims against the income trust that are not covered under these laws. This could reduce the value of a mutual fund. Income trusts generally try to minimize this risk by including provisions in their agreements that their obligations will not be personally binding on unitholders. However, the income trust still has exposure to damage claims not arising from contracts, such as personal injury and environmental claims in the case of REITs.

### ***Interest rate risk***

The values of fixed income securities, such as bonds, debentures or mortgages, are affected by interest rates. When interest rates fall, bond prices rise. That is because existing bonds pay higher rates than newly issued ones, and so are worth more. When interest rates rise, bond prices fall, and so will the unit value of mutual funds that hold them. In addition, if interest rates are relatively low, an issuer of a fixed income security may decide to prepay principal and the funds may have to reinvest this money in securities that have lower interest rates. The income earned by a mutual fund and the income paid by mutual funds to unitholders may also be affected by changes in interest rates. The value of equities is also influenced by interest rates in a similar manner as fixed income securities, but for different reasons. As interest rates fall the lower available return on fixed income securities tends to cause investors to migrate to equity securities. Reduced interest rates also allow companies to obtain financing at a lower cost, which can positively impact earnings. The opposite consequences tend to occur as interest rates rise.

### ***Lack of separate counsel risk***

Counsel for a fund in connection with its offering may also be counsel to the investment fund manager. The Unitholders, as a group, may not have been represented by separate counsel and counsel for the mutual fund and the investment fund manager would not purport to have acted for the Unitholders or to have conducted any investigation or review on their behalf.

### ***Large transaction risk***

Any large transaction made by an institutional or individual investor could significantly impact a mutual fund's cash flow. If the investor buys large amounts of units of a particular mutual fund, the mutual fund could temporarily have a high cash balance. Conversely, if the investor redeems large amounts of units of a particular mutual fund, the mutual fund may be required to fund the redemption by selling securities at an inopportune time. These liquidations may cause the mutual fund to incur losses if the mutual fund is required to sell investments at unfavourable prices and could substantially reduce the value of the fund if numerous redemptions are made at the same time. Such asset liquidation may also trigger tax consequences, such as the characterization of certain profits as ordinary income or losses rather than as capital gains or capital losses.

### ***Leverage risk***

As alternative mutual funds, the Funds are permitted under NI 81-102 to leverage their assets through borrowing, short sales and/or specified derivatives. Investment decisions may be made for the assets of the Funds that exceed the net asset value of the Funds. As a result, if these investment decisions are incorrect, the resulting losses will be more than if investments were made solely in an unleveraged long portfolio as is the case in most conventional equity mutual funds. In addition, leveraged investment strategies can also be expected to increase a Fund's turnover, transaction and market impact costs, interest and other costs and expenses.

Under the investment restrictions applicable to alternative mutual funds in NI 81-102, each Fund's aggregate gross exposure, calculated as the sum of the following, must not exceed three times the Fund's net asset value: (i) the aggregate value of outstanding indebtedness under any borrowing agreements; (ii) the aggregate market value of all securities sold short; and (iii) the aggregate notional value of the Fund's specified derivatives positions excluding any specified derivatives used for hedging purposes. If the Fund's aggregate gross exposure exceeds three times the Fund's net asset value, the Fund must, as quickly as is commercially reasonable, take all necessary steps to reduce the aggregate gross exposure to three times the Fund's net asset value or less.

### ***Liquidity risk***

Liquidity risk is the possibility that investments in a fund cannot be readily converted into cash when required.

A fund may invest in securities that are considered liquid or illiquid. There are, however, restrictions under applicable securities regulations on the amount of illiquid securities a mutual fund may hold.

Securities are considered illiquid if it is more difficult to convert the securities to a liquid investment, such as cash. Whether by law or by contract, illiquid securities cannot be readily disposed of through market facilities due to resale restrictions, or are securities that functionally hold no market price due to the divorce of their last quoted market price from the actual price that they can be sold at.

The value of a mutual fund that directly or indirectly holds illiquid securities may rise and fall substantially because the mutual fund or underlying fund may not be able to sell the securities for the value used in calculating the NAV of the mutual fund or underlying fund.

Liquidity risk may increase during disruptive events (economic, environmental, political, public health, terrorism, etc.) as such events may lead to more volatile markets. Securities previously considered liquid may also quickly

and unpredictably become illiquid, especially where debt securities are concerned, in markets that are highly volatile.

### ***Market risk***

The value of most investments, and in particular equity securities, is affected by changes in general market conditions. These changes may be caused by corporate developments, general market sentiment, changes in interest rates, changes in the level of inflation, and other political and economic developments.

### ***Net asset value risk***

The net asset value of each class of units that comprise a mutual fund may fluctuate with changes in the market value of the investments attributable to that class. Such changes in market value may occur as a result of various factors, including those factors identified above with respect to international investments and emerging market securities and material changes in the intrinsic value of an issuer whose securities are held by the mutual fund.

### ***No assurance of return risk***

Although a fund manager will use its best efforts to achieve superior rates of return for a mutual fund, no assurance can be given in this regard. An investment in units should

be considered speculative and investors must be able to bear the risk of a complete loss of their investment.

### ***Performance fee risk***

The investment fund manager of a mutual fund and/or certain underlying funds may receive a performance fee in respect of certain units of the mutual fund. Theoretically, the performance fee may create an incentive for the investment fund manager to make investments that are riskier than would be the case if such fee did not exist. In addition, if the performance fee is calculated on a basis that includes unrealized appreciation of a mutual fund's assets, it may be greater than if such compensation were based solely on realized gains.

### ***Portfolio manager risk***

All mutual funds are dependent on their portfolio management team to select individual securities and are therefore subject to the risk that poor security selection will cause a fund to underperform relative to other funds with similar investment objectives.

### ***Portfolio turnover risk***

The operation of a mutual fund may result in a high annual portfolio turnover rate. A mutual fund may not place any limit on the rate of portfolio turnover and portfolio securities may be sold without regard to the time they have been held when, in the opinion of the investment fund manager, investment considerations warrant such action. A high rate of portfolio turnover generally results in correspondingly greater expenses than a lower rate (e.g., greater transaction costs such as brokerage fees). The higher a mutual fund's portfolio turnover rate in a year, the greater the chance that a distribution from the mutual fund must be included in computing your income tax for tax purposes for that year.

### ***Potential conflicts of interest risk***

A mutual fund may be subject to various conflicts of interest due to the fact that an investment fund manager is engaged in a wide variety of management, advisory and other business activities. An investment fund manager's investment decisions for each mutual fund will be made independently of those made for the other funds managed by an investment fund manager and other clients of an investment fund manager and independently of its own investments. However, on occasion, an investment fund manager may make the same investment for a mutual fund

and one or more of the other funds managed by an investment fund manager or its other clients. Where the particular mutual fund and one or more of the other funds managed by an investment fund manager or clients of an investment fund manager are engaged in the purchase or sale of the same security, the transaction will be effected on an equitable basis. An investment fund manager will allocate opportunities to make and dispose of investments equitably among clients with similar investment objectives having regard to whether the security is currently held in any of the relevant investment portfolios, the relative size and rate of growth of the particular mutual fund and the other funds managed by an investment fund manager or clients under common management and such other factors as an investment fund manager considers relevant in the circumstances.

### ***Prepayment risk***

Many types of debt securities, including some mortgage backed securities and floating rate debt instruments, allow the issuer to prepay the principal prior to maturity. Debt securities subject to prepayment risk can offer less income and/or potential for capital gains.

### ***Prime broker risk***

Because a Fund may borrow cash for investment purposes, sell securities short and post margin as collateral for specified derivatives transactions, some of its assets may be held in one or more margin accounts from time to time. The margin accounts may provide less segregation of customer assets than would be the case with a more conventional custody arrangement. As a result, the assets of a Fund could be frozen and inaccessible for withdrawal or subsequent trading for an extended period of time if a prime broker experiences financial difficulty. In such case, a Fund may experience losses due to insufficient assets of the prime broker to satisfy the claims of its creditors. In addition, the possibility of adverse market movements while its positions cannot be traded could adversely affect the total return to a Fund.

### ***Private company risk***

There are risks associated with investing in private company securities. There is typically much less available information concerning private companies than for public companies. The valuation of private company securities is also more subjective and such securities are very illiquid as there are no established markets for the securities of these companies. As a result, in order to sell this type of holding, a fund may need to discount the securities from recent prices or dispose of the securities over a relatively long period of time.

### ***Rebalancing risk***

Rebalancing risk arises when the weights of two or more components of an overall portfolio are to be kept in a specific ratio, but the independent movement of each in the market demands that some of the components be bought or sold in order to restore the ratio back to its desired level. The greater the volatility of the components the greater the potential rebalancing required, and this leads to performance degradation over time.

### ***Regulatory risk***

Some industries, such as financial services, health care, telecommunications and resources, are heavily regulated and may receive government funding. Investments in these sectors may be substantially affected by changes in government policy, such as increased regulation, ownership restrictions, deregulation or reduced government funding. The value of a mutual fund that buys these investments may rise and fall substantially due to changes in these factors.

### ***Short selling risk***

A short sale by a mutual fund involves securities that it borrows from a lender that are then sold by the mutual fund in the open market. At a future date, the securities are repurchased by the mutual fund and returned to the lender. While the securities are borrowed, the proceeds from the sale are deposited with the lender and the mutual fund

pays interest to the lender. If the value of the securities declines between the time that the mutual fund borrows the securities and the time it repurchases and returns the securities to the lender, the mutual fund realizes a profit on the difference (less any interest the mutual fund is required to pay to the lender). Short selling involves risk. There is no assurance that securities will decline in value during the period of the short sale and result in a profit for a mutual fund. Securities sold short may instead appreciate in value, resulting in a loss for a mutual fund. Unlike a purchase of a share where the maximum amount of the loss is the amount invested, the size of the loss in respect of a short sale is unlimited as there is no limit on the amount a security sold short may increase in value. A mutual fund may experience difficulties repurchasing and returning the borrowed securities if a liquid market for the securities does not exist. The lender may also recall borrowed securities at any time. The lender from whom a mutual fund has borrowed securities may go bankrupt and a mutual fund may lose the collateral it has deposited with the lender. As an alternative mutual fund, the Fund will be permitted under applicable securities laws to sell securities short (provided that, among other things, the aggregate market value of the securities of the issuer of the securities sold short, other than government securities, does not exceed 10% of its NAV and the aggregate market value of the securities sold short does not exceed 50% of its NAV (or, subject to receipt of exemptive relief, 100% of its NAV)). See *"Policies and Procedures Related to Short Selling Risk Management"*.

### ***Small company risk***

The investment risk associated with small companies may be higher than that associated with larger, more established companies due to various factors, which may include the greater business risks associated with the small size of the company, relative inexperience of the company, limited product lines, distribution channels, financial or managerial resources. Further, there is typically less publicly available information concerning smaller companies than for larger, more established companies. The securities of small companies are often traded on junior markets such as the TSX Venture Exchange or over-the-counter markets and may not be traded in the volumes typical of trading on a major stock exchange and therefore there is greater liquidity risk – see *"Liquidity risk"*. The prices of this type of security may be more volatile than those of larger companies.

### ***Special-purpose acquisition company risk***

A mutual fund may invest a portion of its assets in the stock, warrants, and other securities of special-purpose acquisition companies ("SPACs") or similar special purpose entities that raise funds for the sole purpose of seeking potential acquisition opportunities. All assets (net of operating expenses) of the SPAC are invested in U.S. Government securities, money market fund securities and/or cash until an acquisition transaction is completed. Once the SPAC identifies a transaction, common holders have the right to vote on the transaction and also to decide whether to roll their equity in the transaction or redeem shares for their pro rata share of the escrow account holdings. Should the SPAC be unable to complete an acquisition that meets its defined requirements within a pre-established period of time, the invested funds are returned to the entity's shareholders. SPACs may have specific risks, including increased volatility, associated with the regions or industries for which they pursue an acquisition. Since a SPAC is a new entity created for the purpose of acquiring another company or entity, it may have limited or no business operating history; this makes the pricing and liquidity of the security dependent on management's ability to source and complete a profitable acquisition. Furthermore, these securities may trade in the over-the-counter market which may have associated issues with price sourcing and illiquidity.

### ***Style risk***

Each mutual fund is managed in accordance with a particular investment style. Focusing primarily on one particular investment style (e.g., value-oriented) to the exclusion of others may create risk in certain circumstances.

### ***Tax loss restriction event risk***

If a mutual fund experiences a "loss restriction event", (i) the fund will be deemed to have a year-end for tax purposes (which could result in the fund being subject to tax unless it distributes its income and capital gains prior to such year-end), and (ii) the fund will become subject to the loss restriction rules generally applicable to corporations that experience an acquisition of control, including a deemed realization of any unrealized capital losses and restrictions

on their ability to carry forward losses. Generally, a fund will be subject to a loss restriction event when a person becomes a “majority-interest beneficiary” of the fund, or a group of persons becomes a “majority-interest group of beneficiaries” of the fund, as those terms are defined in the affiliated persons rules contained in the Tax Act, with appropriate modifications. Generally, a majority-interest beneficiary of a fund will be a beneficiary who, together with the beneficial interests of persons and partnerships with whom the beneficiary is affiliated, has a beneficial interest in the fund that is greater than 50% of the fair market value of all the interests in the income or capital, respectively, in the fund. Generally, a person is deemed not to become a majority-interest beneficiary, and a group of persons is deemed not to be a majority-interest group of beneficiaries of a fund as the result of an acquisition or disposition of units of the fund if the fund qualifies as an “investment fund” under the rules, including that the fund meets certain investment requirements.

### ***Taxation policy risk***

The value of investments and the proceeds from investments are affected significantly by the taxation laws and policies applicable to the investment. Taxation laws are set by government and are subject to change from time to time without notice and such changes are beyond the control of an investment fund manager.

### ***U.S. regulation and tax risk***

If the offering and sale of units of a mutual fund (i) has not been registered under the U.S. Securities Act or any similar U.S. state law, (ii) is not relying upon any exemption therefrom, or (iii) is for a fund that is not required to be registered under the United States Investment Company Act of 1940, as amended (the “U.S. Investment Company Act”), then accordingly, unitholders may not have the benefits afforded generally by the provisions of the U.S. Investment Company Act (which, among other matters, require investment companies to have a majority of disinterested directors, require securities held in custody at all times to be individually segregated from the securities of any other person and marked to clearly identify such securities as the property of such investment company and regulate the relationship between the adviser and the investment company). A fund manager may be exempt from registration with the United States Securities and Exchange Commission pursuant to the United States Investment Advisers Act of 1940, as amended, and would therefore not be subject to the recordkeeping and other requirements thereunder.

An investment in a mutual fund by a person subject to taxation under the United States Internal Revenue Code of 1986, as amended, may have United States tax consequences. Such taxpayers should consult their tax advisors about the income tax consequences of acquiring or holding units.

### ***Volatility risk***

The value of securities in a Fund's portfolio may fluctuate, sometimes rapidly and unpredictably. The value of a security may fluctuate due to factors affecting markets generally or certain industries in particular. This volatility may impact a Fund's net asset value and the market price of the units of a Fund. Securities in a Fund's portfolio may be subject to price volatility and the prices may be more volatile than the market as a whole. Events or financial circumstances affecting individual securities or sectors may increase the volatility of a Fund.

Each Fund described in this Simplified Prospectus is established as a mutual fund trust.

## **INVESTMENT RESTRICTIONS**

This Simplified Prospectus contains detailed descriptions of the investment objectives, investment strategies and investment risks for each of the Funds. In addition, the Funds are subject to certain restrictions and practices contained in securities legislation, including NI 81-102, which are designed, in part, to ensure that the investments of mutual funds are diversified and relatively liquid and to ensure the proper administration of the Funds. The Funds will be managed in accordance with these restrictions and practices. The Funds will obtain relief from the securities regulatory authorities before implementing any variations from these restrictions and practices. A copy of the

investment restrictions and practices applicable to and adopted by the Funds may be obtained from the Manager upon request.

The fundamental investment objectives of each of the Funds are set out in this Simplified Prospectus. Any change in the investment objectives of a Fund requires the approval of a majority of Unitholders at a meeting called for that purpose. We may change a Fund's investment strategies from time to time at our sole discretion.

See "Exemptions and Approvals" above for a description of all exemptions from, or approval in relation to NI 81-102 obtained by the Funds or the Manager that will or will continue to be relied on by the Funds or the Manager.

None of the Funds has or will engage in any undertaking other than the investment of its fund property for purposes of the Tax Act. Each of the Funds which is or becomes a registered investment will not acquire an investment which is not a "qualified investment" under the Tax Act if, as a result thereof, the Fund would become subject to a material amount of tax under Part X.2 of the Tax Act.

## DESCRIPTION OF UNITS OFFERED BY THE FUNDS

### General

The Funds are authorized to have an unlimited number of classes of units and may issue an unlimited number of units of each class. The following table lists the classes each Fund has created and authorized, and offers for purchase under this Simplified Prospectus:

Fund	Classes Authorized	Classes Offered for Purchase*
Pender Alternative Absolute Return Fund	A, A (US\$), AF, E, F, F (US\$), FF, H, H (US\$), I, I (US\$), N, O	A, A (US\$), AF, E, F, F (US\$), FF, H, H (US\$), I, I (US\$), N, O
Pender Alternative Arbitrage Fund	A, A (US\$), AF, E, F, (US\$), FF, H, H (US\$), I, I (US\$), N, O	A, A (US\$), AF, E, F, (US\$), FF, H, H (US\$), I, I (US\$), N, O
Pender Alternative Arbitrage Plus Fund	A, A (US\$), E, F, (US\$), H, H (US\$), I, I (US\$), N, O	A, A (US\$), E, F, (US\$), H, H (US\$), I, I (US\$), N, O
Pender Alternative Multi-Strategy Income Fund	A, E, F, H, I, N, O	A, E, F, H, I, N, O
Pender Alternative Special Situations Fund	A, E, F, H, I, N, O	A, E, F, H, I, N, O

\* Effective as of February 11, 2022 for Pender Alternative Arbitrage Fund and March 31, 2022 for Pender Alternative Absolute Return Fund, we discontinued the sale of Class AF and Class FF units, but continue to reserve the right to resume selling of these classes at any time.

The classes authorized by the Funds are set forth under the heading “*Fund Details*” of each Fund below.

This Simplified Prospectus only qualifies the distribution of each of the units of the Funds set forth on the cover of this document (and in respect of the units of Pender Alternative Multi-Strategy Income Fund and Pender Alternative Special Situations Fund, effective as of the Conversion Date).

Without your consent or notice to you, the Manager may establish additional classes of units of the Funds and may determine the rights as between those classes. The principal differences between the classes of units of each of the Funds relate to the management fees payable to Pender. These are described under “*Fees and Expenses*” and “*Dealer Compensation*”. There may also be differences between classes of units relating to the currency in which the units are denominated and/or whether or not the classes are hedged, as described below.

All units of each Fund are entitled to participate in that respective Fund’s assets on liquidation on a class basis. All classes of units are issued as fully paid and non-assessable and are redeemable at their net asset value at the time of redemption.

### ***Class A / Class A (US\$) / and Class AF units***

Class A, Class A (US\$) and Class AF units are available to all investors, subject to certain minimum initial and purchase requirements, which can be found under the “*Purchases*” section. Class A (US\$) units are denominated in US dollars.

Effective as of February 11, 2022 for Pender Alternative Arbitrage Fund and March 31, 2022 for Pender Alternative Absolute Return Fund, we discontinued the sale of Class AF units, but continue to reserve the right to resume selling of these classes at any time.

The management fees, and performance fees, if any, relating to a class of units of a Fund are described under the heading “*Fund Details*” of each Fund below

Effective June 1, 2022, Class A and Class A (US\$) units are no longer be available to investors who hold these units in an account with an order entry only (“OEO”) Dealer or any other Dealer that does not make a suitability determination. On or before this date, we or your Dealer have sold your Class A or Class A (US\$) units or reclassified them to Class F or Class F (US\$) units. See “*Dealer Compensation – Trailing Commissions*” for more details. There may be tax implications arising from any sale. See “*Income Tax Considerations*” for more details.

### ***Class E units***

Class E units are available to Pender and its affiliates’ employees and directors and their family members, subject to certain minimum initial and purchase requirements, which can be found under the “*Purchases*” section.

Pender charges a lower management fee on the Class E units because our distribution and servicing costs are reduced for that class. The management fees relating to a class of units of a Fund are described under the heading “*Fund Details*” of each Fund below.

### ***Class F, Class F (US\$) / and Class FF Units***

Class F, Class F (US\$) and Class FF units are for investors who are participants in a fee-for-service or wrap account program sponsored by certain registered dealers, including OEO Dealers or other Dealers that do not make a suitability determination. Class F, Class F (US\$) and Class FF units can be purchased under this Simplified

Prospectus only through an investment advisor who has obtained the consent of Pender to offer units of these classes. Class F (US\$) units are denominated in US dollars.

Effective as of February 11, 2022 for Pender Alternative Arbitrage Fund and March 31, 2022 for Pender Alternative Absolute Return Fund, we discontinued the sale of Class FF units, but continue to reserve the right to resume selling of these classes at any time.

If Pender is notified that you no longer meet the eligibility criteria, we will sell or reclassify your Class F, Class F (US\$), or Class FF units in accordance with the instructions from your investment advisor. In the absence of instructions, we may automatically sell or reclassify your Class F units to Class A units and/or your Class FF units to Class AF units, and/or your Class F (US\$) units to Class A (US\$) units. There may be tax implications arising from any sale. See "*Income Tax Considerations*" for more details. It is important to note that there is no unhedged class available to investors who do not participate in a fee-for-service or wrap account program sponsored by certain registered dealers.

Pender charges a lower management fee on the Class F, Class F (US\$), and Class FF units because our distribution and servicing costs are reduced for that class. The management fees and performance fees relating to a class of units of the Funds are described under "*Fund Details*" of each Fund below.

### ***Class H / Class H (US\$) Units***

Class H and Class H (US\$) units are available to all investors, subject to certain minimum initial and purchase requirements, which can be found under the "*Purchases*" section. Class H (US\$) units are denominated in US dollars.

If Pender is notified that you no longer meet the eligibility criteria, we will sell or reclassify your Class H or Class H (US\$) units in accordance with the instructions from your investment advisor. In the absence of instructions, we may automatically sell your Class H or Class H (US\$) units or reclassify them to Class A or Class A (US\$) units, respectively. There may be tax implications arising from any sale. See "*Income Tax Considerations*" for more details.

Pender charges a lower management fee on the Class H and Class H (US\$) units because our distribution and servicing costs are reduced for that class. The management fees relating to a class of units of a Fund are described under the heading "*Fund Details*" of each Fund below.

Effective June 1, 2022, Class H and Class H (US\$) units are no longer be available to investors who hold these units in an account with an OEO Dealer or any other Dealer that does not make a suitability determination. On or before this date, we or your Dealer may sell your Class H or Class H (US\$) units or reclassify them to Class I or Class I (US\$) units. See "*Dealer Compensation – Trailing Commissions*" for more details. There may be tax implications arising from any sale. See "*Income Tax Considerations*" for more details

### ***Class I / Class I (US\$) Units***

Class I and Class I (US\$) units are for investors who are participants in a fee-for-service or wrap account program sponsored by certain registered dealers (including OEO Dealers or any other Dealer that does not make a suitability determination), subject to certain minimum initial and purchase requirements, which can be found under the "*Purchases*" section. Class I and Class I (US\$) units can be purchased under this Simplified Prospectus only through your investment advisor who has obtained the consent of Pender to offer these classes of units. Class I (US\$) units are denominated in US dollars.

If Pender is notified that you no longer meet the eligibility criteria, we will sell or reclassify your Class I or Class I (US\$) units in accordance with the instructions from your investment advisor. In the absence of instructions, we may automatically sell your Class I or Class I (US\$) units or reclassify them to Class F or Class F (US\$) units, respectively. There may be tax implications arising from any sale. See "*Income Tax Considerations*" for more details.

Pender charges a lower management fee on the Class I and Class I (US\$) units because our distribution and servicing costs are reduced for that class. The management fees and performance fees relating to a class of units of a Fund are described under the heading “*Fund Details*” of each Fund below.

### ***Class N Units***

Class N units are available to institutional investors and other qualified investors, subject to certain minimum initial and purchase requirements, which can be found under the “*Purchases*” section. Units of these classes are not sold to the general public.

Pender charges a lower management fee on the Class N units because our distribution and servicing costs are reduced for that class. The management fees and performance fees relating to a class of units of the Funds are described under the heading “*Fund Details*” of each Fund below.

### ***Class O Units***

Class O units are available to institutional investors and other qualified investors and are not sold to the general public.

The management fees and performance fees relating to a class of units of the Funds are described under the heading “*Fund Details*” of each Fund below . Performance fees are not applicable for Class O Units.

### **Meetings of Unitholders**

The Funds do not hold regular meetings. Unitholders are entitled to vote on all matters that require Unitholder approval under NI 81-102 or under the Declaration of Trust. Some of these matters are:

- The introduction of a fee or expense, or a change in the basis of the calculation of a fee or expense, that is or is to be charged to the Fund or directly to its Unitholders by the Fund or the Manager in connection with the holding of units of the Fund, in a way that could result in an increase in charges to the Fund or to its Unitholders;
- A change of the Manager, unless the new manager is an affiliate of the Manager;
- A change in the fundamental investment objectives of the Fund;
- A decrease in the frequency of the calculation of the Series NAV per unit of the Fund; and
- Certain material reorganizations of the Fund.

Approval of these matters requires an affirmative vote of at least a majority of the Unitholders present at a meeting called to consider these matters.

## **NAME, FORMATION AND HISTORY OF THE FUNDS**

### **Name**

This Simplified Prospectus contains information concerning the following mutual funds:

**Pender Alternative Absolute Return Fund**  
**Pender Alternative Arbitrage Fund**  
**Pender Alternative Arbitrage Plus Fund**  
**Pender Alternative Multi-Strategy Income Fund (formerly, Pender Value Fund II)**  
**Pender Alternative Special Situations Fund (formerly, Pender Special Situations Fund)**

Each of the Funds is managed by PenderFund Capital Management Ltd. The Manager manages other mutual funds, investment funds and venture funds, and may organize new mutual funds, investment funds or venture funds in the future.

Information contained in this document as it relates to and in respect of Pender Alternative Multi-Strategy Income Fund and Pender Alternative Special Situations Fund applies effective as of the Conversion Date, being the date on which such Funds converted from conventional mutual funds to alternative mutual funds. For further details on the conversion of these Funds, see the management information circulars dated June 23, 2022, which are available on the SEDAR profiles of such Funds at [www.sedar.com](http://www.sedar.com).

### Head Office

The head office of the Funds and the Manager is located at 1830 – 1066 West Hastings Street, Vancouver, BC V6E 3X2.

### Formation and History of the Funds

Each Fund is an open-end investment trust governed under the laws of the province of British Columbia pursuant to the **Nineteenth (19<sup>th</sup>)** Amended and Restated Mutual Fund Trust Agreement dated **XXI, 2022** (originally dated April 14, 2009) (the “**Trust Agreement**”) between Pender, in its capacity as manager of the Funds, and Pender, in its capacity as trustee of the Pender Funds.

The following table outlines the history of, and material amendments to the Trust Agreement in the last 10 years, as it pertains to the Funds:

Amendment Number	Date of Amendment	Material Amendments
Fifteenth (15 <sup>th</sup> )	July 19, 2021	<ul style="list-style-type: none"> <li>Added new funds, Pender Alternative Absolute Return Fund and Pender Alternative Arbitrage Fund</li> </ul>
Sixteenth (16 <sup>th</sup> )	December 22, 2021	<ul style="list-style-type: none"> <li>Added new conventional mutual fund, Pender Emerging Markets Impact Fund</li> </ul>
Seventeenth (17 <sup>th</sup> )	June 20, 2022	<ul style="list-style-type: none"> <li>Added additional classes and removed closed classes to certain conventional mutual funds</li> </ul>
Eighteenth (18 <sup>th</sup> )	July 26, 2022	<ul style="list-style-type: none"> <li>Added new fund, Pender Alternative Arbitrage Plus Fund</li> </ul>
<b>[Nineteenth (19<sup>th</sup>)]</b>	<b>[●], 2022</b>	<ul style="list-style-type: none"> <li><b>[Added additional classes to Pender Alternative Absolute Return Fund and Pender Alternative Arbitrage Fund]</b></li> <li><b>[Reflected investment objective and name change for Pender Alternative Multi-Strategy Income Fund (formerly, Pender Value Fund II) and Pender Alternative Special Situations Fund (formerly, Pender Special Situations Fund)]</b></li> <li><b>[Added additional class to Pender Alternative Multi-Strategy Fund (formerly, Pender Value Fund II)]</b></li> </ul>

The Trust Agreement may be examined by Unitholders at the head office of the Manager during regular business hours. You can contact the Manager at **1-866-377-4743** or email **info@penderfund.com** for more details. The Trust Agreement can also be found on the SEDAR website at **www.sedar.com**.

On the Conversion Date, Pender Value Fund II converted from a conventional mutual fund to an alternative mutual income fund (the “**PVFII Conversion**”) and, in connection therewith, Pender Value Fund II was renamed Pender Alternative Multi-Strategy Income Fund. Unitholders approval was obtained at a special meeting of unitholders held on July 22, 2022 to change the fundamental investment objectives of the Fund to reflect the PVFII Conversion, and in connection therewith, change the fee structure of the Fund to implement certain performance based fees, which fees are described under “Fund Details” applicable to the Fund. The investment strategies of the Fund were also amended on the Conversion Date in order implement the Fund’s new investment objectives.

On the Conversion Date, Pender Special Situations Fund converted from a conventional mutual fund to an alternative mutual fund (the “**PSSF Conversion**”) and, in connection therewith, Pender Special Situations Fund was renamed Pender Alternative Multi-Strategy Income Fund. Unitholders approval was obtained at a special meeting of unitholders held on July 22, 2022 to change the fundamental investment objectives of the Fund to reflect the PSSF Conversion, and in connection therewith, change the fee structure of the Fund to implement certain performance based fees, which fees are described under “Fund Details” applicable to the Fund. The investment strategies of the Fund were also amended on the Conversion Date in order implement the Fund’s new investment objectives.

## **INVESTMENT RISK CLASSIFICATION METHODOLOGY**

We assign an investment risk level to each Fund as an additional guide to help you decide whether a Fund is right for you. The investment risk level of the Funds is required to be determined in accordance with a standardized risk classification methodology that is based on each Fund’s historical volatility as measured by the 10-year standard deviation of the returns of the Fund, assuming the reinvestment of all income and capital gains distributions in additional units of the Fund. However, you should be aware that other types of risk, both measurable and non-measurable, may exist. It is also important to note that a Fund’s historical volatility may not be indicative of its future volatility.

Using this methodology, we assign each Fund an investment risk level in one of the following categories: low, low to medium, medium, medium to high, or high risk. However, we may increase the investment risk level of a Fund determined by reference to the Fund’s standard deviation if we believe that doing so is reasonable in the circumstances by taking into account other qualitative factors, including, but not limited to, economic climate, portfolio management styles, sector concentration and types of investments made by a Fund and the liquidity of those investments.

For the Funds that have less than a 10-year performance history, the standardized methodology requires the use of the standard deviation of a reference mutual fund or reference index that reasonably approximates or, for a newly established fund, is reasonably expected to approximate, the standard deviation of the Fund. The reference mutual fund or reference index used to determine the risk rating of a Fund is specified under the heading “Fund Details” of each Fund below.

The investment risk level assigned to a Fund is based on the standard deviation ranges set out in NI 81-102 and reproduced below:

Standard Deviation Range (%)	Investment Risk Level
0 to less than 6	Low
6 to less than 11	Low to Medium
11 to less than 16	Medium
16 to less than 20	Medium to High
20 or greater	High

The investment risk level of each Fund is reviewed at least annually and anytime we determine that the current investment risk level is no longer reasonable in the circumstances.

A copy of the standardized risk classification methodology that we use to identify the investment risk level of the Funds is available on request and at no cost, by calling **1-866-377-4743**, by emailing **info@penderfund.com**, or by writing to us at the address of our head office in Vancouver, British Columbia, noted on the back cover of this document.

## **EXPLANATORY INFORMATION**

You will find detailed descriptions of each of the Funds in this part of this Simplified Prospectus. The following is an explanation of what you will find under each heading.

### **Fund Details**

This tells you:

- Fund type: the type of mutual fund
- Investment risk level: the investment risk level assigned to a Fund by the Manager
- Benchmark index
- Registered plan eligibility: whether the Fund is a qualified investment for a registered plan
- Management fee: the fee payable to the Manager and, where applicable, its affiliates, for management of the Fund

### **What Does the Fund Invest In?**

This section outlines the investment objectives and the principal investment strategies that the Portfolio Advisor uses to achieve the Fund's investment objectives.

We cannot change a Fund's fundamental investment objective unless we obtain approval from a majority of unitholders who vote at a meeting. Investment strategies may be changed, from time to time, without notice to, or consent of, unitholders.

### **What are the Risks of Investing in the Fund?**

This section identifies the investment risks specific to the Fund, which should be considered by you before making an investment in the Fund.

In addition, for a Fund with less than a 10-year performance history, disclosure is provided regarding the reference index used to reasonably approximate the standard deviation of the Fund to approximate the returns for the purposes of determining the Fund's investment risk level, as described in the *Investment Risk Classification Methodology* section above.

### **Distribution policy**

This tells you how often you will receive a distribution and how it is paid. Each Fund makes distributions to Unitholders if and when it has amounts to distribute. Distributions on units from all of the Funds are automatically reinvested in additional units of the same Fund, unless you tell us in writing that you prefer to receive cash. There may be adverse tax consequences associated with withdrawing cash from a registered plan.

Each of the Funds has the ability to make distributions as returns of capital.

# Pender Alternative Absolute Return Fund

## PENDER ALTERNATIVE ABSOLUTE RETURN FUND

### Fund Details

Fund Type	Alternative Absolute Return
Investment Risk Level	Low
Benchmark	HFRI Credit Index (Hedged to CAD)
Eligible for Registered Plans?	The units are eligible investments for Registered Plans

Securities Offered	Start Date	Management Fee (exclusive of GST/HST)
Class A units	August 25, 2021	1.80%
Class A (US\$) units	August [XX], 2022	1.80%
Class AF units	August 25, 2021	1.15%
Class E units	August [XX], 2022	Negotiable – maximum 1.80%
Class F units	August 25, 2021	0.80%
Class F (US\$) units	August [XX], 2022	0.80%
Class FF units	August 25, 2021	0.15%
Class H units	August 25, 2021	1.50%
Class H (US\$) units	August [XX], 2022	1.50%
Class I units	August 25, 2021	0.65%
Class I (US\$) units	August [XX], 2022	0.65%
Class N units	August 25, 2021	0.30%
Class O units	August 25, 2021	Negotiable – maximum 1.80%
Performance fee (exclusive of GST/HST)	Performance fees apply to all classes of units. For Class O units, this fee is or will be charged directly to Unitholders, as applicable. Performance fees equal 15% of the amount by which the total return of the class of units exceeds a 3% hurdle rate, for the period since the performance fee was last paid, subject to accumulation in years where no performance fee is paid, provided that the total return of the relevant class of units for such period exceeds the previous high-water mark.	

### What Does the Fund Invest In?

#### *Investment Objectives*

The objective of the Pender Alternative Absolute Return Fund is to maximize absolute returns over a complete market cycle by providing long-term capital growth and income, with low volatility of returns. The

## Pender Alternative Absolute Return Fund

Fund will invest primarily in a portfolio of North American fixed income securities but may also invest in foreign and other securities.

The Fund falls within the definition of an “alternative mutual fund” as set out in NI 81-102, as it is permitted, as modified by exemptive relief received by the Fund, to use strategies generally prohibited by other types of mutual funds, such as the ability to invest more than 10% of its NAV in securities of a single issuer (up to 20%), either directly or through the use of specified derivatives, the ability to borrow cash, when aggregated with the value of all outstanding borrowing, up to 100% of its NAV, to use for investment purposes, the ability to sell securities short (provided that the aggregate market value of the securities of the issuer of the securities sold short, other than government securities, does not exceed 10% of its NAV and the aggregate market value of the securities sold short does not exceed 100% of its NAV), and the ability to use leverage through the use of cash borrowing, short selling and specified derivatives. The maximum aggregate exposure to these sources of leverage, as calculated in accordance with section 2.9.1 of NI 81-102, shall not exceed 300% of the Fund’s NAV.

The fundamental investment objective of the Fund may only be changed with the approval of the Independent Review Committee and a simple majority of the votes cast by the Unitholders of all classes of units of the Fund at a meeting called for that purpose.

### ***Investment Strategies***

To achieve the Fund’s investment objectives, the Manager will utilize fundamental research to identify attractive risk adjusted return opportunities in individual investments within a diversified portfolio.

The Fund will invest primarily in North American fixed income and credit securities as well as other instruments. This can include, but is not limited to high yield bonds, investment grade corporate bonds, government bonds, syndicated loans, structured products, preferred shares, convertible bonds & debentures, common shares, exchange traded funds, derivative products and other income generating securities.

The Manager may choose to sell a security short if, in the opinion of the Manager, the risk adjusted return potential of selling that security short offers an attractive opportunity. Short selling can be an effective tool to generate absolute returns and to hedge unwanted market risk. The Manager may also short sell securities with unattractive fundamental characteristics.

The Manager will, from time to time, and among other strategies:

- Utilize fundamental credit research to identify securities believed to offer attractive risk adjusted returns based on the Manager’s view of an issuer’s ability to maintain and/or improve its credit metrics.
- Invest in corporate bonds, while short selling Government Securities to reduce interest rate sensitivity.
- Invest in fundamental long positions in equity securities that offer attractive risk adjusted return potential.
- Employ event driven strategies to capture attractive opportunities related to a company specific action or market event.
- Combine a long and a short position in an issuer’s senior debt, junior debt, common stock or preferred stock.

## Pender Alternative Absolute Return Fund

- Combine a long position in particular issuer, index, sector, or segment of the market with a short position in the debt of the same issuer, index, sector or segment of the market.
- Combine a long position in an issuer's convertible securities, including convertible bonds/debentures, warrants, and convertible preferred shares, with a short position in its common stock.

To execute these strategies, the Manager may use warrants, exchange traded funds and derivatives such as options, forward contracts, futures contracts and swaps to hedge against losses from changes in the prices of the Fund's investments and from exposure to foreign currencies, gain exposure to individual securities and markets instead of buying the securities directly, and/or generate income. The gross aggregate amount of the notional amount of the Fund's exposure under its specified derivatives positions, together with the Fund's cash borrowing and short selling is limited to 300% of its NAV.

The Manager may invest the majority of assets of the Fund in cash or cash equivalents, depending on the investment opportunities available.

The Fund may borrow cash of up to a maximum of 100% of its NAV when aggregated with the value of all outstanding borrowing, and the Fund's gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives is limited to 300% of its NAV.

The Fund may carry out all or part of its strategy by investing up to 100% of its assets in funds managed and/or its affiliates or associates, and/or units of other investment funds, as selected by the Manager in its sole discretion.

The Fund's investment strategies involve active and frequent trading of portfolio securities. In any year, the higher a fund's portfolio turnover rate, the greater the trading costs payable by the fund in the year and the larger the capital gains distribution may be. There is not necessarily a relationship between a high portfolio turnover rate and the performance of a fund.

### ***Assets of the Fund***

Over time, the assets of the Fund are expected to be, or could be, comprised of the following securities:

#### ***Cash and cash equivalents***

The Fund may hold significant cash and cash equivalents when the Manager considers it desirable as a result of market conditions.

#### ***Cash borrowing***

The Fund may borrow cash of up to a maximum of 100% of its NAV when aggregated with the value of all outstanding borrowing, and the Fund's gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives is limited to 300% of its NAV.

#### ***Closed end funds***

The Fund may invest directly or indirectly in closed end funds to the extent allowed under NI 81-102.

#### ***Debt securities***

## Pender Alternative Absolute Return Fund

The Fund may invest in non-investment grade and investment grade corporate debt, convertible debt in public companies, and securities issued by government entities either directly or indirectly by virtue of its purchasing units of funds managed and/or units of other investment funds.

### ***Derivatives***

Subject to the restriction described in the section entitled “*Policies and Procedures Related to Derivatives Trading*”, the portfolio advisor may, in its discretion, invest the Fund’s assets in or use derivative instruments from time to time for hedging and non-hedging purposes. When derivatives are used for hedging purposes, they are used as a means of hedging currency exposure and risk in the securities and businesses in which the portfolio advisor has invested to protect against losses.

Class A (US\$), Class F (US\$), Class H (US\$), and Class I (US\$) units of the Fund are substantially hedged against changes in the Canadian currency relative to the US currency and the remaining classes of the Fund are substantially hedged against changes in the US currency relative to the Canadian currency. The Fund substantially hedges against the impact of fluctuations between the Canadian and US currencies on performance. These classes will be substantially hedged using derivative instruments such as foreign currency forward contracts.

Where derivatives are used for non-hedging purposes, they are used either to substitute for direct investment or to generate income. The portfolio advisor may make use of clearing corporation options, futures contracts, listed warrants, options on futures, over-the-counter options, forward contracts, debt-like securities and listed warrants for hedging, and non-hedging purposes. Investing in and using derivative instruments are subject to certain risks. Further details on these risks are described below in the section entitled “*What are the risks of investing in the Fund?*”

Even if the Fund does not engage directly in derivatives the Fund may gain exposure to derivatives by virtue of its purchasing units of funds managed by the Manager and/or units of other investment funds.

### ***Marketable securities***

The Fund may also invest in marketable securities such as common shares, preferred shares, publicly-traded units of investment trusts, including, but not limited to, mutual fund trusts and REITs, stock warrants and rights that are consistent with the Fund’s investment objectives and strategies.

### ***Mutual funds***

The Fund may carry out all or part of its strategy by purchasing units of funds managed by the Manager and/or units of other investment funds, including units of ETFs, with target percentages to be determined from time to time by the Manager

### ***Other investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed by the Manager and/or units of other investment funds, long or short positions in foreign common stocks, trust units, securities of private issuers, syndicated loans and other securities or financial instruments, including those of investment companies.

### ***Private unlisted investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed by the Manager and/or units of other investment funds, private unlisted investments but will limit

## Pender Alternative Absolute Return Fund

the amount invested in private unlisted investments to a maximum of up of 10% of the net assets of the Fund.

### ***Risk arbitrage***

The Fund may engage in risk arbitrage investing. Risk arbitrage investing involves the pursuit of profits from an announced corporate event, such as the sale of a company, a merger, a recapitalization, a reorganization, a liquidation or a self-tender. The financial results from this type of investment approach depend more on corporate action than on overall stock market behaviour.

### ***Short selling***

The Fund may also engage in short selling securities. For more information on short selling and the limits within which the Fund may engage in short selling, see the section *“Policies and Procedures Related to Short Selling Risk Management”*.

## **What are the Risks of Investing in the Fund?**

As noted above, the Fund is considered an “alternative mutual fund” which means that, under NI 81-102, it is permitted to invest in asset classes and use investment strategies that are not permitted for other types of mutual funds. As a result of such investment strategies, the Fund is subject to the following key risks as described in Part B of this document:

- Business risk
- Call risk
- Changes in legislation risk
- Class risk
- Closed end fund risk
- Commodity risk
- Concentration risk
- Counterparty risk
- Credit risk
- Currency, foreign exchange and hedging risk
- Cybersecurity and business continuity risk
- Derivative risk
- Equity risk
- ETF index risks
- ETF industry sector risk
- Fixed income risk
- Floating rate instruments risk
- Foreign market risk
- Fund-on-fund risk
- Global pandemic risk
- High yield securities risk
- Income trust and REIT risk
- Interest rate risk
- Lack of separate counsel risk
- Large transaction risk
- Leverage risk
- Liquidity risk
- Market risk
- Net asset value risk
- No assurance of return risk
- Performance fee risk
- Portfolio manager risk
- Portfolio turnover risk
- Potential conflicts of interest risk
- Prepayment risk
- Prime broker risk
- Private company risk
- Rebalancing risk
- Regulatory risk
- Short selling risk
- Small company risk
- Special-purpose acquisition company risk
- Style risk
- Tax loss restriction event risk
- Taxation policy risk
- U.S. regulation and tax risk
- Volatility risk

For a detailed description of these mutual fund risks, see *“What are the Specific Risks of Investing in a Mutual Fund?”*.

## Pender Alternative Absolute Return Fund

As part of its investment strategy, the Fund may invest in units of Underlying Funds. See the “*Fund-on-fund risk*” section for more information.

Because this Fund has less than a 10-year performance history, a reference index that reasonably approximates the standard deviation of the Fund has been used to approximate the returns for the purposes of determining the investment risk level, as described in the “*Investment Risk Classification Methodology*” section.

Reference Index	Description
HFRI Credit Index (Hedged to CAD)	HFRI Credit Index is a composite index of strategies trading primarily in credit markets. It is an equal-weighted aggregation of following 7 HFRI sub strategy indices. HFRI ED: Credit Arbitrage Index, HFRI ED: Distressed/Restructuring Index, HFRI ED: Multi-Strategy Index, HFRI RV: Fixed Income-Asset Backed Index, HFRI RV: Fixed Income-Convertible Arbitrage Index, HFRI RV: Fixed Income-Corporate Index, and HFRI RV: Multi-Strategy Index.

### Distribution Policy

The Fund distributes its net investment income monthly and its net realized capital gains annually in December of each year. The Manager may make distributions from the Fund to Unitholders in the amount of a target annualized distribution rate of the net asset value of each class of units of the Fund annually. The Manager may change the target annualized distribution rate at any time. Distributions may consist of net investment income, net realized capital gains and/or a return of capital. Distributions are automatically reinvested in additional units of the Fund at no charge or, upon request, paid out in cash to the Unitholder.

## Pender Alternative Arbitrage Fund

### PENDER ALTERNATIVE ARBITRAGE FUND

#### Fund Details

Class O units	August 25, 2021	Negotiable – maximum 1.80%
Performance fee (exclusive of GST/HST)	Performance fees apply to all classes of units. For Class O units, this fee is or will be charged directly to Unitholders, as applicable. Performance fees equal 15% of the amount by which the total return of the class of units exceeds its high-water mark for the period since the performance fee was last paid.	

#### What Does the Fund Invest In?

##### *Investment Objectives*

The investment objective of the Fund is to generate consistent, positive returns, with low volatility and low correlation to equity markets by investing primarily in North American securities. The Fund may also invest in foreign and other securities.

## Pender Alternative Arbitrage Fund

As mentioned above, the Fund falls within the definition of an “alternative mutual fund” set out in NI 81-102 as it is permitted to invest in asset classes such as physical commodities and specified derivatives and to use strategies generally prohibited for other types of mutual funds, such as, among other things, the ability to invest up to 20% of its net asset value (“NAV”) in securities of a single issuer (rather than 10% for conventional mutual funds), the ability to borrow cash, when aggregated with the value of all outstanding borrowing, up to 50% of its NAV to use for investment purposes, the ability to sell securities short (provided that the aggregate market value of the securities of the issuer of the securities sold short, other than government securities, does not exceed 10% of its NAV and the aggregate market value of the securities sold short does not exceed 50% of its NAV), and the ability to use leverage through the use of cash borrowing, short selling and specified derivatives. Notwithstanding the foregoing, the combined level of cash borrowing and short selling is limited to 50% of its NAV in aggregate and the maximum aggregate exposure to the foregoing sources of leverage, as calculated in accordance with section 2.9.1 of NI 81-102, shall not exceed 300% of the Fund’s NAV.

The fundamental investment objective of the Fund may only be changed with the approval of the Independent Review Committee and a simple majority of the votes cast by the Unitholders of all classes of units of the Fund at a meeting called for that purpose.

### ***Investment Strategies***

To achieve the Fund’s investment objectives, the Manager intends that the Fund will primarily employ arbitrage strategies, which are specialized investment techniques designed to profit from the successful completion of mergers, take-overs, tender offers, leveraged buyouts, spin-offs, liquidations, and other corporate reorganizations.

In seeking to achieve its investment objective, the Manager may also employ a variety of additional investment strategies which are permitted within an alternative mutual fund but may be limited or prohibited within other types of mutual funds to take advantage of potentially profitable opportunities in the capital markets, including but not limited to investing in SPACs, closed end funds, Master Limited Partnerships, equity options, convertible securities, preferred shares, private companies and corporate or sovereign debt securities.

The most common arbitrage activity the Manager intends to use is merger arbitrage, which involves purchasing the shares of an announced acquisition target company at a discount to the expected acquisition price. When a transaction is announced, the value of the cash and/or securities to be received is typically higher than the market price of the target company. The discount that the target security trades at is called the merger arbitrage “spread.” If the Manager believes that it is probable that the proposed transaction, or a higher value transaction, will be consummated in a time frame that makes the spread an attractive rate of return, the Fund may purchase shares of the target company. Alternatively, the Fund may engage in short selling of the target company’s shares if the Manager determines that there is a likelihood that the transaction will fail to be consummated or if the spread is considered inadequate for the risks.

The Manager may engage in selling securities short when the terms of a proposed acquisition call for the exchange of common shares of the acquirer and/or other securities. If the transaction is consummated, the Fund will then exchange the securities of the target company which it has accumulated for the securities issued by the acquiring company and may cover its short position, if any, with the securities so received.

The Manager may use listed put or call options to hedge positions.

The Fund may invest in derivative instruments to (i) reduce transaction costs, (ii) increase liquidity and efficiency of trading, (iii) gain exposure to equity markets in a more efficient manner, (iv) reduce risk, (v) generate yield, (vi) hedge currency exposure, and (vii) provide leverage. The Fund will only use derivatives as permitted by securities regulators. The gross aggregate of the notional amount of the Fund’s exposure

## Pender Alternative Arbitrage Fund

under its specified derivatives positions, together with the Fund's cash borrowing and short selling is limited to 300% of its NAV.

The Manager may invest the majority of assets of the Fund in cash or cash equivalents, depending on the investment opportunities available.

The Fund may borrow cash of up to a maximum of 50% of its NAV when aggregated with the value of all outstanding borrowing, and the Fund's gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives is limited to 300% of its NAV.

The Fund may carry out all or part of its strategy by investing up to 100% of its assets in funds managed and/or its affiliates or associates, and/or units of other investment funds, as selected by the Manager in its sole discretion.

The Fund's investment strategies involve active and frequent trading of portfolio securities. In any year, the higher a fund's portfolio turnover rate, the greater the trading costs payable by the fund in the year and the larger the capital gains distribution may be. There is not necessarily a relationship between a high portfolio turnover rate and the performance of a fund.

### ***Assets of the Fund***

Over time, the assets of the Fund are expected to be, or could be, comprised of the following securities:

#### ***Cash and cash equivalents***

The Fund may hold significant cash and cash equivalents when the Manager considers it desirable as a result of market conditions.

#### ***Cash borrowing***

The Fund may borrow cash of up to a maximum of 50% of its NAV when aggregated with the value of all outstanding borrowing, and the gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives is limited to 300% of its NAV.

#### ***Closed end funds***

The Fund may invest directly or indirectly in closed end funds to the extent allowed under NI 81-102.

#### ***Debt securities***

The Fund may also invest in investment grade and non-investment grade corporate debt, convertible debt in public companies, and securities issued by government entities either directly or indirectly by virtue of its purchasing units of funds managed and/or units of other investment funds.

#### ***Derivatives***

Subject to the restriction described in the section entitled "*Policies and Procedures Related to Derivatives Trading*", the portfolio advisor may, in its discretion, invest the Fund's assets in or use derivative instruments from time to time for hedging and non-hedging purposes. When derivatives are used for hedging purposes, they are used as a means of hedging currency exposure and risk in the securities and businesses in which the portfolio advisor has invested to protect against losses.

Class A (US\$), Class F (US\$), Class H (US\$), and Class I (US\$) units of the Fund are substantially hedged against changes in the Canadian currency relative to the US currency and the remaining classes of the

## Pender Alternative Arbitrage Fund

Fund are substantially hedged against changes in the US currency relative to the Canadian currency. The Fund substantially hedges against the impact of fluctuations between the Canadian and US currencies on performance. These classes will be substantially hedged using derivative instruments such as foreign currency forward contracts.

Where derivatives are used for non-hedging purposes, they are used either to substitute for direct investment or to generate income. The portfolio advisor may make use of clearing corporation options, futures contracts, listed warrants, options on futures, over-the-counter options, forward contracts, debt-like securities and listed warrants for hedging, and non-hedging purposes. Investing in and using derivative instruments are subject to certain risks. Further details on these risks are described below in the section entitled *“What are the risks of investing in the Fund?”*

Even if the Fund does not engage directly in derivatives the Fund may gain exposure to derivatives by virtue of its purchasing units of funds managed by the Manager and/or units of other investment funds.

### ***Marketable securities***

The Fund may also invest in marketable securities such as common shares, preferred shares, exchange traded funds, publicly traded units of investment trusts, including but not limited to, mutual fund trusts and REITs, stock warrants and rights that are consistent with the Fund’s investment objectives and strategies.

### ***Mutual funds***

The Fund may carry out all or part of its strategy by purchasing units of funds managed and/or units of other investment funds, including units of ETFs, with target percentages to be determined from time to time by the Manager.

### ***Other investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed and/or units of other investment funds, long or short positions in foreign common stocks, trust units, securities of private issuers, and other securities or financial instruments including those of investment companies.

### ***Private unlisted investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed and/or units of other investment funds, private unlisted investments but will limit the amount invested in private unlisted investments to a maximum of up of 10% of the net assets of the Fund.

### ***Risk arbitrage***

The Fund may engage in risk arbitrage investing. Risk arbitrage investing involves the pursuit of profits from an announced corporate event, such as the sale of a company, a merger, a recapitalization, a reorganization, a liquidation or a self-tender. The financial results from this type of investment approach depend more on corporate action than on overall stock market behaviour.

### ***Short selling***

The Fund may also engage in short selling securities. For more information on short selling and the limits within which the Fund may engage in short selling, see the section *“Policies and Procedures Related to Short Selling Risk Management”*.

# Pender Alternative Arbitrage Fund

## What are the Risks of Investing in the Fund?

As noted above, the Fund is considered an “alternative mutual fund” which means that, under NI 81-102, it is permitted to invest in asset classes and use investment strategies that are not permitted for other types of mutual funds. As a result of such investment strategies, the Fund is subject to the following key risks as described in Part B of this document:

- Arbitrage risk
- Business risk
- Call risk
- Changes in legislation risk
- Class risk
- Closed end fund risk
- Commodity risk
- Concentration risk
- Counterparty risk
- Credit risk
- Currency, foreign exchange and hedging risk
- Cybersecurity and business continuity risk
- Depository securities and receipts risk
- Derivative risk
- Equity risk
- ETF index risks
- ETF industry sector risk
- Fixed income risk
- Foreign market risk
- Fund-on-fund risk
- Global pandemic risk
- High yield securities risk
- Income trust and REIT risk
- Interest rate risk
- 
- Lack of separate counsel risk
- Large transaction risk
- Leverage risk
- Liquidity risk
- Market risk
- Net asset value risk
- No assurance of return risk
- Performance fee risk
- Portfolio manager risk
- Portfolio turnover risk
- Potential conflicts of interest risk
- Prime broker risk
- Prepayment risk
- Private company risk
- Rebalancing risk
- Regulatory risk
- Short selling risk
- Small company risk
- Special-purpose acquisition company risk
- Style risk
- Tax loss restriction event risk
- Taxation policy risk
- U.S. regulation and tax risk
- Volatility

For a detailed description of these mutual fund risks, see “*What are the Specific Risks of Investing in a Mutual Fund?*”.

As part of its investment strategy, the Fund may invest in units of Underlying Funds. See the “*Fund-on-fund risk*” section for more information.

As at June 30, 2022, one Unitholder held units representing approximately 13% of the net asset value of the Fund. See the “*Large transaction risk*” section for more information.

Because this Fund has less than a 10-year performance history, a reference index that reasonably approximates the standard deviation of the Fund has been used to approximate the returns for the purposes of determining the investment risk level, as described in the “*Investment Risk Classification Methodology*” section.

#### What Does the Fund Invest In?

##### *Investment Objectives*

The investment objective of the Fund is to generate consistent, positive returns, with low volatility and low correlation to equity markets by investing primarily in North American securities. The Fund may also invest in foreign and other securities.

The Fund falls within the definition of an “alternative mutual fund” as set out in NI 81-102, as it is permitted, as modified by exemptive relief received by the Fund, to use strategies generally prohibited by other types of mutual funds, such as the ability to invest more than 10% of its NAV in securities of a single issuer (up to 20%), either directly or through the use of specified derivatives, the ability to borrow cash, when

## Pender Alternative Arbitrage Plus Fund

aggregated with the value of all outstanding borrowing, up to 100% of its NAV, to use for investment purposes, the ability to sell securities short (provided that the aggregate market value of the securities of the issuer of the securities sold short, other than government securities, does not exceed 10% of its NAV and the aggregate market value of the securities sold short does not exceed 100% of its NAV), and the ability to use leverage through the use of cash borrowing, short selling and specified derivatives. The maximum aggregate exposure to these sources of leverage, as calculated in accordance with section 2.9.1 of NI 81-102, shall not exceed 300% of the Fund's NAV.

The fundamental investment objective of the Fund may only be changed with the approval of the Independent Review Committee and a simple majority of the votes cast by the Unitholders of all classes of units of the Fund at a meeting called for that purpose.

### ***Investment Strategies***

To achieve the Fund's investment objectives, the Manager intends that the Fund will primarily employ arbitrage strategies, which are specialized investment techniques designed to profit from the successful completion of mergers, take-overs, tender offers, leveraged buyouts, spin-offs, liquidations, and other corporate reorganizations.

In seeking to achieve its investment objective, the Manager may also employ a variety of additional investment strategies which are permitted within an alternative mutual fund but may be limited or prohibited within other types of mutual funds to take advantage of potentially profitable opportunities in the capital markets, including but not limited to investing in SPACs, closed end funds, Master Limited Partnerships, equity options, convertible securities, preferred shares, private companies and corporate or sovereign debt securities.

The most common arbitrage activity the Manager intends to use is merger arbitrage, which involves purchasing the shares of an announced acquisition target company at a discount to the expected acquisition price. When a transaction is announced, the value of the cash and/or securities to be received is typically higher than the market price of the target company. The discount that the target security trades at is called the merger arbitrage "spread." If the Manager believes that it is probable that the proposed transaction, or a higher value transaction, will be consummated in a time frame that makes the spread an attractive rate of return, the Fund may purchase shares of the target company. Alternatively, the Fund may engage in short selling of the target company's shares if the Manager determines that there is a likelihood that the transaction will fail to be consummated or if the spread is considered inadequate for the risks.

The Manager may engage in selling securities short when the terms of a proposed acquisition call for the exchange of common shares of the acquirer and/or other securities. If the transaction is consummated, the Fund will then exchange the securities of the target company which it has accumulated for the securities issued by the acquiring company and may cover its short position, if any, with the securities so received.

The Manager may use listed put or call options to hedge positions.

The Fund may invest in derivative instruments to (i) reduce transaction costs, (ii) increase liquidity and efficiency of trading, (iii) gain exposure to equity markets in a more efficient manner, (iv) reduce risk, (v) generate yield, (vi) hedge currency exposure, and (vii) provide leverage. The Fund will only use derivatives as permitted by securities regulators. The gross aggregate of the notional amount of the Fund's exposure under its specified derivatives positions, together with the Fund's cash borrowing and short selling is limited to 300% of its NAV.

The Manager may invest the majority of assets of the Fund in cash or cash equivalents, depending on the investment opportunities available.

## Pender Alternative Arbitrage Plus Fund

The Fund may borrow cash of up to a maximum of 100% of its NAV when aggregated with the value of all outstanding borrowing, and the Fund's gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives is limited to 300% of its NAV.

The Fund may carry out all or part of its strategy by investing up to 100% of its assets in funds managed and/or its affiliates or associates, and/or units of other investment funds, as selected by the Manager in its sole discretion.

The Fund's investment strategies involve active and frequent trading of portfolio securities. In any year, the higher a fund's portfolio turnover rate, the greater the trading costs payable by the fund in the year and the larger the capital gains distribution may be. There is not necessarily a relationship between a high portfolio turnover rate and the performance of a fund.

### ***Assets of the Fund***

Over time, the assets of the Fund are expected to be, or could be, comprised of the following securities:

#### ***Cash and cash equivalents***

The Fund may hold significant cash and cash equivalents when the Manager considers it desirable as a result of market conditions.

#### ***Cash borrowing***

The Fund may borrow cash of up to a maximum of 100% of its NAV when aggregated with the value of all outstanding borrowing, and the gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives is limited to 300% of its NAV.

#### ***Closed end funds***

The Fund may invest directly or indirectly in closed end funds to the extent allowed under NI 81-102.

#### ***Debt securities***

The Fund may also invest in investment grade and non-investment grade corporate debt, convertible debt in public companies, and securities issued by government entities either directly or indirectly by virtue of its purchasing units of funds managed and/or units of other investment funds.

#### ***Derivatives***

Subject to the restriction described in the section entitled "*Policies and Procedures Related to Derivatives Trading*", the portfolio advisor may, in its discretion, invest the Fund's assets in or use derivative instruments from time to time for hedging and non-hedging purposes. When derivatives are used for hedging purposes, they are used as a means of hedging currency exposure and risk in the securities and businesses in which the portfolio advisor has invested to protect against losses.

Class A (US\$), Class F (US\$), Class H (US\$), and Class I (US\$) units of the Fund are substantially hedged against changes in the Canadian currency relative to the US currency and the remaining classes of the Fund are substantially hedged against changes in the US currency relative to the Canadian currency. The Fund substantially hedges against the impact of fluctuations between the Canadian and US currencies on performance. These classes will be substantially hedged using derivative instruments such as foreign currency forward contracts.

## Pender Alternative Arbitrage Plus Fund

Where derivatives are used for non-hedging purposes, they are used either to substitute for direct investment or to generate income. The portfolio advisor may make use of clearing corporation options, futures contracts, listed warrants, options on futures, over-the-counter options, forward contracts, debt-like securities and listed warrants for hedging, and non-hedging purposes. Investing in and using derivative instruments are subject to certain risks. Further details on these risks are described below in the section entitled “*What are the risks of investing in the Fund?*”

Even if the Fund does not engage directly in derivatives the Fund may gain exposure to derivatives by virtue of its purchasing units of funds managed by the Manager and/or units of other investment funds.

### ***Marketable securities***

The Fund may also invest in marketable securities such as common shares, preferred shares, exchange traded funds, publicly traded units of investment trusts, including but not limited to, mutual fund trusts and REITs, stock warrants and rights that are consistent with the Fund’s investment objectives and strategies.

### ***Mutual funds***

The Fund may carry out all or part of its strategy by purchasing units of funds managed and/or units of other investment funds, including units of ETFs, with target percentages to be determined from time to time by the Manager.

### ***Other investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed and/or units of other investment funds, long or short positions in foreign common stocks, trust units, securities of private issuers, and other securities or financial instruments including those of investment companies.

### ***Private unlisted investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed and/or units of other investment funds, private unlisted investments but will limit the amount invested in private unlisted investments to a maximum of up of 10% of the net assets of the Fund.

### ***Risk arbitrage***

The Fund may engage in risk arbitrage investing. Risk arbitrage investing involves the pursuit of profits from an announced corporate event, such as the sale of a company, a merger, a recapitalization, a reorganization, a liquidation or a self-tender. The financial results from this type of investment approach depend more on corporate action than on overall stock market behaviour.

### ***Short selling***

The Fund may also engage in short selling securities. For more information on short selling and the limits within which the Fund may engage in short selling, see the section “*Policies and Procedures Related to Short Selling Risk Management*”.

## **What are the Risks of Investing in the Fund?**

As noted above, the Fund is considered an “alternative mutual fund” which means that, under NI 81-102, it is permitted to invest in asset classes and use investment strategies that are not permitted for other types of mutual funds. As a result of such investment strategies, the Fund is subject to the following key risks as described in Part B of this document:

## Pender Alternative Arbitrage Plus Fund

- Arbitrage risk
- Business risk
- Call risk
- Changes in legislation risk
- Class risk
- Closed end fund risk
- Commodity risk
- Concentration risk
- Counterparty risk

Securities Offered	Start Date	Management Fee (exclusive of GST/HST)
Class A units	September 21, 2009	1.80%
Class E units	December 17, 2019	Negotiable – maximum 1.80%
Class F units	September 21, 2009	0.80%
Class H units	August [XX], 2022	1.50%
Class I units	December 17, 2019	0.65%
Class N units	December 17, 2019	0.30%
Class O units	December 17, 2019	Negotiable – maximum 1.80%
Performance fee (exclusive of GST/HST)	Effective as of the Conversion Date, performance fees will apply to all classes of units. For Class O units, this fee is or will be charged directly to Unitholders, as applicable. Performance fees equal 15% of the amount by which the total return of the class of units exceeds a 3% hurdle rate, for the period since the performance fee was last paid, subject to accumulation in years where no performance fee is paid, provided that the total return of the relevant class of units for such period exceeds the previous high-water mark.	

#### **What Does the Fund Invest In?**

##### ***Investment Objectives***

Effective as of the Conversion Date, the objective of the Fund is to preserve capital and to generate returns through current income and capital appreciation, while being sufficiently diversified to mitigate volatility. The Fund will invest primarily in North American securities and may also invest in foreign securities.

Effective as of the Conversion Date, the Fund falls within the definition of an “alternative mutual fund” as set out in NI 81-102, as it is permitted, as modified by exemptive relief received by the Fund, to use

## Pender Alternative Multi-Strategy Income Fund

strategies generally prohibited by other types of mutual funds, such as the ability to invest more than 10% of its NAV in securities of a single issuer (up to 20%), either directly or through the use of specified derivatives, the ability to borrow cash, when aggregated with the value of all outstanding borrowing, up to 100% of its NAV, to use for investment purposes, the ability to sell securities short (provided that the aggregate market value of the securities of the issuer of the securities sold short, other than government securities, does not exceed 10% of its NAV and the aggregate market value of the securities sold short does not exceed 100% of its NAV), and the ability to use leverage through the use of cash borrowing, short selling and specified derivatives. The maximum aggregate exposure to these sources of leverage, as calculated in accordance with section 2.9.1 of NI 81-102, shall not exceed 300% of the Fund's NAV.

The fundamental investment objective of the Fund may only be changed with the approval of the Independent Review Committee and a simple majority of the votes cast by the Unitholders of all classes of units of the Fund at a meeting called for that purpose.

### ***Investment Strategies***

Effective as of the Conversion Date, the investment strategies of the Fund are as described below.

To achieve the Fund's investment objectives, the Manager will utilize fundamental research to identify attractive risk adjusted return opportunities in individual investments within a diversified portfolio. The portfolio advisor believes that private and public securities are priced inefficiently and, as a result, the price of any given security only occasionally coincides with its intrinsic value. The portfolio advisor attempts to identify and exploit these inaccuracies using internal analyses.

The Fund will invest primarily in North American securities, as well as foreign securities outside North America. This can include, but is not limited to high yield bonds, investment grade corporate bonds, government bonds, syndicated loans, structured products, preferred shares, convertible bonds & debentures, common shares, exchange traded funds, derivative products, SPACs, closed end funds, Master Limited Partnerships, equity options, private companies and other income generating securities.

The Fund may carry out all or part of its strategy by investing up to 100% of its assets in funds managed by the Manager and/or its affiliates or associates, and/or units of other investment funds, as selected by the Manager in its sole discretion.

The Manager may choose to sell a security short if, in the opinion of the Manager, the risk adjusted return potential of selling that security short offers an attractive opportunity. Short selling can be an effective tool to generate absolute returns and to hedge unwanted market risk. The Manager may also short sell securities with unattractive fundamental characteristics.

The Manager will, from time to time, and among other strategies:

- Utilize fundamental credit research to identify securities believed to offer attractive risk adjusted returns based on the Manager's view of an issuer's ability to maintain and/or improve its credit metrics.
- Employ arbitrage strategies to capture opportunities in announced merger deals or across the capital structure.
- Invest in fundamental long positions in equity securities that offer attractive risk adjusted return potential.
- Employ event driven strategies to capture attractive opportunities related to a company specific action or market event.
- Short selling Government Securities to reduce interest rate sensitivity.
- Combine a long and a short position in an issuer's senior debt, junior debt, common stock or preferred stock.

## Pender Alternative Multi-Strategy Income Fund

- Combine a long position in a particular issuer, index, sector, or segment of the market with a short position in the debt of the same issuer, index, sector or segment of the market.
- Combine a long position in an issuer's convertible securities, including convertible bonds/debentures, warrants, and convertible preferred shares, with a short position in its common stock.

To execute these strategies, the Manager may use warrants, exchange traded funds and derivatives such as options, forward contracts, futures contracts and swaps to hedge against losses from changes in the prices of the Fund's investments and from exposure to foreign currencies, gain exposure to individual securities and markets instead of buying the securities directly, and/or generate income.

The Manager may invest the majority of assets of the Fund in cash or cash equivalents, depending on the investment opportunities available.

### ***Assets of the Fund***

Over time and commencing on the Conversion Date, the assets of the Fund are expected to be, or could be, comprised of the following securities:

#### ***Cash and cash equivalents***

The Fund may hold significant cash and cash equivalents when the Manager considers it desirable as a result of market conditions.

#### ***Cash borrowing***

The Fund may borrow cash of up to a maximum of 100% of its NAV when aggregated with the value of all outstanding borrowing, and the gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives is limited to 300% of its NAV.

#### ***Closed end funds***

The Fund may, either directly or indirectly by purchasing units of other mutual funds managed by the Manager and/or units of other investment funds, invest in credit-oriented closed end funds that trade on major North American stock exchanges. The Fund will not invest greater than 10% of its net assets (calculated at the time of purchase) in closed end funds.

#### ***Debt securities***

The Fund may also invest in investment grade and non-investment grade corporate debt, convertible debt in public companies, and securities issued by government entities either directly or indirectly by virtue of its purchasing units of funds managed and/or units of other investment funds.

#### ***Derivatives***

Subject to the restriction described in the section entitled "*Policies and Procedures Related to Derivatives Trading*", the portfolio advisor may, in its discretion, invest the Fund's assets in or use derivative instruments from time to time for hedging and non-hedging purposes. When derivatives are used for hedging purposes, they are used as a means of hedging currency exposure and risk in the securities and businesses in which the portfolio advisor has invested to protect against losses.

The Fund may hedge against the impact of fluctuations between the Canadian and US currencies on performance, using derivative instruments such as foreign currency forward contracts. Where derivatives are used for non-hedging purposes, they are used either to substitute for direct investment or to generate

## Pender Alternative Multi-Strategy Income Fund

income. The portfolio advisor may make use of clearing corporation options, futures contracts, listed warrants, options on futures, over-the-counter options, forward contracts, debt-like securities and listed warrants for hedging, and non-hedging purposes. Investing in and using derivative instruments are subject to certain risks. Further details on these risks are described below in the section entitled “*What are the risks of investing in the Fund?*”

Even if the Fund does not engage directly in derivatives the Fund may gain exposure to derivatives by virtue of its purchasing units of funds managed by the Manager and/or units of other investment funds.

### ***Marketable securities***

The Fund may also invest in marketable securities such as common shares, preferred shares, exchange traded funds, publicly traded units of investment trusts, including but not limited to, mutual fund trusts and REITs, stock warrants and rights that are consistent with the Fund’s investment objectives and strategies.

### ***Mutual funds***

The Fund may carry out all or part of its strategy by purchasing units of Funds managed by the Manager and/or units of other investment funds, including units of ETFs, with target percentages to be determined from time to time by the Manager.

### ***Other investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed and/or units of other investment funds, long or short positions in foreign common stocks, trust units, securities of private issuers, asset-backed securities, syndicated loans, and other securities or financial instruments including those of investment companies.

### ***Private unlisted investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed and/or units of other investment funds, private unlisted investments but will limit the amount invested in private unlisted investments to a maximum of up of 10% of the net assets of the Fund.

### ***Risk arbitrage***

The Fund may engage in risk arbitrage investing. Risk arbitrage investing involves the pursuit of profits from an announced corporate event, such as the sale of a company, a merger, a recapitalization, a reorganization, a liquidation or a self-tender. The financial results from this type of investment approach depend more on corporate action than on overall stock market behaviour.

### ***Short selling***

The Fund may also engage in short selling securities. For more information on short selling and the limits within which the Fund may engage in short selling, see the section “*Policies and Procedures Related to Short Selling Risk Management*”.

## **What are the Risks of Investing in the Fund?**

As noted above, the Fund is considered an “alternative mutual fund” which means that, under NI 81-102, it is permitted to invest in asset classes and use investment strategies that are not permitted for other types of mutual funds. As a result of such investment strategies, the Fund is subject to the following key risks as described in Part B of this document:

## Pender Alternative Multi-Strategy Income Fund

- Arbitrage risk
- Asset-backed and mortgage-backed securities risk
- Business risk
- Call risk
- Changes in legislation risk
- Class risk
- Closed end fund risk
- Commodity risk
- Concentration risk
- Counterparty risk
- Credit risk
- Currency, foreign exchange and hedging risk
- Cybersecurity and business continuity risk
- Depository securities and receipts risk
- Derivative risk
- Equity risk
- ETF index risk
- ETF industry sector risk
- Fixed income risk
- Floating rate instruments risk
- Foreign market risk
- Fund-on-fund risk
- Global pandemic risk
- High yield securities risk
- Income trust and REIT risk
- Interest rate risk
- Lack of separate counsel risk
- Large transaction risk
- Leverage risk
- Liquidity risk
- Market risk
- Net asset value risk
- No assurance of return risk
- Performance fee risk
- Portfolio manager risk
- Portfolio turnover risk
- Potential conflicts of interest risk
- Prepayment risk
- Prime broker risk
- Private company risk
- Rebalancing risk
- Regulatory risk
- Short selling risk
- Small company risk
- Special-purpose acquisition company risk
- Style risk
- Tax loss restriction event risk
- Taxation policy risk
- U.S. regulation and tax risk
- Volatility risk

For a detailed description of these mutual fund risks, see “*What are the Specific Risks of Investing in a Mutual Fund?*”.

As part of its investment strategy, the Fund may invest in units of Underlying Funds. See the “*Fund-on-fund risk*” section for more information. During the 12-month period immediately preceding the date of this document, up to 3% of the Fund was invested in units of other mutual funds managed by the Manager.

As at June 30, 2022, one Unitholder held units representing approximately 11% of the net asset value of the Fund. See the “*Large transaction risk*” section for more information.

Because this Fund has less than a 10-year performance history, a reference index that reasonably approximates the standard deviation of the Fund has been used to approximate the returns for the purposes of determining the investment risk level, as described in the “*Investment Risk Classification Methodology*” section. As of the Conversion Date, the reference index will be changed as set out below. This is to reflect the changed investment objectives and strategies for the Fund in connection with the PVFII Conversion.

Reference Index	Description
9% FTSE Canada Universe Bond Index,	The FTSE Canada Universe Bond Index measures the performance of the Canadian Dollar denominated investment-grade fixed income market, covering Canadian government, quasi-government and corporate bonds. The index is designed to track the performance of marketable

## Pender Alternative Multi-Strategy Income Fund

Reference Index	Description
	government and corporate bonds outstanding in the Canadian market.
25% ICE BofA US High Yield Index	The ICE BofA US High Yield Index is market capitalization weighted and is designed to measure the performance of U.S. dollar denominated below investment grade corporate debt publicly issued in the U.S. domestic market. The Index includes securities rated below investment grade (based on an average of Moody's Investors Service, Inc., Fitch, Inc., and Standard & Poor's Financial Services, LLC) with at least 18 months remaining to final maturity at the time of issuance and at least one year remaining term to final maturity as of the Index's rebalancing date. In addition, individual securities of qualifying issuers must have a fixed coupon schedule and a minimum amount outstanding of \$250 million.
33% HFRI ED: Merger Arbitrage Index (Hedged to CAD)	Merger Arbitrage strategies which employ an investment process primarily focused on opportunities in equity and equity related instruments of companies which are currently engaged in a corporate transaction. Merger Arbitrage involves primarily announced transactions, typically with limited or no exposure to situations which pre-, post-date or situations in which no formal announcement is expected to occur. Opportunities are frequently presented in cross border, collared and international transactions which incorporate multiple geographic regulatory institutions, with typically involve minimal exposure to corporate credits. Merger arbitrage strategies typically have over 75% of positions in announced transactions over a given market cycle.
33% HFRI Credit Index (Hedged to CAD)	HFRI Credit Index is a composite index of strategies trading primarily in credit markets. It is an equal-weighted aggregation of following 7 HFRI sub strategy indices. HFRI ED: Credit Arbitrage Index, HFRI ED: Distressed/Restructuring Index, HFRI ED: Multi-Strategy Index, HFRI RV: Fixed Income-Asset Backed Index, HFRI RV: Fixed Income-Convertible Arbitrage Index, HFRI RV: Fixed Income-Corporate Index, and HFRI RV: Multi-Strategy Index.

### Distribution Policy

The Fund distributes its net investment income quarterly and its net realized capital gains annually in December of each year. Distributions are automatically reinvested in additional units of the Fund at no charge or, upon request, paid out in cash to the Unitholder. The Manager may make distributions from the Fund to Unitholders in the amount of a target annualized distribution rate of the net asset value of each class of units of the Fund annually. The Manager may change the target annualized distribution rate at any

## Pender Alternative Multi-Strategy Income Fund

time. Distributions may consist of net investment income, net realized capital gains and/or a return of capital. Distributions are automatically reinvested in additional units of the Fund at no charge or, upon request, paid out in cash to the Unitholder.

## **PENDER ALTERNATIVE SPECIAL SITUATIONS FUND (FORMERLY, PENDER SPECIAL SITUATIONS FUND)**

### **Fund Details**

Fund Type	Alternative Equity Focused
Investment Risk Level	Medium
Benchmark	S&P/TSX Composite Index
Eligible for Registered Plans?	The units are eligible investments for Registered Plans

Securities Offered	Start Date	Management Fee (exclusive of GST/HST)
Class A units	June 25, 2020	1.95%
Class E units	June 25, 2021	Negotiable – maximum 1.95%
Class F units	June 25, 2020	0.95%
Class H units	June 25, 2021	1.65%
Class I units	June 25, 2021	0.80%
Class N units	June 25, 2021	0.45%
Class O units	June 25, 2021	Negotiable – maximum 1.95%
Performance fee (exclusive of GST/HST)	Effective as of the Conversion Date, performance fees will apply to all classes of units. For Class O units, this fee is or will be charged directly to Unitholders, as applicable. Performance fees will equal 15% of the amount by which the total return of the class of units exceeds a 6% hurdle rate, for the period since the performance fee was last paid, subject to accumulation in years where no performance fee is paid, provided that the total return of the relevant class of units for such period exceeds the previous high-water mark.	

### **What Does the Fund Invest In?**

#### ***Investment Objectives***

Effective as of the Conversion Date, the Fund's objective is to achieve long-term capital appreciation by investing primarily in Canadian and US equities with the ability to also invest in debt and other securities. The Fund seeks to identify investment opportunities that are believed to represent special situations.

Effective as of the Conversion Date, the Fund falls within the definition of an "alternative mutual fund" as set out in NI 81-102, as it is permitted, as modified by exemptive relief received by the Fund, to use strategies generally prohibited by other types of mutual funds, such as the ability to invest more than 10% of its NAV in securities of a single issuer (up to 20%), either directly or through the use of specified derivatives, the ability to borrow cash, when aggregated with the value of all outstanding borrowing, up to 100% of its NAV, to use for investment purposes, the ability to sell securities short (provided that the aggregate market value of the securities of the issuer of the securities sold short, other than government securities, does not exceed 10% of its NAV and the aggregate market value of the securities sold short does not exceed 100% of its NAV), and the ability to use leverage through the use of cash borrowing, short

## Pender Alternative Special Situations Fund

---

selling and specified derivatives. The maximum aggregate exposure to these sources of leverage, as calculated in accordance with section 2.9.1 of NI 81-102, shall not exceed 300% of the Fund's NAV.

The fundamental investment objective of the Fund may only be changed with the approval of the Independent Review Committee and a simple majority of the votes cast by the Unitholders of all classes of units of the Fund at a meeting called for that purpose.

### ***Investment Strategies***

Effective as of the Conversion Date, the investment strategies of the Fund are as described below.

The Fund aims to identify investment opportunities that it believes represents special situations, which are investments that may realize a revaluation, the potential for which has not been reflected by the market. This includes seeking to capitalize on changes in fundamentals, sentiment or momentum for companies and industries. This may also include investing in equity, debt and other securities that are impacted by some form of catalyst such as a corporate event, capital structure reorganization or other opportunistic situations.

The Fund seeks gains through movements in security prices and income that can occur over a short to long-term time horizon.

The Fund may also:

- Invest up to 49% of its net assets in foreign equity, debt and other securities.
- Invest in companies of any size but tends to focus on small and medium sized companies.
- Invest across the capital structure in any and all securities issued by a company.
- Make fund-of-funds investments in other funds managed by Pender and/or other funds.
- Concentrate its investments in relatively few equity, debt and other securities, companies and/or industries.

The Manager may also employ arbitrage strategies, which are specialized investment techniques designed to profit from the successful completion of mergers, take-overs, tender offers, leveraged buyouts, spin-offs, liquidations, and other corporate reorganizations.

The Manager may also employ a variety of additional investment strategies which are permitted within an alternative mutual fund but may be limited or prohibited within other types of mutual funds to take advantage of potentially profitable opportunities in the capital markets, including but not limited to investing in SPACs, closed end funds, Master Limited Partnerships, equity options, convertible securities, preferred shares, private companies and corporate or sovereign debt securities.

The most common arbitrage activity the Manager intends to use is merger arbitrage, which involves purchasing the shares of an announced acquisition target company at a discount to the expected acquisition price. When a transaction is announced, the value of the cash and/or securities to be received is typically higher than the market price of the target company. The discount that the target security trades at is called the merger arbitrage "spread." If the Manager believes that it is probable that the proposed transaction, or a higher value transaction, will be consummated in a time frame that makes the spread an attractive rate of return, the Fund may purchase shares of the target company. Alternatively, the Fund may engage in short selling of the target company's shares if the Manager determines that there is a likelihood that the transaction will fail to be consummated or if the spread is considered inadequate for the risks.

The Manager may engage in selling securities short when the terms of a proposed acquisition call for the exchange of common shares of the acquirer and/or other securities. If the transaction is consummated, the Fund will then exchange the securities of the target company which it has accumulated for the securities issued by the acquiring company and may cover its short position, if any, with the securities so received.

## Pender Alternative Special Situations Fund

---

The Fund may also employ convertible arbitrage strategies by investing in convertible securities that are trading at discounts to their fundamental values and attempting to mitigate the various risks associated with investing in such convertible securities. In some cases, convertible securities trade at premiums relative to their fundamental values; in such cases the Fund would short sell the respective convertible security and employ various hedging strategies to mitigate the various risks associated with being short the convertible security.

The Manager may use listed put or call options to hedge positions.

The Fund may invest in derivative instruments to (i) reduce transaction costs, (ii) increase liquidity and efficiency of trading, (iii) gain exposure to equity markets in a more efficient manner, (iv) reduce risk, (v) generate yield, (vi) hedge currency exposure, and (vii) provide leverage. The Fund will only use derivatives as permitted by securities regulators.

The Manager may invest the majority of assets of the Fund in cash or cash equivalents, depending on the investment opportunities available.

The Fund may carry out all or part of its strategy by investing up to 100% of its assets in funds managed by the Manager and/or its affiliates or associates, and/or units of other investment funds, as selected by the Manager in its sole discretion.

The Fund's investment strategies may involve active and frequent trading of portfolio securities. In any year, the higher a fund's portfolio turnover rate, the greater the trading costs payable by the fund in the year and the larger the capital gains distribution may be. There is not necessarily a relationship between a high portfolio turnover rate and the performance of a fund.

### ***Assets of the Fund***

Over time and commencing as of the Conversion Date, the assets of the Fund are expected to be, or could be, comprised of the following securities:

#### ***Cash and cash equivalents***

The Fund may hold significant cash and cash equivalents when the portfolio advisor considers it desirable as a result of market conditions.

#### ***Cash borrowing***

The Fund may borrow cash of up to a maximum of 100% of its NAV when aggregated with the value of all outstanding borrowing, and the Fund's gross aggregate exposure to cash borrowing, short selling and the notional value of specified derivatives is limited to 300% of its NAV.

#### ***Closed end funds***

The Fund may invest directly or indirectly in closed end funds to the extent allowed under NI 81-102.

#### ***Debt securities***

The Fund may also invest in investment grade and non-investment grade corporate debt, convertible debt in public companies, and securities issued by government entities either directly or indirectly by virtue of its purchasing units of funds managed and/or units of other investment funds.

# Pender Alternative Special Situations Fund

---

## ***Derivatives***

Subject to the restriction described in the section entitled “*Policies and Procedures Related to Derivatives Trading*”, the portfolio advisor may, in its discretion, invest the Fund’s assets in or use derivative instruments from time to time for hedging and non-hedging purposes. When derivatives are used for hedging purposes, they are used as a means of hedging currency exposure and risk in the securities and businesses in which the portfolio advisor has invested to protect against losses.

The Fund may hedge against the impact of fluctuations between the Canadian and US currencies on performance, using derivative instruments such as foreign currency forward contracts. Where derivatives are used for non-hedging purposes, they are used either to substitute for direct investment or to generate income. The portfolio advisor may make use of clearing corporation options, futures contracts, listed warrants, options on futures, over-the-counter options, forward contracts, debt-like securities and listed warrants for hedging, and non-hedging purposes. Investing in and using derivative instruments are subject to certain risks. Further details on these risks are described below in the section entitled “*What are the risks of investing in the Fund?*”

Even if the Fund does not engage directly in derivatives the Fund may gain exposure to derivatives by virtue of its purchasing units of Funds managed by the Manager and/or units of other investment funds.

## ***Marketable securities***

The Fund may also invest in marketable securities such as common shares, preferred shares, publicly-traded units of investment trusts, including, but not limited to, mutual fund trusts and REITs, stock warrants and rights that are consistent with the Fund’s investment objectives and strategies.

## ***Mutual funds***

The Fund may carry out all or part of its strategy by purchasing units of funds managed and/or units of other investment funds, including units of ETFs, with target percentages to be determined from time to time by the Manager.

## ***Other investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of funds managed and/or units of other investment funds, long or short positions in foreign common stocks, trust units, securities of private issuers, asset-backed securities, syndicated loans, and other securities or financial instruments including those of investment companies.

## ***Private unlisted investments***

The Fund’s investments may also include, either directly or by virtue of its purchasing units of Funds managed by the Manager and/or units of other investment funds, private unlisted investments but will limit the amount invested in private unlisted investments to a maximum of up of 10% of the net assets of the Fund.

## ***Risk arbitrage***

The Fund may engage in risk arbitrage investing. Risk arbitrage investing involves the pursuit of profits from an announced corporate event, such as the sale of a company, a merger, a recapitalization, a reorganization, a liquidation or a self-tender. The financial results from this type of investment approach depend more on corporate action than on overall stock market behaviour.

# Pender Alternative Special Situations Fund

---

## **Short selling**

The Fund may also engage in short selling securities. For more information on short selling and the limits within which the Fund may engage in short selling, see the section “Policies and Procedures Related to Short Selling Risk Management”.

## **What are the Risks of Investing in the Fund?**

As noted above, effective as of the Conversion Date, the Fund is considered an “alternative mutual fund” which means that, under NI 81-102, it is permitted to invest in asset classes and use investment strategies that are not permitted for other types of mutual funds. As a result of such investment strategies, commencing as of the Conversion Date, the Fund is subject to the following key risks as described in Part B of this document:

- Arbitrage risk
